Leigh Landy, John Richards

Infinite Music Imagining The Next Millennium Of Human Music Making:

Infinite Music Adam Harper, 2011-11-16 A new system for imagining music built on the infinite possibilities of twenty first century technology The Music of Sounds and the Music of Things Leigh Landy, John Richards, 2024-09-30 This book investigates two areas in which the appreciation of sonic creativity can be easily acquired across diverse cultures ages and interests the music of sounds making music with any sounds part of today's sampling culture and the music of things and the creation of instruments using existent materials another type of sampling involving the notion of instrument as composition as part of today's DIY or DIT do it together culture The book offers broad discussions regarding the music of things written by John Richards followed by the music of sounds written by Leigh Landy These chapters are followed by a focus on the workshop demonstrating the collaborative and inclusive potential in both areas and a spotlight on eight artists with a broad diversity of backgrounds and approaches to sound and music who discuss their perceptions The book's conclusion focuses on similarities and differences between the music of sounds and the music of things suggesting finally that both might form part of the 21st century's folk music landscape The book is primarily aimed towards students interested in current forms of sonic creativity but will be of interest to those interested in broader issues of sampling culture hacking and sound studies

Music, Technology, and Education Andrew King, Evangelos Himonides, 2016-06-10 The use of technology in music and education can no longer be described as a recent development Music learners actively engage with technology in their music making regardless of the opportunities afforded to them in formal settings This volume draws together critical perspectives in three overarching areas in which technology is used to support music education music production game technology musical creation experience and understanding The fourteen chapters reflect the emerging field of the study of technology in music from a pedagogical perspective Contributions come not only from music pedagogues but also from musicologists composers and performers working at the forefront of the domain The authors examine pedagogical practice in the recording studio how game technology relates to musical creation and expression the use of technology to create and assess musical compositions and how technology can foster learning within the field of Special Educational Needs SEN In addition the use of technology in musical performance is examined with a particular focus on the current trends and the ways it might be reshaped for use within performance practice This book will be of value to educators practitioners musicologists composers and performers as well as to scholars with an interest in the critical study of how technology is used effectively in music and music education The Routledge Companion to Music, Technology, and Education Andrew King, Evangelos Himonides, S. Alex Ruthmann, 2017-01-20 The Routledge Companion to Music Technology and Education is a comprehensive resource that draws together burgeoning research on the use of technology in music education around the world Rather than following a procedural how to approach this companion considers technology musicianship and pedagogy from a philosophical theoretical and empirically driven perspective offering an essential overview of current scholarship while providing support

for future research The 37 chapters in this volume consider the major aspects of the use of technology in music education Part I Contexts Examines the historical and philosophical contexts of technology in music This section addresses themes such as special education cognition experimentation audience engagement gender and information and communication technologies Part II Real Worlds Discusses real world scenarios that relate to music technology and education Topics such as computers composition performance and the curriculum are covered here Part III Virtual Worlds Explores the virtual world of learning through our understanding of media video games and online collaboration Part IV Developing and Supporting Musicianship Highlights the framework for providing support and development for teachers using technology to understand and develop musical understanding The Routledge Companion to Music Technology and Education will appeal to undergraduate and post graduate students music educators teacher training specialists and music education researchers It serves as an ideal introduction to the issues surrounding technology in music education **Pop Music and Hip Ennui**

