Green Philosophy How To Think Seriously About The Planet:

Green Philosophy Roger Scruton, 2013 Roger Scruton is one of Britain's most respected thinkers and in this new book he offers a radically different solution to the planet's most important problem *Designing Sustainability* Stuart Walker, 2014-05-09 What is the relationship between design sustainability inner values and spirituality How can we create designs that provide a convincing alternative to unsustainable interpretations of progress growth consumerism and commercialism Building on the arguments first advanced in his widely acclaimed books *Sustainable by Design* and *The Spirit of Design* Stuart Walker explains how we can achieve the systemic changes needed to address the challenges of sustainability Challenging common assumptions about the nature of our contemporary material culture and its relationship to human flourishing the author introduces approaches to design that draw inspiration from nature summon the human imagination and create outcomes which are environmentally responsible and socially just as well as meaningful and enriching at a personal level Offering a unique and original contribution to this vital debate *Designing Sustainability* is destined to become essential reading for students on courses in design and sustainability and for design practitioners looking for a deeper more meaningful basis for their work *How Nature Matters* Simon P. James, 2022 *How Nature Matters* presents an original theory of nature's value based on part whole relations In so doing it solves the difficult problem of how we should conceptualize nature's cultural values The standard practice of framing them in terms of the provision of cultural ecosystem services is shown to be inadequate When natural things have cultural value they do not have it as service providers that is as means to valuable ends They have it as parts of valuable and meaningful wholes as parts of traditions narratives and cultural identities James develops his theory by investigating twelve real world cases concerning amongst other things the contentious practice of dugong hunting and the religious significance of the site where the Buddha is said to have become enlightened He also analyses some cutting edge policy related topics such as the debate surrounding the concept of relational value and takes a stand on various foundational issues in environmental philosophy including the question of whether anything on earth qualifies as natural This accessible engagingly written book will be essential reading for all those who wish to understand the moral and metaphysical dimensions of environmental issues *Ethics Matters* Charlotte Vardy, 2012 Peter Vardy is one of the leading moral educators in the UK His books are on many reading lists for Sixth Formers and undergraduates The *Puzzle* books aim to make topics in Religious Studies Philosophy and Ethics accessible to the schools undergraduate and general markets The *Puzzle* books are simply structured and clearly written and reflect students needs with regard to exam specifications Part I of *The Puzzle of Moral Philosophy* provides a comprehensive introduction to ethical theory and some of its key thinkers such as Plato Kant Bentham and Mill Part II introduces a number of topics frequently studied on A level and undergraduate syllabuses including human relationships law and justice and the ethics of death and dying **The Conservative Effect, 2010-2024** Anthony Seldon, Tom Egerton, 2024-06-27 After fourteen

years of Conservative government we rightly ask what changed for the better or worse during this prolonged period of power. The country experienced significant challenges including austerity, Brexit and Covid, did they militate against the government's making more lasting impact? Bringing together some of the leading authorities in the field, this book examines the impact of Conservative rule on a wide range of economic, social, foreign and governmental areas. Anthony Seldon, Tom Egerton and their team uncover the ultimate Conservative effect on the United Kingdom. With powerful insights and fresh perspectives, this is an intriguing study for anyone seeking to understand the full scope of the Conservative government's influence on our nation. Drawing the immediate lessons from the last fourteen years will be pivotal if the country is to rejuvenate and flourish in the future.

