and Social Inequality Aline Courtois,2017-11-28 This book is the first significant sociological study of Ireland s elite private schools It takes the reader behind the gates of these secretive institutions and offers a compelling analysis of their role in the reproduction of social inequality in Ireland From the selection process to past pupils union events from the dorms to the rugby pitch the book unravels how these schools gradually reinforce exclusionary practices and socialize their students to power and privilege It tackles the myths of meritocracy and classlessness in Ireland while also providing keys to understanding the social practices and legitimacy of elites By bringing out the voices of past pupils parents and school staff and incorporating vivid ethnographic descriptions the book provides a rare snapshot into a privileged world largely hidden from view It offers a unique contribution to research on elite education as well as to the broader fields of sociology of education and inequality As such it will appeal to researchers practitioners and the general public alike in Ireland and beyond

Insider Trading in Developing Jurisdictions Wunmi Bewaji,2012-06-14 The book examines the regulation of insider dealing in the developed jurisdictions using three of the G7 countries as guides with the aim of knowing how they have regulated insider trading and what lessons can be learnt from their failures and achievements It looks at regulatory regimes in the US the UK and Japan in order to consider whether these regimes can be successfully transplanted to developing countries In order to explore insider dealing in the developing world the book focuses on Nigeria Africa s most populous nation and second largest economy This book examines in theoretical and empirical terms the law on insider trading away from the dogmatic approach of Western literature by presenting the subject from the prism of a developing jurisdiction in post colonial Africa with a divergent cultural historical social political and economic background The author analyses what shape insider dealing takes in Nigeria a predominantly illiterate society and considers the groups involved The books also explores how the concept of insider dealing regulation is understood amongst parties integral to its administration and enforcement such as lawyers judges stockbrokers and ordinary investors The legislation governing insider dealing regulation in Nigeria is critically examined to expose its strengths and weaknesses and to see how foreign provisions and legislation have been incorporated The book uses Nigerian experiences to consider its implications for other developing nations arguing that regulatory regimes need to take into account the specific social political historical and economic factors of a particular locale rather than importing regulations wholesale from developed jurisdictions

The Law and Practice of Expulsion and Exclusion from the United Kingdom Eric Fripp,Rowena Moffatt,Ellis Wilford,2014-12-04 Resort by the state to measures of exclusion and expulsion from the territory of the UK and or from British citizenship have multiplied over the past decade following the so called War on Terror increased globalisation and the growing politicisation of national policies concerning immigration and citizenship This book which focuses on the law and practice governing deportation removal and exclusion from the UK the denial of British citizenship and deprivation of that citizenship represents the first attempt by practitioners to provide a cohesive assessment of UK law and practice in these areas The undertaking is a vital one because whilst these areas of law and practice have long existed as the hard edge of immigration and nationality laws in recent years the use of some powers in this area has greatly increased and such powers have arguably expanded beyond secondary existence as mere mechanisms of enforcement The

body of law practice and policy created by this process is one which justifies treatment as a primary concern for public lawyers The book provides a comprehensive analysis of the law in these areas and its background This involves a consideration of interlocking international and regional rights instruments EU law and the domestic regime It is a clear and comprehensive everyday guide for practitioners and offers an invaluable insight into likely developments in this dynamic area of public law deserves to be on the bookshelves of all those who seek to practise within this carefully defined area of

Safety Simone van der Hof,Bibi van den Berg,Bart Schermer,2014-03-11 Ensuring online safety has become a topic on the regulatory agenda in many Western societies However regulating for online safety is far from easy due to the wide variety of

national and international private and public actors and stakeholders that are involved When regulating online risks for children it is important to strike the right balance between protection against harms on the one hand and safeguarding their fundamental freedoms and rights on the other The authors in this book attempt to grapple with precisely this theme striking the right balance between ensuring safety for children on the internet while at the same time enabling them to experiment to learn to enrich their lives to acquire skills and to have fun using this global network The authors come from various scientific disciplines ranging from law to social science and from media studies to philosophy This means that the book provides the reader with both empirical and theoretical conceptual chapters and sheds a multi disciplinary light on the complex topic of regulating online safety for children

Human Rights and Private Law Katja S Ziegler,2007-04-26 Privacy today is much debated as an individual s right against real or feared intrusions by the state as exemplified by proposed identity cards and surveillance measures in the United Kingdom In contrast invasions of privacy by private individuals or bodies tend to arouse less concern This book attempts to fill the gap by looking at the horizontal application of human rights after *Douglas v Hello* *Campbell v MGN* and *Caroline von Hannover v Germany* It provides a conceptual and theoretical framework and also considers specific particularly sensitive areas of law relating to privacy protection such as intellectual property employment and media law It provides comparative perspectives by relating Article 8 of the European Convention on Human Rights which serves as a focal point to UK Dutch German and European Communities law Several common threads are revealed running across jurisdictions and different areas of law and aspects of privacy The most notable is the definition of privacy in terms of the autonomy of the individual a notion associated with the liberal state in the classic sense but now acquiring more content as a human right also linked to ideas of social justice
