ECAB Inflammatory Bowel Disease - E-Book B S Ramakrishna,2014-12-11 ECAB Inflammatory Bowel Disease E Book

Inflammatory Bowel Diseases - ECAB Philip Augustine,2012-07-05 Inflammatory bowel disease IBD encompasses a spectrum of autoimmune diseases which include ulcerative colitis Crohn s disease and indeterminate colitis Ulcerative colitis is a relapsing nontransmural inflammatory disease restricted to colon which may be classified as proctitis left sided colitis or pancolitis depending on the extent of involvement Some patients also develop ileal inflammation backwash ileitis which occasionally complicates its differentiation from Crohn s ileocolitis Crohn s disease is defined as a relapsing transmural inflammatory disease of gastrointestinal mucosa that may affect the entire gastrointestinal tract GIT from the mouth to the anus There is discontinuous involvement of various portions of the GIT and may get complicated by formation of strictures abscesses or fistulas It closely resembles intestinal tuberculosis both clinically and on investigations GI tuberculosis is often suspected on the basis of its clinical radiological and endoscopic features but histological or microbiologic proof of the disease is often difficult to achieve Therefore the majority of patients are treated with antitubercular drugs on presumptive diagnosis only Similar clinical endoscopic radiological and histological features of GI tuberculosis and Crohn s disease pose a serious challenge to the treating physician The rate of misdiagnosis of these conditions using conventional diagnostic measures has been reported to be around 50 70% Thus differentiation and diagnosis of these conditions is difficult but very important for correct treatment of the patients Recently some serological tests have come up for diagnosing Crohn s disease and ulcerative colitis which may help to distinguish these disorders from each other and from GI tuberculosis Besides diagnosis treatment for IBD is also an emerging field in which active research is going on The traditional drugs used in treatment of IBD include steroids and aminosalicylates Recent studies have evaluated the role of azathioprine methotrexate and cyclosporine Apart from improving efficacy of therapy in short term these agents have raised debate on complications of therapy long term efficacy and cost Management of IBD during pregnancy and fistulising Crohn s disease are other areas of concern

Alcoholic Liver Disease - ECAB Philip Abraham,2009-09-15 Alcoholic liver disease involves an acute or chronic inflammation of liver occurring as a consequence of alcohol abuse The pathological changes occur in 3 stages namely fatty liver alcoholic liver disease and cirrhosis with the final stage traditionally considered to be irreversible Alcoholic liver disease is responsible for a significant number of premature deaths per annum all around the globe There is an urgent need to educate the masses about the hazards of alcohol abuse An efficient system to encourage and prolong the period of alcohol abstinence is the need of the hour The importance of lifestyle modifications like weight reduction and cessation of smoking in the progression of liver disease needs to be communicated to the patients and the medical community as well Moreover realization of the role of nutrition in the management and recovery of ALD would enhance the treatment strategies for this condition This book has been designed to update the readers on the important

aspects of ALD and is a step forward to enable the society in combating the social and economic losses that occur as a result of alcohol abuse The book has stressed upon various aspects of ALD like the role of nutrition epidemiology and pathogenesis and the possible therapeutic strategies involved Supportive case scenarios have also been incorporated with relevance to the topics covered under the book Overall the book presents to the readers an excellent compilation of clinically applicable literature sourced from the most acclaimed physicians in the country *ECAB Inflammatory Bowel Disease* B. S.

