Advanced Research and Design Tools for Architectural Heritage Stefania Stellacci, Danilo Giglito, Chiara Piccoli, 2024-07-31 Advanced Research and Design Tools for Architectural Heritage Unforeseen Paths rethinks how to analyse preserve and adapt Architectural Heritage and its surroundings along unforeseen paths using a broad spectrum of advanced research and design tools By delving into conceptual foundations and recent applications it transcends disciplinary boundaries and leverages advanced design tools such as space syntax natural language processing advanced photogrammetry heritage building information modelling and virtual reality This book offers a comprehensive collection of collaborative research studies by a team of scholars with diverse perspectives and digital expertise from long term projects Encompassing case studies and recent academic experiences the volume explores notable heritage sites in Europe Asia and Africa Readers are afforded a nuanced understanding of integrated tools through a forward looking approach By addressing critical heritage challenges the book contributes to reshaping architecture discourse and practice The chapters explore the integration of advanced methodologies to address emerging societal concerns making the book a valuable resource for architecture archaeology urban planning catering to

professors trainers and students Additionally its relevance extends to practitioners interested in cultural studies urban policies and data science including archivists representatives from public governmental authorities and policy stakeholders

Challenges in Mechanics of Biological Systems and Materials, Thermomechanics and Infrared Imaging, Time Dependent Materials and Residual Stress, Volume 2 Christian Franck, Karen Kasza, Jon Estrada, Rosa De Finis, 2025-08-07 Challenges in Mechanics of Biological Systems and Materials Thermomechanics and Infrared Imaging Time Dependent Materials and Residual Stress Volume 2 of the Proceedings of the 2023 SEM Annual Conference Exposition on Experimental and Applied Mechanics the second volume of five from the Conference brings together contributions to this important area of research and engineering The collection presents early findings and case studies on fundamental and applied aspects of Experimental Mechanics including papers in the following general technical research areas Advanced Thermographic Techniques for SHM AM Composites and Polymers Experimental Techniques in Biomechanics and Mechanobiology Inverse Methodologies and Uncertainties in the Identification of Residual Stresses Residual Stress IV Low Cost Thermographic Applications Multiscale Mechanics of Biological Materials NDE and Process Monitoring Residual Stress Thermomechanics Time Dependence in Porous and Soft Materials

Adhesive Bonding Robert D. Adams, 2021-07-02 Adhesive Bonding Science Technology and Applications Second Edition guides the reader through the fundamentals mechanical properties and applications of adhesive bonding This thoroughly revised and expanded new edition reflects the many advances that have occurred in recent years Sections cover the fundamentals of adhesive bonding explaining how adhesives and sealants work and how to assess and treat surfaces how adhesives perform under stress and the factors affecting fatigue and failure stress analysis environmental durability non destructive testing impact behavior fracture mechanics fatigue vibration damping and applications in construction automotive marine footwear electrical engineering aerospace repair electronics biomedicine and bonding of composites With its distinguished editor and international team of contributors this book is an essential resource for industrial engineers R D and scientists working with adhesives and their industrial applications as well as researchers and advanced students in adhesion joining polymer science materials science and mechanical engineering Offers detailed methodical coverage of the fundamentals mechanical properties and industrial applications of adhesive bonding Enables the successful preparation of adhesives for a broad range of important load bearing applications in areas such as automotive and aerospace construction electronics and biomedicine Covers the latest advances in adhesive bonding including improved repair techniques for metallic and composite structures cohesive zone modeling and disassembly and recycling

Fundamentals of Photonics Bahaa E. A. Saleh, Malvin Carl Teich, 2020-03-04 Fundamentals of Photonics A complete thoroughly updated full color third edition Fundamentals of Photonics Third Edition is a self contained and up to date introductory level textbook that thoroughly surveys this rapidly expanding area of engineering and applied physics Featuring a blend of theory and applications coverage includes detailed accounts of the primary theories of light including ray optics

wave optics electromagnetic optics and photon optics as well as the interaction of light and matter Presented at increasing levels of complexity preliminary sections build toward more advanced topics such as Fourier optics and holography photonic crystal optics guided wave and fiber optics LEDs and lasers acousto optic and electro optic devices nonlinear optical devices ultrafast optics optical interconnects and switches and optical fiber communications The third edition features an entirely new chapter on the optics of metals and plasmonic devices Each chapter contains highlighted equations exercises problems summaries and selected reading lists Examples of real systems are included to emphasize the concepts governing applications of current interest Each of the twenty four chapters of the second edition has been thoroughly updated