Macon Holt, 2019-12-12 In Pop Music and Hip Ennui A Sonic Fiction of Capitalist Realism Macon Holt provides the imaginative and analytical resources to think with contemporary pop music to investigate the ambivalences of contemporary culture and the potentials in it for change Drawing on Kodwo Eshun's practice of Sonic Fiction and Mark Fisher's analytical framework of capitalist realism Holt explores the multiplicities contained in contemporary pop from sensation to abstraction and from the personal to the political Pop Music and Hip Ennui unravels the assumptions embedded in the cultural and critical analysis of popular music In doing so it provides new ways to understand the experience of listening to pop music and living in the sonic atmosphere it produces This book neither excuses pop's oppressive tendencies nor dismisses the pleasures of its sensations The Political Space of Art Benoît Dillet, Tara Puri, 2016-05-18 This book studies the tension between arts and politics in four contemporary artists from different countries working with different media The film directors Luc and Jean Pierre Dardenne film parts of their natal city to refer to specific political problems in interpersonal relations The novelist Arundhati Roy uses her poetic language to make room for people's desires her fiction is utterly political and her political essays make place for the role of narratives and poetic language Ai Weiwei uses references to Chinese history to give consistency to its economic miracle Finally Burial's electronic music is firmly rooted in a living breathing London built to create a sound that is entirely new and yet hauntingly familiar These artists create in their own way a space for politics in their works and their oeuvre but their singularity comes together as a desire to reconstruct the political space within art from its ruins These ruins were brought by the disenchantment of 1970s the end of art postmodernism and the rise of design marketing and communication Each artwork bears the mark of the resistance against the depoliticisation of society and the arts at once rejecting cynicism and idealism referring to themes and political concepts that are larger than their own domain This book focuses on these productive tensions Sound Actions Alexander Refsum Jensenius, 2022-12-13 A techno cognitive look at how new technologies are shaping the future of musicking Musicking encapsulates both the making of and

perception of music so it includes both active and passive forms of musical engagement But at its core it is a relationship between actions and sounds between human bodies and musical instruments Viewing musicking through this lens and drawing on music cognition and music technology Sound Actions proposes a model for understanding differences between traditional acoustic sound makers and new electro acoustic music makers What is a musical instrument How do new technologies change how we perform and perceive music What happens when composers build instruments performers write code perceivers become producers and instruments play themselves The answers to these pivotal questions entail a meeting point between interactive music technology and embodied music cognition what author Alexander Refsum Jensenius calls embodied music technology Moving between objective description and subjective narrative of his own musical experiences Jensenius explores why music makes people move how the human body can be used in musical interaction and how new technologies allow for active musical experiences The development of new music technologies he demonstrates has fundamentally changed how music is performed and perceived

Sonic Thinking Bernd Herzogenrath, 2017-02-23 Sonic Thinking attempts to extend the burgeoning field of media philosophy which so far is defined by a strong focus on cinema to the field of sound The contributors urge readers to re adjust their ideas of Sound Studies by attempting to think not only about sound by external criteria such as cultural meaning but to think with and through sound Series editor Bernd Herzogenrath s collection serves two interconnected purposes in developing an alternative philosophy of music that takes music serious as a form of thinking and in bringing this approach into a fertile symbiosis with the concepts and practices of artistic research art philosophy and science as heterogeneous yet coequal forms of thinking and researching Including contributions by both established figures and younger scholars working on cutting edge material and weaving artistic responses and interventions in between the more theoretical texts Herzogenrath s collection provides a lively introduction to a fresh debate

The Dark Precursor Paulo de Assis, Paolo Giudic, 2017-11-14 Deleuze s and Guattari s philosophy in the field of artistic research Gilles Deleuze s intriguing concept of the dark precursor refers to intensive processes of energetic flows passing between fields of different potentials Fleetinglly used in Difference and Repetition it remained underexplored in Deleuze s subsequent work In this collection of essays numerous contributors offer perspectives on Deleuze s concept of the dark precursor as it affects artistic research providing a wide ranging panorama on the intersection between music art philosophy and scholarship The forty eight chapters in this publication present a kaleidoscopic view of different fields of knowledge and artistic practices exposing for the first time the diversity and richness of a world situated between artistic research and the philosophy of Gilles Deleuze and Félix Guattari Within different understandings of artistic research the authors composers architects performers philosophers sculptors film makers painters writers and activists map practices and invent concepts contributing to a
