The Belle Époque Dominique Kalifa, 2021-07-06 The years before the First World War have long been romanticized as a zenith of French culture the Belle poque The era is seen as the height of a lost way of life that remains emblematic of what it means to be French In a vast range of texts and images it appears as a carefree time full of joie de vivre fanfare and frills artistic daring and scientific innovation The Moulin Rouge shared the stage with the Universal Exposition Toulouse Lautrec rubbed elbows with Marie Curie and La Belle Otero and Fant mas invented automatic writing This book traces the making and the imagining of the Belle poque to reveal how and why it became a cultural myth Dominique Kalifa lifts the veil on a period shrouded in nostalgia explaining the century long need to continuously reinvent and even sanctify this moment He sifts through images handed down in memoirs and reminiscences literature and film art and history to explore the many facets of the era including its worldwide reception The Belle poque was born in France but it quickly went global as other countries adopted the concept to write their own histories In shedding light on how the Belle poque has been celebrated and reimagined Kalifa also offers a nuanced meditation on time history and memory

Foundations of Information Literacy Natalie Greene Taylor, Paul T. Jaeger, 2021-11-15 It s not hyperbole to conclude that in today s world information literacy is essential for survival and success and also that if left unchecked the social

consequences of widespread misinformation and information illiteracy will only continue to grow more dire. Thus its study must be at the core of every education. But while many books have been written on information literacy, this text is the first to examine information literacy from a cross national, cross cultural and cross institutional perspective. From this book, readers will learn about information literacy in a wide variety of contexts including academic and school libraries, public libraries, special libraries and archives through research and literature that has previously been siloed in specialized publications. Come to understand why information literacy is not just an issue of information and technology but also a broader community and societal issue. Get an historical overview of advertising, propaganda, disinformation, misinformation and illiteracy. Gain knowledge of both applied strategies for working with individuals and for addressing the issues in community contexts. Find methods for combating urgent societal ills caused and exacerbated by misinformation and get tools and techniques for advocacy, activism and self reflection throughout one's career.

Making Spirit Matter Larry Sommer

McGrath, 2020-10-19 The connection between mind and brain has been one of the most persistent problems in modern Western thought. Even recent advances in neuroscience haven't been able to explain it satisfactorily. Historian Larry Sommer McGrath's *Making Spirit Matter* studies how a particularly productive and influential group of nineteenth and early twentieth century French thinkers attempted to solve this puzzle by showing the mutual dependence of spirit and matter. The scientific revolution taking place at this point in history across disciplines from biology to psychology and neurology located our mental powers in the brain and offered a radical reformulation of the meaning of society, spirit and the self. Tracing connections among thinkers such as Henri Bergson, Alfred Fouille, Jean Marie Guyau and others, McGrath plots alternative intellectual movements that revived themes of creativity, time and experience by applying the very sciences that seemed to undermine metaphysics and religion. *Making Spirit Matter* lays out the long legacy of this moment in the history of ideas and how it might renew our understanding of the relationship between mind and brain today.

[International Development](#) Corinna R.

Unger, 2018-09-06 *International Development: A Postwar History* offers the first concise historical overview of international development policies and practices in the 20th century. Embracing a long-term perspective, the book describes the emergence of the development field at the intersection of late colonialism, the Second World War, the onset of decolonization and the Cold War. It discusses the role of international organizations, colonial administrations, national governments and transnational actors in the making of the field and analyzes how the political, intellectual and economic changes over the course of the postwar period affected the understanding of and expectations toward development. By drawing on examples of development projects in different parts of the world and in different fields, Corinna R. Unger shows how the plurality of development experiences shaped the notion of development as we know it today. This book is ideal for scholars seeking to understand the history of development assistance and to gain new insight into the international history of the 20th century.

internationally conceived nature protection in its foundational years before the 1960s the decade when it launched from obscurity onto the global stage Raf De Bont studies a movement while it was still in the making and its groups were still rather small revealing the geographies of the early international preservationist groups their social composition self perception ethos and predilections their ideals and strategies and the natures they sought to preserve By examining international efforts to protect migratory birds the threatened European bison and the mountain gorilla in the interior of the Belgian Congo Nature s Diplomats sheds new light on the launch of major international organizations for nature protection in the aftermath of World War II Additionally it covers how the rise of ecological science the advent of the Cold War and looming decolonization forced a rethinking of approach and rhetoric and how old ideas and practices lingered on It provides much needed historical context for present day convictions about and approaches to the preservation of species and the conservation of natural resources the involvement of local communities in conservation projects the fate of extinct species and vanished habitats and the management of global nature

Order and Rivalry Madeleine Lynch Dungy, 2023-06-15 The First World War transformed the legal and geopolitical framework for international trade by decentring Europe in global markets Order and Rivalry traces the formation and development of multilateral trade structures in the aftermath of the First World War in response to the marginalization of Europe in the world economy the use of private commerce as a tool of military power and the collapse of empires across Central and Eastern Europe In this accessible study Madeleine Lynch Dungy highlights the 1920s as a pivotal transition phase between the network of bilateral trade treaties that underpinned the first globalization of the late nineteenth century and the institutionalised regime of international governance after 1945 Focusing on the League of Nations she shows that this institution s legacy was not to initiate a linear forward march towards today s World Trade Organization but rather to frame an open ended and conflictual process of experimentation that is still ongoing

Pursuing the Unity of Science Harmke Kamminga, Geert Somsen, 2016-05-20 From 1918 to the late 1940s a host of influential scientists and intellectuals in Europe and North America were engaged in a number of far reaching unity of science projects In this period of deep social and political divisions scientists collaborated to unify sciences across disciplinary boundaries and to set up the international scientific community as a model for global political co operation They strove to align scientific and social objectives through rational planning and to promote unified science as the driving force of human civilization and progress This volume explores the unity of science movement providing a synthetic view of its pursuits and placing it in its historical context as a scientific and political force Through a coherent set of original case studies looking at the significance of various projects and strategies of unification the book highlights the great variety of manifestations of this endeavour These range from unifying nuclear physics to the evolutionary synthesis and from the democratization of scientific planning to the utopianism of H G Wells s world state At the same time the collection brings out the substantive links between these different pursuits especially in the form of interconnected networks of unification and the alignment of objectives among them Notably it shows that opposition to fascism using the instrument of unified science

The First World War and the Mobilization of Biblical Scholarship Andrew Mein, Nathan MacDonald, Matthew A. Collins, 2019-02-07 This fascinating collection of essays charts for the first time the range of responses by scholars on both sides of the conflict to the outbreak of war in August 1914 The volume examines how biblical scholars like their compatriots from every walk of life responded to the great crisis they faced and with relatively few exceptions were keen to contribute to the war effort Some joined up as soldiers More commonly however biblical scholars and theologians put pen to paper as part of the torrent of patriotic publication that arose both in the United Kingdom and in Germany The contributors reveal that in many cases scholars were repeating or refining common arguments about the responsibility for the war In Germany and Britain where the Bible was still central to a Protestant national culture we also find numerous more specialized works where biblical scholars brought their own disciplinary expertise to bear on the matter of war in general and this war in particular The volume's contributors thus offer new insights into the place of both the Bible and biblical scholarship in early 20th century culture
