Information Systems Achieving Success By Avoiding Failure:

Information Systems Joyce Fortune, Geoff Peters, 2005-03-04 Despite people's best efforts information systems are particularly prone to failure. Some systems never materialize, others appear late and/or over budget and those that are implemented often fail to deliver the promised levels of performance. The consequences of these failures affect people throughout the organization concerned and beyond, sometimes to the point where they even threaten a company's future survival. They also damage the companies that develop and supply such systems. Worse still, the same types of problems occur again and again even though the most exhaustive methods are not able to ensure success. This book aims to help all those people involved with information systems to break that repeating pattern of failure. Using real life examples it introduces a sophisticated approach based around the notion of system to come to grips with the causes of actual and potential failure. It presents a model of a system capable of action without failure that can be used as a yardstick to judge existing and planned information systems and to suggest measures that need to be taken to achieve success. The examples used cover the public and the private sector and range in size from a nationwide system run by central government to an organization employing around 220 people.

Information Systems Foundations Dennis N. Hart, Shirley Diane Gregor, 2007-11-01 This volume contains the papers presented at the third biennial Information Systems Foundations Theory Representation and Reality Workshop held at The Australian National University in Canberra from 27-28 September 2006. The focus of the workshop was, as for the others in the series, the foundations of Information Systems as an academic discipline. The particular emphasis was, as in past workshops, the adequacy and completeness of theoretical underpinnings and the research methods employed. At the same time, the practical nature of the applications and phenomena with which the discipline deals were kept firmly in view. Accordingly, the papers in this volume range from the unashamedly theoretical in their focus, *Designing for Mutability in Information Systems Artifacts Towards a Unified Theory of Fit Task Technology and Individual*, to the much more practically oriented *An Action Centred Approach to Conceptualising Information Support for Routine Work*.

Information Systems Strategic Management Steve Clarke, 2007 This volume provides a guide to the strategic management of information systems within business and the public sector. It considers the need to manage information systems as a mixture of technical and social entities within a broader context.

Information Systems Development Jaroslav Pokorný, Václav Repa, Karel Richta, Wita Wojtkowski, Henry Linger, Chris Barry, Michael Lang, 2011-09-02 Information Systems Development Business Systems and Services Modeling and Development is the collected proceedings of the 19th International Conference on Information Systems Development held in Prague, Czech Republic, August 25-27, 2010. It follows in the tradition of previous conferences in the series in exploring the connections between industry research and education. These proceedings represent ongoing reflections within the academic community on established information systems topics and emerging concepts, approaches and ideas. It is hoped that the papers herein contribute towards disseminating research and improving practice.

Doherty,2014-01-21 The drive to realise operational efficiencies improve customer service develop new markets and accelerate the introduction of new products has substantially increased the complexity of field service operations To maximise the efficiency and effectiveness of these operations organisations have embarked on a wide range of transformation programmes that have sought to introduce automation through the use of workforce management technologies Despite the potential business value that can be provided by such transformation programmes too often the automation technologies have not been fully utilised and their expected benefits have as such not been realised Scholars of organisation change argue that the success of any transformation programme is a function of how well the technical political structural and social aspects of a specific project have been managed The objective of this edited book is to provide insights into how organisations might successfully transform their field service operations with the help of workforce management technologies Accordingly the book is organised into four sections Section A The Case for Transforming Service and Field Operations explains the rationale as to why organisations should actively consider transforming their service and field operations while Section B presents various Methods Models and Enabling Technologies for Transforming Service and Field Operations In Section C a number of Case Studies illustrate how new

technologies can be applied to field and service operations to deliver concrete business benefits Lastly Section D considers Challenges Outcomes and Future Directions Overall this book provides valuable insights into how to successfully transform field service operations with automated technologies It draws on years of experience from different industries and from different perspectives on realising change It is aimed at managers technologists change agents and scholars who are interested in field service operations in general and the use of advanced computing technologies in this area in particular

Storytelling and the Future of Organizations David M. Boje, 2011-04-26 Storytelling is part of social action and interaction that actually shapes the future of organizations Organization and management studies have overwhelmingly focused to date on rational narrative structures with beginnings middles and ends where narrative has proved to be a handy concept in qualitative studies Far less attention is given however to the more spontaneous and non staged storytelling that occurs in organizations Storytelling and the Future of Organizations explores the science and practice of antenarrative because that is how the future of organization is shaped Antenarrative is a term invented by David M Boje in 2001 and is defined as a bet on the future as before narrative linearity coherence and stability sets in Antenarrative is all about prospective sensemaking betting on the future before narrative retrospection fossilizes the past Antenarrative storytelling is therefore agential in ways that traditional narratology has yet to come to grips with This handbook contribution is bringing together a decade of scholarship on antenarrative It is the first volume to offer such a varied but systematic examination of non traditional narrative inquiry in the management realm organizing and developing its approach and providing new insights for management students and scholars
