Classical Economics Heinz Kurz, Neri Salvadori, 2014-08-07 The financial crisis and the economic crisis that followed triggered a crisis in the subject of economics as it is typically being taught today especially in macroeconomics and related fields A renewed interest in earlier authors especially the classical economists from Adam Smith to David Ricardo and John Maynard Keynes developed This book may also be seen as a response to this interest What can we learn from the authors mentioned what we could not learn from the mainstream This volume contains a selection of essays which deepens and widens the understanding of the classical approach to important problems such as value and distribution growth and technical progress and exhaustible natural resources It is the fourth collection in a row and reflects an on going discussion of the fecundity of the classical approach A main topic of the essays is a comparison between the classical approaches with modern theory and thus an identification of what can be learned by elaborating on the ideas of Smith and Ricardo and Marx above and beyond and variously in contradiction to certain mainstream view Since the work of Piero Sraffa spurred the revival of classical economic thought his contributions are dealt with in some detail The attention then focuses on economic growth and the treatment of exhaustible resources within a classical framework of the analysis Revisiting The Tempest Silvia Bigliazzi, 2014-02-20 Revisiting The Tempest offers a lively reconsideration of how The Tempest encourages interpretation and creative appropriation It includes a wide range of essays on theoretical and practical criticism focusing on

the play's original dramatic context on its signifying processes and its present time screen remediation TRICK OR TREAT

Rabban, 2013 This is a study of the central role of history in late nineteenth century American legal thought In the decades following the Civil War the founding generation of professional legal scholars in the United States drew from the evolutionary social thought that pervaded Western intellectual life on both sides of the Atlantic Their historical analysis of law as an inductive science rejected deductive theories and supported moderate legal reform conclusions that challenge conventional accounts of legal formalism Unprecedented in its coverage and its innovative conclusions about major American legal thinkers from the Civil War to the present the book combines transatlantic intellectual history legal history the history of

Carlos never seen without his cigarette or tie American Standard Cheap Trick from the Bars to the Budokan and Beyond tells the unlikely story of the band's path to greatness from their origins in Rockford Illinois to their massively successful live album At Budokan to the many many ups and downs that followed This is a rollicking tale of artistic genius rock excess hilarious misbehavior chance encounters with music's biggest names and international stardom that brought new meaning to the phrase big in Japan Drawing on exhaustive research and interviews American Standard gives an intimate look at a truly original band whether you consider them rock icons or criminally underrated The Colonizing Trick David Kazanjian, 2003 An illuminating look at the concepts of race nation and equality in eighteenth and nineteenth century America The idea that all men are created equal is as close to a universal tenet as exists in American history In this hard hitting book David Kazanjian interrogates this tenet exploring transformative flash points in early America when the belief in equality came into contact with seemingly contrary ideas about race and nation The Colonizing Trick depicts early America as a white settler colony in the process of becoming an empire one deeply integrated with Euro American political economy imperial ventures in North America and Africa and pan American racial formations Kazanjian traces tensions between universal equality and racial or national particularity through theoretically informed critical readings of a wide range of texts the political writings of David Walker and Maria Stewart the narratives of black mariners economic treatises the personal letters of Thomas Jefferson and Phillis Wheatley Charles Brockden Brown's fiction congressional tariff debates international treaties and popular novelettes about the U S Mexico War and the Yucatan's Caste War Kazanjian shows how emergent racial and national formations do not contradict universalist egalitarianism rather they rearticulate it making equality at once restricted formal abstract and materially embodied Cambridge Revisited Arthur B.
