

The background of the book cover is a dark, monochromatic image in shades of purple and magenta. It depicts a laptop computer with several papers or documents scattered around it, some overlapping the laptop. The lighting is dramatic, with strong highlights and deep shadows, creating a sense of depth and focus on the technology and documents.

Organizational and Social Perspectives on Information Technology Richard Baskerville, Jan Stage, Janice I. DeGross, 2013-03-14 The articles in this book constitute the proceedings papers from the IFIP WG 8.2 Working Conference IS2000 The Social and Organizational Perspective on Research and Practice in Information Technology held June 10-12 2000 in Aalborg Denmark The focus of the conference and therefore this book is on the basic aim of the working group namely the investigation of the interrelationships among four major components information systems IS information technology IT organizations and society This basic social and organizational perspective on research and practice in information technology may have evolved substantially since the founding of the group for example increasing the emphasis on IS development The plan for the conference was partially rooted in the early WG 8.2 traditions in which working conferences were substantially composed of invited papers For IS2000 roughly half of the paper presentations were planned to be invited the remaining half were planned to be double blind refereed in response to a Call For Papers Invited papers were single blind reviewed in order to provide the authors with pre publication feedback and comments along with the

opportunity to revise their papers prior to its final incorporation in this book *Information technology an organizations, strategies, networks and integration* ,1997 **Information Systems Theory** Yogesh K. Dwivedi,Michael R. Wade,Scott L. Schneberger,2011-09-21 The overall mission of this book is to provide a comprehensive understanding and coverage of the various theories and models used in IS research Specifically it aims to focus on the following key objectives To describe the various theories and models applicable to studying IS IT management issues To outline and describe for each of the various theories and models independent and dependent constructs reference discipline originating area originating author s seminal articles level of analysis i e firm individual industry and links with other theories To provide a critical review meta analysis of IS IT management articles that have used a particular theory model To discuss how a theory can be used to better understand how information systems can be effectively deployed in today s digital world This book contributes to our understanding of a number of theories and models The theoretical contribution of this book is that it analyzes and synthesizes the relevant literature in order to enhance knowledge of IS theories and models from various perspectives To cater to the information needs of a diverse spectrum of readers this book is structured into two volumes with each volume further broken down into two sections The first section of Volume 1 presents detailed descriptions of a set of theories centered around the IS lifecycle including the Success Model Technology Acceptance Model User Resistance Theories and four others The second section of Volume 1 contains strategic and economic theories including a Resource Based View Theory of Slack Resources PortfolioTheory Discrepancy Theory Models and eleven others The first section of Volume 2 concerns socio psychological theories These include Personal Construct Theory Psychological Ownership Transactive Memory Language Action Approach and nine others The second section of Volume 2 deals with methodological theories including Critical Realism Grounded Theory Narrative Inquiry Work System Method and four others Together these theories provide a rich tapestry of knowledge around the use of theory in IS research Since most of these theories are from contributing disciplines they provide a window into the world of external thought leadership **Organizational Dynamics of Technology-Based Innovation: Diversifying the Research Agenda** Tom McMaster,David Wastell,Elaine Ferneley,Janice I. DeGross,2007-08-08 This volume presents papers from the 10th Working Conference of the IFIP WG 8 6 on the adoption and diffusion of information systems and technologies It explores the dynamics of how some technological innovation efforts succeed while others fail The book looks to expand the research agenda paying special attention to the areas of theoretical perspectives methodologies and organizational sectors **Handbook of Research on Contemporary Theoretical Models in Information Systems** Dwivedi, Yogesh K.,Lal, Banita,Williams, Michael D.,Schneberger, Scott L.,Wade, Michael,2009-05-31 This book provides a comprehensive understanding and coverage of the various theories models and related research approaches used within IS research Provided by publisher **Enacting Research Methods in Information Systems: Volume 1** Leslie P. Willcocks,Chris Sauer,Mary C. Lacity,2016-05-30 This edited three volume

edition brings together significant papers previously published in the Journal of Information Technology JIT over its 30 year publication history. The three volumes of Enacting Research Methods in Information Systems celebrate the methodological pluralism used to advance our understanding of information technology's role in the world today. In addition to quantitative methods from the positivist tradition, JIT also values methodological articles from critical research perspectives, interpretive traditions, historical perspectives, grounded theory, and action research and design science approaches. Volume 1 covers Critical Research, Grounded Theory, and Historical Approaches. Volume 2 deals with Interpretive Approaches and also explores Action Research. Volume 3 focuses on Design Science Approaches and discusses Alternative Approaches including Semiotics, Research Complexity, Theory, and Gender in IS Research. The Journal of Information Technology JIT was started in 1986 by Professors Frank Land and Igor Aleksander with the aim of bringing technology and management together and bridging the great divide between the two disciplines. The Journal was created with the vision of making the impact of complex interactions and developments in technology more accessible to a wider audience. Retaining this initial focus, the JIT has gone on to extend into new and innovative areas of research such as the launch of JITTTC in 2010. A high impact journal, JIT shall continue to publish leading trends based on significant research in the field.

Managing Dynamic Networks
 Stefan Klein, Angeliki Poulymenakou, 2006-04-28. Collaboration of organizations reshapes traditional managerial practices and creates new inter-organizational contexts for strategy coordination and control, information and knowledge management. Heralded as organizational forms of the future, networks are at the same time fragile and precarious organizational arrangements which regularly fail. In order to investigate the new realities created by technology-enabled forms of network organizations and to address the emerging managerial challenges, this book introduces an integrative view on inter-firm network management. Centred on a network life cycle perspective, strategic, economic, and relational facets of business networking are explored. The network management framework is illustrated onto a broad range of European inter-firm network examples in various industries, rendering insights for new management practices.
