Cartografía

Aeronáutica Facundo Conforti, Bienvenidos a una nueva entrega de la colección más exitosa de América. En esta decimocuarta entrega de HDIW abarcaremos uno de los temas más relevantes para el entrenamiento de piloto profesional de avión: dedicaremos nuestras páginas a la comprensión de la cartografía aeronáutica para vuelos IFR. La geografía de nuestro planeta es muy compleja y requiere un diseño personalizado para cada aeropuerto del mundo. Este concepto obliga a la cartografía aeronáutica a mantenerse actualizado constantemente y obliga a los pilotos a perfeccionarse en todo momento para una correcta comprensión de los procedimientos. Al igual que en el resto de la colección HDIW, los lectores encontrarán un camino simple y concreto para aprender uno de los temas más complejos de la carrera aeronáutica. Una nueva edición dedicada exclusivamente a pilotos profesionales que deseen comprender en su totalidad la cartografía aeronáutica que utilizan día a día.
