Information Technology For Manufacturing Information Technology For Manufacturing:

Information Technology for Manufacturing Kevin Ake, John Clemons, Mark Cubine, Bruce Lilly, 2003-11-24 This book presents a wide ranging view of the benefits available through the intelligent use of manufacturing information systems. Readers benefit from the authors' collective experience in bringing new information technologies into manufacturing companies. Using examples of actual IT implementations they provide a comprehensive picture of how to cut costs and add valuable new capabilities to IT projects. The book takes a comprehensive look at five major areas where IT systems can play a pivotal role in improving any company's manufacturing processes. Going beyond theory the authors show readers how they can ensure that their IT investments bring a real payback to their companies. Information Technology for Manufacturing Committee to Study Information Technology and Manufacturing, Computer Science and Telecommunications Board, National Research Council, 1995-03-13 This book describes a vision of manufacturing in the twenty first century that maximizes efficiencies and improvements by exploiting the full power of information and provides a research agenda for information technology and manufacturing that is necessary for success in achieving such a vision. Research on information technology to support product and process design, shop floor operations and flexible manufacturing is described. Roles for virtual manufacturing and the information infrastructure are also addressed. A final chapter is devoted to nontechnical research issues. qualitative and quantitative delineation of Jiangsu's position in this belt and its development strategy and the strategic position of Yangtze River Economic Belt in national development. It also illustrates the great significance of the initiation of Yangtze River Economic Belt for the economy, politics, environment and integration of natural resources. There is a research of the position of Jiangsu in the construction of the nation and the difficulties it has encountered. Coordinated and balanced development of Yangtze River Economic Belt will effectively facilitate reasonable allocation and exploitation of various resources, the implementation of other national strategies and communication and cooperation between China and Western countries, enhancing their mutual understanding. Therefore, common readers can get some general information from different perspectives and professionals can have a detailed understanding of different arrangements and guiding principles. It is thus suitable for different readers. Yangtze River Economic Belt runs through the three regions of China, making a vital latitudinal axis whose coordinated and balanced development is of great strategic importance for promoting coordinated and shared development of the three regions and for the spatial balance of population, economy and the environment. The current imbalance between them, the absolute disparity in regional development, the obstruction in the flow of resource factors, the inequality in development opportunities, the incoordination between regional economic growth and the bearing capacity of resources and environment, the fragmentation of regional economic policies, all contribute to the insufficient utilization of the Golden Waterway problems numerous. How coordinated and balanced development can be realized within this economic belt is a prominent and pressing, even a severe problem.