Ramakrishna,2014 *ECAB Inflammatory Bowel Disease* **Pancreatic Exocrine Insufficiency - ECAB** Pramod Kumar Garg,2010-09-29 The exocrine pancreatic function can be impaired by many different pancreatic disease as well as diseases that do not appear to be directly linked to the exocrine pancreas Hormones stimulating exocrine function e g CCK might be reduced in diseases affecting the intestinal mucosa IBD celiac disease AIDS resulting in decreased exocrine secretion The function of digestive enzymes might be affected by post cibal asynchrony or by a decreased intraduodenal pH as in Zollinger Ellison syndrome ZE An atrophy of pancreatic tissue might be caused by a lack of trophic factors as may occur in IDDM and pancreatic damage might occur due to drugs used for the treatment of other diseases While some of these conditions appear to be rather rare and of minor clinical relevance exocrine pancreatic involvement is very frequent in patients with diabetes mellitus The diagnosis of the condition can be made by the exploration of the exocrine pancreatic secretion which has been mainly used for the diagnosis of chronic pancreatitis and detection of pancreatic exocrine insufficiency of any etiology Thus diagnosis of the disease is classically based on the demonstration of either the morphological and or the functional changes that typically develop over time in the course of the disease Exocrine pancreatic function impairs progressively as chronic pancreatitis develops Thus exocrine pancreatic dysfunction refers to a mild moderate or severe reduction of the exocrine pancreatic secretion Finally pancreatic function becomes insufficient to maintain a normal digestive process Pancreatic exocrine insufficiency refers to the stage of maldigestion and malabsorption of nutrients as a consequence of a primarily and or secondarily impaired exocrine pancreatic function Pancreatic enzymes remain as the cornerstone for the effective treatment of various disease pathologies resulting in pancreatic exocrine insufficiency The rigid criteria set forth by the FDA in the USA will ensure that effective pancreatic enzyme preparations will be available and allow the clinician to successfully treat maldigestion malabsorption vitamin deficiencies protein calorie malnutrition and in selected patients the abdominal pain associated with chronic pancreatitis and PEI Pancreatic enzymes are particularly underused in chronic pancreatitis patients with PEI post gastric and intestinal surgery patients who develop an asynchrony of enzyme delivery to the intestine and pancreatic cancer patients Earlier use of potent pancreatic enzymes will enhance the quality of life for these patients This clinical update has been designed to update the readers on the important aspects of the pancreatic exocrine insufficiency resulting from different conditions and its impact on the patient The book has stressed upon the various aspects of the condition like its etiology diagnosis evaluation and management approach to the patient Overall the book presents to

the readers an excellent compilation of clinically applicable literature sourced from the most acclaimed physicians across globe

Primary Glomerular Diseases - ECAB Ramadas Pisharody, 2010-11-19 The basic functional unit of kidney is the glomerulus Any renal derangement at that level can lead to a multitude of diseases The renal as well as glomerular disorders secondary to other causes such as hypertension diabetes other vasculites drugs malignancies etc have been adequately addressed However the primary glomerular disorders due to an ambiguity regarding their genesis have yet to be explored properly Though these diseases are clubbed under the common head of primary they consist of various distinct subtypes with markedly different mechanisms of pathogenesis course of the disease response to treatment and prognoses This clinical update explores the various types of primary glomerular diseases with an aim to enhance the reader's knowledge and aid in timely recognition and precise diagnosis of glomerular diseases to help chart the appropriate treatment of each individual condition The first chapter elucidates the clinicopathological correlation of primary glomerular diseases to help differentiate them from each other and from other similar differential diagnoses without resorting to renal biopsy in all the cases The second third and fourth chapters explore the various aspects of Proliferative Glomerulonephritis Idiopathic Nephrotic Syndrome and Hereditary Glomerular Diseases The last chapter summarizes the clinically relevant current perspectives regarding the pathogenesis and treatment modalities of all the primary glomerular diseases This book will help the readers understand the intricacies of the aspects mentioned above and guide the practitioner to diagnose and manage Primary Glomerular Diseases with special reference to practical experience in India The authors have put together the most relevant facts about the disease for an easy comprehension and understanding of primary glomerular diseases by practitioners and students across the specialty

Autoimmune Diseases in Pediatric Gastroenterology Faruk Hadziselimovic, 2002-09-30 This book is the proceedings of the Falk Symposium No 127 on Autoimmune Diseases in Paediatric Gastroenterology IV International Falk Symposium on Paediatric Gastroenterology held in Basel Switzerland on November 8-9 2001 The symposium focused on the role of the immune system both the acquired and the innate systems in inflammatory bowel disease IBD in children and adolescents The innate system has an important fundamental role in host defence by initiating immune responses against potentially deleterious matter However a mutation within the innate system may elicit an immune response against the host hence an autoimmune response Chronic autoimmune hepatitis occurs predominantly in young people and especially in women Immunological changes are conspicuous Tissue antibodies are found in a large number of patients This is a disease of disordered immunoregulation marked by a deficit in suppressor T cells causing the production of autoantibodies against specific hepatocyte surface antigen Liver membrane protein is found in the sera of patients with autoimmune chronic acute hepatitis and with primary biliary cirrhosis PBC The latter condition of progressive granulomatous destruction of intrahepatic bile ducts is in many respects analogous to the graft versus host

