Kesharwani,Raj K.

Keservani,Anil K. Sharma,2023-01-01 This book provides valuable coverage on various immunomodulatory research associated with nutraceutical studies from plant to animal and marine sources The book focuses on the various properties of nutraceutical and functional foods from dietary fibers to fungus marine sources ginseng and several others Its content is also dedicated to the nutraceutical potential and applications of these modulators The first section of this book focuses mainly on the recent developments in nutraceutical and functional food associated with various immunomodulators The next section covers the micronutrients and macronutrients level in order to share important data and help readers gain a basic understanding of the techno functional nutraceutical potential and applications of nutritional treatment under specific disease conditions A detailed overview providing the structural and functional properties related to immunomodulators will be highly beneficial for academics and advanced level students in immunology food science clinical medicine and life sciences **Advanced Pharmaceutical and Herbal Nanoscience for Targeted Drug Delivery Systems Part II**

Swarnlata Saraf,Ram Kumar Sahu,Vivek Dave,2022-05-30 This 2 part reference informs readers about the application of drug delivery technologies to herbal medicines Chapters cover a broad range of major topics on the subject of targeted drug delivery systems These topics include the application of drug delivery systems for herbal nanomedicines drug development issues emerging technologies adaptations for clinical use market prospects and challenges of industrial commercialization Chapters have been contributed by several experts in pharmaceutical chemistry and blend theoretical knowledge with practical aspects of drug delivery Part II covers the following topics Pharmaceutical nanosciences and their application in the delivery of various phytoconstituents Design of cosmeceutical drug delivery systems the role of nanotechnology in cosmeceuticals Transfersomes a novel vesicular transdermal delivery system Self nano micro emulsified drug delivery systems Phytosomes The role of nanomedicines in ocular drug delivery systems Colloidosomes as an efficient novel drug delivery system an update Herbal nanoscience challenges and regulatory perspectives Vitamins based nanomedicine approach Dendrimers a versatile nanoplatform for advanced targeting and bioactive s delivery Targeted drug delivery systems for cells and cell organelles Liposomes for herbal drug delivery AI in pharmacy herbal medicine and drug delivery sci fi or reality This reference is a valuable resource for scholars that creates awareness of novel drug delivery systems as well as their promising applications in drug targeting and nanotherapeutics for specific diseases **Foods and Dietary**

**Supplements in the Prevention and Treatment of Disease in Older Adults** Ronald Ross Watson, 2015-01-27 Foods and Dietary Supplements in the Prevention and Treatment of Disease in Older Adults focuses on the ways in which food and dietary supplements affect the major health problems of aging adults. Researchers in nutrition, diet, epidemiology, and aging studies, as well as healthcare providers who work with elderly patients, will use this comprehensive resource as a tool in their long-term goal of preventing and treating chronic disease within the elderly. This book brings together a broad range of experts working on the different aspects of foods and dietary supplements: vitamins, herbs, plant extracts, etc. in health promotion and disease prevention. They have contributed chapters which define a range of ways in which foods, nutraceuticals, and dietary supplements prevent disease and promote health in older adults. They begin by reviewing the medicinal role of foods, herbal, and dietary supplements in health promotion in older adults, as well as some of the most commonly used supplements in elder self-medication. They review the most recent studies of how foods, herbal, and dietary supplements are effective in the prevention and treatment of cancer, cardiovascular disease, diabetes, and other obesity-associated diseases in older adults. Then they consider alcohol, other drugs, and plant-based drugs of abuse which can adversely affect the health of older adults. Lastly, they consider foods and dietary supplements in gene regulation in older adults. Investigates the important nutritional requirements of the aging population in health and in relation to various acute and chronic diseases. Explores the nutritional effects of botanical extracts and components that can have important health promotion benefits and risks to ensure safe consumption. Reviews studies of common diseases within the aging population, including cancer, cardiovascular, metabolic, and infectious diseases that can alter the intake of foods, supplements, and/or requirements for various nutrients. Investigates the mechanisms of action of components of foods and dietary supplements in particular gene activation and epigenetics.