A Pilgrimage of Paradoxes Mark Clavier, 2021-12-30 Winner of the 2022 Nautilus Book Award in Religion. Spirituality of Western Thought 24B. Mark Clavier examines a series of paradoxes that lie at the heart of Christian faith: eternity and time, silence and words, and wonder and the commonplace. In an intellectual reflection on an overnight trek on Cadair Idris in Wales and other wilderness walks, he explores the oft-hidden connections between faith, society and nature. Each reflection ranges widely through history, folklore, poetry, philosophy and theology to consider what these paradoxes can teach us about God, ourselves and our world. Drawing on the recent upsurge in interest in the personal experience of landscapes and memory, this book invites readers to walk with Clavier in the Appalachians, Norway, Iceland, the Alps and around Britain as he discovers the ways in which Christianity is profoundly earthed. By weaving together nature writing, memoir, social commentary and theological reflection, *A Pilgrimage of Paradoxes* uses a memorable mountain journey in the ancient landscape of Wales to draw readers into reflecting about what it means to belong. Design for Life Stuart Walker, 2017-04-21. Stuart Walker's design work has been described as life-changing, inspiring, disturbing and ferocious. Drawing on an extraordinarily diverse range of sources and informed by creative practice, *Design for Life* penetrates to the heart of modern culture and the malaise that underlies today's moral and environmental crises. The author argues that this malaise is deep-seated and fundamental to the modern outlook. He shows how our preoccupation with technological progress, growth and the future has produced a constricted view of life, one that is both destructive and self-reinforcing. Based on over twenty-five years of scholarship and creative practice, he demonstrates the vital importance of solitude, contemplation, inner growth and the present moment in developing a different course, one that looks squarely at our current precarious situation while offering a positive, hopeful way forward, a way that is compassionate, context-based, human-scale, ethically motivated and critically creative. *Design for Life* is an intensely original contribution that will be essential reading for design practitioners and students. Written in a clear, accessible style, it will also appeal to a broader readership, especially anyone who is concerned with contemporary society's rising inequalities and environmental failings and is looking for a more constructive, balanced and thoughtful direction.

The Oxford Handbook of Environmental Political Theory Teena Gabrielson, Cheryl Hall, John M. Meyer, David

Schlosberg,2016-01-07 Set at the intersection of political theory and environmental politics yet with broad engagement across the environmental social sciences and humanities The Oxford Handbook of Environmental Political Theory defines illustrates and challenges the field of environmental political theory EPT Featuring contributions from distinguished political scientists working in this field this volume addresses canonical theorists and contemporary environmental problems with a diversity of theoretical approaches The initial volume focuses on EPT as a field of inquiry engaging both traditions of political thought and the academy In the second section the handbook explores conceptualizations of nature and the environment as well as the nature of political subjects communities and boundaries within our environments A third section addresses the values that motivate environmental theorists including justice responsibility rights limits and flourishing and the potential conflicts that can emerge within between and against these ideals The final section examines the primary structures that constrain or enable the achievement of environmental ends as well as theorizations of environmental movements citizenship and the potential for on going environmental action and change *Education, Nature, and Society* Stephen

Gough,2014-11-20 Environmental issues continue to divide opinion sometimes in extreme ways Almost everyone agrees that education has a role to play in ensuring the future of humanity on Earth Some think we should all learn to leave a minimal environmental footprint others argue that education should promote economic growth because only growth can generate the capital needed to develop solutions to environmental problems Advocates on each side often find the views of their opponents simply incredible giving rise to accusations of bad faith or poor science This book explores the foundations of the debate by examining human interrelations with Nature It takes an educational perspective but also draws on evidence from anthropology economics ecology policy sciences and natural history The case presented is that any coherent view of the purposes and potential of education requires a theory of human society in the natural world For such a theory education and more broadly learning must be more than an instrument for the achievement of personal or policy goals Rather it is an integral continuing and necessary component of personal and policy development On this basis a novel approach to curriculum design and implementation is outlined *Ecopsychology* Darlyne G. Nemeth,Robert B. Hamilton,Judy

Kuriansky,2015-09-09 This anthology is a two volume work that focuses on our relationship with the Earth and our future examining the crossover between psychology and environmental studies in the emerging fields of ecopsychology and environmental psychology This set offers the first comprehensive and holistic understanding of how our human activities are very rapidly changing the earth s environment and harming its inhabitants Since our present path of population growth and use of finite global resources is unsustainable we must find new ways to protect our environment and our future Offering unique perspectives and guidance toward holistic new solutions this reader friendly anthology serves a vast audience in the fields of psychology and environmental studies as well as scientists humanitarians educators and policymakers This work presents readers with the latest research on psychology and the environment gives examples from around the world applies

to programs for youth and adults and appeals to all stakeholders including those in public health policy environmental studies and more The reader will gain the perspective and understanding of policies needed to effect environmental change and holistically manage the direction of that change *Climate Change and the Nation State* Anatol Lieven,2020-03-02