syndrome where the immune system has become sensitized to foreign HLA molecules Primary sclerosing cholangitis PSC is another condition of unknown origin All parts of the biliary tree can be involved in a chronic fibrosing inflammatory process that results in obliteration of the biliary tree and ultimately in biliary cirrhosis About half of the patients also suffer from ulcerative colitis and rarely from Crohn's disease Circulating antibodies to some antigens are found in obstructed portal tracts as well as increased concentrations of biliary immune complexes in patients with PBC In all three previous Falk symposia on paediatric gastroenterology attention was focused on the role of the innate immune system in the aetiology of IBD It has become increasingly clear in recent years that the innate system has a much more important and fundamental role in host defence The decision to initiate an immune response is one of the major roles of the innate system Mutations within this system could transform it into becoming constitutively active resulting in an inflammatory reaction and thus eliciting an autoimmune response Following an introduction to the basic phenomena of autoimmunity the proceedings discuss clinical aspects of autoimmune diseases In particular current knowledge and the state of the art about the diagnosis and treatment of the autoimmune diseases of the gastrointestinal tract are described by world renowned experts The book also contains the short presentations on selected topics as well as abstracts of the mini posters read by title which were included in the symposium

web apr 15 2016 computational design is the application of computational strategies to the design process while designers traditionally rely on intuition and experience to solve design problems

introduction to computational design harvard graduate school of design - Sep 04 2023

web gsd6338 is an introductory course on computational design with particular focus on architecture landscape and urbanism in this course we will understand computational design as the set of methods borrowed from fields such as computer science mathematics and geometry applied to solving design problems

understanding computational design the ultimate guide - Aug 03 2023

web dec 29 2022 table of contents what is computational design defining computation types of computational design algorithmic design generative design design methodologies closely associated with computational design the application of computational design across industries examples of projects using computational

what is computational design constructible trimble inc - Oct 05 2023

web apr 21 2022 computational design is positioned to make a similar shift in the way we design by replacing codebooks with algorithms and human analysis with artificial intelligence computational design is an emerging design method set to change the landscape of our industry as we know it

computational design cmu school of architecture - Jul 02 2023

web the computational design cd program investigates creative opportunities and critical issues at the nexus of design and computation fundamentally interdisciplinary it mobilizes carnegie mellon university s computational strengths critically towards design architecture and other creative disciplines

computational design generative design primer - Jan 28 2023

web computational design computational design is not any one algorithm or off the shelf process you can utilize rather we describe it as an approach whereby a designer defines a series of instructions rules and relationships that precisely identify the steps necessary to achieve a proposed design and its resulting data or geometry crucially

computational design arts design architecture unsw sydney - Apr 30 2023

web computational design uses digital technologies to enhance and optimise design processes through algorithms and cutting edge technologies computational designers develop creative technical and aesthetic solutions to solve challenges of the 21st century why study computational design at unsw

computational design the future of how we make things is - Jun 01 2023

web sep 4 2018 while designers traditionally rely on intuition and experience to solve design problems computational design is a new design methodology that can literally produce hundreds or thousands of design permutations to find the absolute best solution to a problem the shifting roles of humans and computers

computational design in architecture defining parametric - Dec 27 2022

web jun 1 2020 this paper discusses computational design cd and proposes an improved and sound taxonomy for a set of key cd terms namely parametric generative and algorithmic design based on an extensive literature review from which different definitions by various authors were collected analyzed and compared previousarticlein issue

introduction to computational design subsets challenges in - Feb 26 2023

web dec 3 2021 computational design cd is not just automating existing traditional processes or tedious tasks it is about

shifting the way we think and design cd systems can be grouped into three main categories
