The Comic Book Paul Sassienie, 1994 The one essential guide for comic book fans everywhere

Framing Education Lars Wallner, 2019-01-22 Interest in comics as Swedish school material has risen in the last few years and the publication of comics for children and adolescents has also increased Meanwhile although research around new literacies has taken an interest in combinations of image and text there is still little research on comics as a literacy material especially as part of school practices With comics rise in popularity and their quality as examples of new literacies this points to the relevance of exploring how meaning making with comics is done in schools The purpose of this study is to contribute knowledge on how locally situated literacy practices are done practices in which pupils and teachers make meaning with comics The study combines literacy comics and discursive psychology to investigate aspects of literacy not as individual inner workings but as part of participants social constructions in line with New Literacy Studies With this perspective it is possible to investigate literary concepts such as narrative and participants construction of story elements through the way in which these aspects are utilized by participants to construct social action what participants do with their

utterances To study this video recordings have been made in one primary and one secondary school in two different Swedish cities The results of the study show constructions of a comics literacy where participants engage with both visual and textual aspects of the material and negotiate focalization of narrative perspective and construction of narrative structure as well as narrative devices such as speech and thought bubbles Furthermore meaning making of comics literacy also includes the construction of discourses around comics as a specific type of story telling either for material or literary reasons The thesis discusses how participants construct classroom literature and provides insight into how interaction around comics enables participants to construct and negotiate discourses around what comics literacy is and what it enables as well as how to talk about create and read comics

Intresset för serier som svenskt skolmaterial har stigit de senaste åren och publiceringen av serier för barn och ungdomar har också ökat Vår forskning om nya literaciers har intresserat sig för kombinationer av bild och text Det finns fortfarande lite forskning på serier som literacymaterial speciellt som en del av skolpraktik Med det stigande intresset för serier och deras kvaliteter som exempel på nya literaciers syftar detta mot att det finns en relevans i att utforska hur meningsskapande med serier går i skolan Syftet med denna studie är att bidra med kunskap om hur lokalt situerad literacypraktik går för elever och lärare skapar mening med serier Studien kombinerar forskning om literacy serier och diskursiv psykologi för att i linje med New Literacy Studies undersöka aspekter av literacy som en del av deltagarnas sociala konstruktioner inte som ett individuellt mentalt fenomen Med detta perspektiv är det möjligt att undersöka litterära koncept som narrativ och deltagares konstruktion av berättelseinslag genom det som på vilka dessa aspekter används av deltagare för att interagera vad deltagare gör när de ser något För att studera detta har videoobservationer används i en lågstadieskola och en högstadieskola i två olika svenska städer Resultaten från studien demonstrerar konstruktioner av serie literacy där deltagarna engagerar sig i både text och bild i materialet diskuterar berättandeperspektiv och konstruktioner av narrativ struktur såväl som berättarverktyg text prat och tankebubblor Därtill inkluderar serie literacy också deltagarnas skapande av seriediskurser där serier går till en specifik typ av berättande antingen på materiell eller litterär basis

Avhandlingen diskuterar hur deltagare konstruerar klassrumslitteratur och studien erbjuder en insikt i hur interaktion runt serier möjliggör för deltagare att konstruera och förhandla diskurser om vad serieliteracy är och vad det erbjuder för möjligheter såväl som hur deltagare kan prata om skapa och läsa serier

Where a Glance is an action Daniel Björklund-Flärd, 2024-11-12 Drivers rely on vision to navigate and interplay with other road users However the experienced drivers use of vision differs considerably from the novices with the former having developed what is essentially a professional vision Goodwin 1994 This compilation thesis seeks to investigate how the ability to see and act in methodic ways is taught and learned in driver training It takes a special interest in trajectories of learning as displayed in and through participants interaction Study I shows how the mirror routine a standard procedure for visually checking the car's

surroundings is taught and practiced during training The analysis demonstrates the intractability of instructions and the prospective retrospective character of members procedures for sensemaking as proposed by Garfinkel 1967 Study II shows how the blind spot check essentially a component of the mirror routine is introduced and later practiced during driving lessons Results revealed how instructions are not only sensitive to changes in the surrounding but also to the trainee s developing levels of competence Study III investigates participants work of establishing joint vision when deciding on an action point for an upcoming maneuver It shows how seeing as a social phenomenon is an achievement that may require interactional work and coordination of embodied sensorial practices The participants orientation to the trainee drivers progression can be seen in different ways of orienting to learning as shared interactional history as mutual orientation displayed through explicitly oriented talk and as changing participation in an ongoing activity Becoming a member driver in the community of road users involves a perceptual restructuring of the world as perceived through one s senses Nishizaka 2006 Sensoriality may thus be seen as crucial to processes of learning In order to develop necessary skills for looking and seeing in traffic trainee drivers should be given ample opportunity to practice those skills in the setting where the instructed practice will actually be produced

Official Gazette of the United States Patent and Trademark Office, 1996 Alan Moore, Out from the Underground Maggie Gray, 2017-11-01 This book explores Alan Moore s career as a cartoonist as shaped by his transdisciplinary practice as a poet illustrator musician and

playwright as well as his involvement in the Northampton Arts Lab and the hippie counterculture in which it took place. It traces Moore's trajectory out from the underground comix scene of the 1970s and into a commercial music press rocked by the arrival of punk. In doing so it uncovers how performance has shaped Moore's approach to comics and their political potential. Drawing on the work of Bertolt Brecht who similarly fused political dissent with experimental popular art, this book considers what looking strangely at Alan Moore as cartoonist tells us about comics, their visual and material form and the performance and politics of their reading and making.