Climate Change and the Nation State is the first book to tie the issue of action against climate change to nationalism Anatol Lieven argues that commitment to the future of the nation is the only way in which populations can be motivated to accept the sacrifices necessary to combat climate change National security establishments should prioritize climate change rather than lesser threats from rival powers Lieven supports the idea of a Green New Deal for both gaining public support for climate change action and building the national resilience but argues that it should be recalibrated to appeal to national unity and solidarity *Managing Environmental Risks through Insurance* Katarzyna Malinowska,Dorota Maśniak,2024-04-08

This book identifies the role of insurance in a comprehensive system for managing environmental risks at the local regional and global level National and international legal instruments regulating environmental protection especially aspects like pollution are not precisely reflected in insurance concepts intended to cover environmental risks As such there is a need to identify environmental risks and to propose a taxonomy of environmental risks for various types of insurance coverage The authors refer to the issues of liability in environmental protection the scope of insurance coverage and comment on specific issues the importance of which has been noticed by the legislator or insurance practice The book examines these issues horizontally and vertically from various standpoints focusing on insurance as a means of managing environmental risks In this regard it mainly concentrates on 1 identifying and analyzing environmental risks and methods for managing them via private and public instruments and 2 insuring these risks The book is intended for all those interested in the field of insurance and environmental risk regimes including lawyers academics and legal professionals *Far-Right Ecologism* Balša Lubarda,2023-08-01

Far Right Ecologism explains how the ongoing mainstreaming of the far right has prompted greater engagement with a range of topics including the environment Behind the facade of vote winning strategies the far right has provided a substantive ideological engagement with the natural environment Building on the nationalist bent of early green thought and the perceived nexus of pristine nature and cultural purity Far Right Ecologism has ideologically adopted the green elements of other ideologies such as conservatism and fascism but also of those considered to be thin centred such as nationalism and populism Through an authentic experience of learning from the Eastern European post socialist realms this book explores the ideology ecological discourse and policy proposals behind the increasing impact of far right actors on environmental politics in Hungary and Poland Each chapter begins with stories from the interviewees to illustrate how the far right in Hungary and Poland attempts to permeate environmental politics and even forge partnerships with green actors through specific local based policy contributions Drawing on the findings from a range of sources such as electoral programs ideological texts and manifestos social media and public speeches policy proposals and more than 40 in depth interviews with

far right representatives this book also assesses epistemological and methodological challenges in examining the environmental dimension of far right post socialist politics This book will be valuable reading for researchers with an interest in the far right environmental politics and Central Eastern Europe **Affluence and Freedom** Pierre

Charbonnier,2021-06-22 In this pathbreaking book Pierre Charbonnier opens up a new intellectual terrain an environmental history of political ideas His aim is not to locate the seeds of ecological thought in the history of political ideas as others have done but rather to show that all political ideas whether or not they endorse ecological ideals are informed by a certain conception of our relationship to the Earth and to our environment The fundamental political categories of modernity were founded on the idea that we could improve on nature that we could exert a decisive victory over its excesses and claim unlimited access to earthly resources In this way modern thinkers imagined a political society of free individuals equal and prosperous alongside the development of industry geared towards progress and liberated from the Earth s shackles Yet this pact between democracy and growth has now been called into question by climate change and the environmental crisis It is therefore our duty today to rethink political emancipation bearing in mind that this can no longer draw on the prospect of infinite growth promised by industrial capitalism Ecology must draw on the power harnessed by nineteenth century socialism to respond to the massive impact of industrialization but it must also rethink the imperative to offer protection to society by taking account of the solidarity of social groups and their conditions in a world transformed by climate change This timely and original work of social and political theory will be of interest to a wide readership in politics sociology environmental studies and the social sciences and humanities generally Bonhoeffer's Christocentric Theology and Fundamental Debates in Environmental Ethics Steven C. van den Heuvel,2017-05-04