Non-Destructive Material Characterization Methods Akira Otsuki,Seiko Jose,Manasa Mohan,Sabu

Thomas,2023-09-01 Non Destructive Material Characterization Methods provides readers with a trove of theoretical and practical insight into how to implement different non destructive testing methods for effective material characterization The book starts with an introduction to the field before moving right into a discussion of a wide range of techniques that can be immediately implemented Various imaging and microscopy techniques are first covered with step by step insights on characterization using a polarized microscope an atomic force microscope computed tomography ultrasonography magnetic resonance imaging infrared tomography and more Each chapter includes case studies applications and recent developments From there elemental assay and mapping techniques are discussed including Raman spectroscopy UV spectroscopy atomic absorption spectroscopy neutron activation analysis and various others The book concludes with sections covering displacement measurement techniques large scale facility techniques and methods involving multiscale analysis and advanced analysis Provides an overview of a wide range of NDT material characterization methods strengths and weaknesses of these methods when to apply them and more Includes eddy current sensing and imaging ultrasonic sensing and imaging RF and THz imaging internet and cloud based methods among many others Presents case studies applications and other insights on putting these methods into practice

Failure Analysis Zheng-Ming Huang,Sayed Hemeda,2019 This book Failure Analysis covers a broadest sense failure to a narrowest sense one One purpose of this book is to provide the reader with an overall picture of various failures and how to deal with them Another purpose is to present the latest scientific advancements in this field For instance an innovative concept of true stresses is introduced and is shown to be necessary in dealing with a composite failure micromechanically

Optoelectronics for Low-Intensity Conflicts and Homeland Security Anil Maini,2018-11-30 This authoritative new resource provides an overview of the deployment of various devices in systems in actual field conditions and efficacy established in warfare The book covers laser and optronic technologies that have evolved over the years to build practical devices and systems for use in Homeland Security and low intensity conflict scenarios Readers will be able to assess combat and battle worthiness of various available devices and systems This book covers state of the art and emerging trends in various optoelectronics technologies having applications in Homeland Security

It provides information on operational aspects deployment scenarios and actual usage of laser and optoelectronics based technologies for low intensity conflicts offering insight into the utility of each technology device for a given operational requirement This book evaluates the merits of various laser and optoelectronic sensor based technologies intended for low intensity conflict operations including counter insurgency and anti terrorist operations It is a useful reference for those specializing in defense electronics and optronics and professionals in the defence industry involved in operation and maintenance of laser based security equipment Packed with tables photographs and a comprehensive list of references in every chapter this is the only book that covers all topics related to Laser and Optoelectronics devices intended for low intensity conflict operations in a single volume

Advances in Soft Computing and Machine Learning in Image Processing Aboul Ella Hassanien, Diego Alberto Oliva, 2017-10-13 This book is a collection of the latest applications of methods from soft computing and machine learning in image processing It explores different areas ranging from image segmentation to the object recognition using complex approaches and includes the theory of the methodologies used to provide an overview of the application of these tools in image processing The material has been compiled from a scientific perspective and the book is primarily intended for undergraduate and postgraduate science engineering and computational mathematics students It can also be used for courses on artificial intelligence advanced image processing and computational intelligence and is a valuable resource for researchers in the evolutionary computation artificial intelligence and image processing communities

Photonica 2015 Suzana Petrović, Goran Gligorić, Milutin Stepić, 2016-03-24

Computer Vision: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2018-02-02 The fields of computer vision and image processing are constantly evolving as new research and applications in these areas emerge Staying abreast of the most up to date developments in this field is necessary in order to promote further research and apply these developments in real world settings Computer Vision Concepts Methodologies Tools and Applications is an innovative reference source for the latest academic material on development of computers for gaining understanding about videos and digital images Highlighting a range of topics such as computational models machine learning and image processing this multi volume book is ideally designed for academicians technology professionals students and researchers interested in uncovering the latest innovations in the field

Canine Sports Medicine and Rehabilitation Chris Zink, Janet B. Van Dyke, 2018-02-21 Canine Sports Medicine and Rehabilitation This thoroughly revised and updated new edition offers a gold standard reference for all aspects of sports medicine and rehabilitation encompassing basic science and integrated veterinary and physical therapy approaches New chapters cover biological therapies working dogs and business management and every chapter has been extensively revised and expanded with state of the art information providing an even greater wealth of evidence expertise and experience to this complex discipline Presented in full color with illustrations and photographs throughout and real world case studies the book is a detailed yet practical guide ideal for the clinical setting