There is widespread understanding of the close connection between religion and the ecological crisis and that in order to amend this crisis theological resources are needed This monograph seeks to contribute to this endeavor by engaging the theology of Dietrich Bonhoeffer His theology is particularly suitable in this context due to its open ended nature and to the prophetic and radical nature of the questions he was prepared to ask that is why there are many other attempts to contextualize Bonhoeffer s theology in areas that he himself has not directly written about In this monograph Steven van den Heuvel first of all addresses the question of how to translate Bonhoeffer s theology in a methodologically sound way He settles on a modified form of the general method of correlation Then secondly van den Heuvel sets out to describe five major concepts in Bonhoeffer s work bringing these into critical interplay with discussions in environmental ethics and eco theology In making the correlations he thoroughly describes each concept situating it in the historic and intellectual background of Bonhoeffer s time He then transposes these concepts to contemporary environmental ethics describing what contribution Bonhoeffer s theology can make *Disasters Without Borders* John Hannigan,2013-04-17 Dramatic scenes of devastation and suffering caused by disasters such as the 2011 Japanese earthquake and tsunami are viewed with shock and horror by millions of us across the world What we rarely see

however are the international politics of disaster aid mitigation and prevention that condition the collective response to natural catastrophes around the world In this book respected Canadian environmental sociologist John Hannigan argues that the global community of nations has failed time and again in establishing an effective and binding multilateral mechanism for coping with disasters especially in the more vulnerable countries of the South Written in an accessible and even handed manner Disasters without Borders it is the first comprehensive account of the key milestones debates controversies and research relating to the international politics of natural disasters Tracing the historical evolution of this policy field from its humanitarian origins in WWI right up to current efforts to cast climate change as the prime global driver of disaster risk it highlights the ongoing mismatch between the way disaster has been conceptualised and the institutional architecture in place to manage it The book s bold conclusion predicts the confluence of four emerging trends politicisation militarisation catastrophic scenario building privatisation of risk and quantification which could create a new system of disaster management wherein insurance logic will replace humanitarian concern as the guiding principle Disasters Without Borders is an ideal introductory text for students lecturers and practitioners in the fields of international development studies disaster management politics and international affairs and environmental geography sociology **The Significance of Borders**

Thierry Baudet, 2012-05-25 For almost three quarters of a century the countries of Western Europe have abandoned national sovereignty as an ideal Nation states are being dismantled by supranationalism from above by multiculturalism from below This book explains why supranationalism and multiculturalism are in fact irreconcilable with representative government and the rule of law It challenges one of the most central beliefs in contemporary legal and political philosophy which is that borders are bound to disappear **A Political Theology of Climate Change** Michael S. Northcott, 2013-11-30 Cover

Fischer, 2021-03-17 The Power of Responsive Educational Leadership examines how educational leaders might respond to global challenges such as the environment technology inequity the health crisis and the stability of democracy It draws on models of educational leadership and development projects from around the world to explore how leaders might use the curriculum and teaching to help move their communities regions and countries in positive directions The authors argue that educational leadership needs to move away from authoritarian or transactional bureaucracy and toward leadership in a participatory mode that feels responsible for the children and adults in their institution and responsible for the society they all inhabit The Power of Responsive Educational Leadership Offers a comprehensive exploration of the multifaceted nature of leadership for learning Charts the key thinking and practices that engage with the principles of leadership for learning and the implications these have Provides

Eschatology as Imagining the End Sigurd Bergmann, 2018-06-14 As society becomes more concerned with the future of our planet the study of apocalypse and eschatology become increasingly pertinent Whether religious or not peoples views on this topic can have a profound effect on their attitudes to issues such as climate change and social justice and so it cannot be ignored This book investigates how different approaches in historical and contemporary Christian theology make sense in reflecting about the final things or the eschata and why it is so important to consider their multi faceted impact on our lives A team of Nordic scholars analyse historical and contemporary eschatological thinking in a broad range of sources from theology and other related disciplines such as moral philosophy art history and literature Specific social and environmental challenges such as the Norwegian Breivik massacre in 2011 climatic change narratives and the ambiguity of discourses about euthanasia are investigated in order to demonstrate the complexity and significance of modes of thinking about the end times This book addresses the theology of the end of the world in a more serious academic tone than it is usually afforded As such it will be of great interest to academics working in eschatology practical theology religious studies and the philosophy of religion