*Phytoceuticals in Food for Health and Wellness* Tanmay Sarkar, Slim Smaoui, Wing-Fu Lai, 2025-09-01 *Phytoceuticals in Food for Health and Wellness: Harnessing Plant Therapeutics* emphasizes the growing interest of the potential health benefits of phytochemicals in wellness and product development by uncovering innate bioactive compounds found in plants. Highlighting the diverse classes of phytochemicals, including flavonoids, carotenoids, polyphenols, antioxidants, and alkaloids, the book explores the sources, chemical structures, and distribution in various plants and what role they play in nutrition and disease prevention. Phytoceutical and phytochemical approaches targeting immunity, obesity, cancer, respiratory, gut, cardiovascular, and eye health, and more, will be discussed through traditional and modern extraction methods. *Phytoceuticals in Food for Health and Wellness: Harnessing Plant Therapeutics* also demonstrates how plant bioactives can be used for fortifying foods for optimal nutrition, innovating in product development, and developing the use of phytochemicals in culinary and food manufacturing applications to maximize flavor and extend shelf life. Discusses plant-based compounds and

their role in food health and disease Explores distribution of flavonoids carotenoids and phenolic compounds for optimal bioactive content Provides insights to plant antioxidant anti inflammatory anticancer and neuroprotective properties Explains interactions between phytochemicals and the human body Integrates phytochemicals into culinary practices for flavor enhancement and functional food development Evidence-Based Validation of Herbal Medicine Pulok K.

Mukherjee,2022-07-12 Evidence Based Validation of Herbal Medicines Translational Research on Botanicals brings together current thinking and practice in the characterization and validation of natural products The book describes different approaches and techniques for evaluating the quality safety and efficacy of herbal medicine particularly methods to assess their activity and understand compounds responsible and their probable underlying mechanisms of action This book brings together the views expertise and experiences of scientific experts in the field of medicinal plant research hence it will be useful for researcher who want to know more about the natural lead with their validation and also useful to exploit traditional medicines Includes state of the art methods for detecting isolating and performing structure elucidation by degradation and spectroscopic techniques Highlights the trends in validation and value addition of herbal medicine with different scientific approaches used in therapeutics Contains several all new chapters on topics such as traditional medicine inspired drug development to treat emerging viral diseases medicinal plants in antimicrobial resistance TLC bio profiling botanicals as medicinal foods bioprospecting and bioassay guided isolation of medicinal plants immunomodulators from medicinal plants and more

**Stress and Epigenetics in Suicide** Vsevolod Rozanov,2017-02-13 Stress and Epigenetics in Suicidediscusses the central role of epigenetic modifications in suicidal behavior As early life stress and an individual s ability to cope with such stressors combined with psychological factors social factors and existential and cognitive factors can predispose young people to suicidal behavior and put them at added risk of suicidal behavior later in life this book provides readers with an overview of the neurobiology of stress an introduction to the epigenetic changes induced by stress and an understanding of how vulnerability and resilience to stress are built It integrates these mechanisms into a biobehavioral model of suicide based on epigenetic marks gene environment interactions and other stressors More importantly it provides future direction for research and discusses potential interventions This book is an ideal and trusted resource for researchers and clinicians who are interested in learning how the environment can affect behavior through genetics and for those seeking the development of new methods for suicide prevention Explores the neurobiology of stress and stress related epigenetics including discussion of the role of stress induced epigenetic changes in behavioral emotional and cognitive mechanisms and whether these epigenetic marks are transgenerational Provides compelling biobehavioral models of suicide based on genetics epigenetics and behavioral adjustment Integrates social psychological and existential influences giving readers a better understanding of the interdisciplinary nature of suicide risk factors Presents future directions for suicide prevention strategies that incorporate recent research on genomics and stress resilience

**Nutrition and Functional Foods for Healthy Aging**

Ronald Ross Watson, 2017-02-01 *Nutrition and Functional Foods for Healthy Aging* aims to equip anyone studying geriatric nutrition or working with aging adults with the latest scientific reviews of critical topics. The major objective of this book is to review in detail the health problems of the aged and how normal food lifestyle or nutritional and dietary supplements can help treat them. Nutrient requirements for optimum health and function of aging physiological systems are often quite distinct from those required for young people. The special nutrition problems of the aged are intensively researched and tested especially as the elderly become a larger percentage of the population. Many chronic diseases and cancers are found with higher frequency in the aged and it is also widely known that many elderly people use foods and nutrients well above the recommended daily allowance which can be detrimental to optimal health. Explains the evidence supporting nutritional interventions relevant to age related diseases. Reviews the macro and micro nutrient requirements of aging adults and their variables. Describes how alcohol, drugs and caffeine can impact deficiencies also exploring functional food and dietary supplements that can be used for prevention and treatment.

*Green Tea* Yukihiro Hara, 2001-02-02 A comprehensive overview of the inherent properties, chemical and biochemical functions, actions for lowering the risks of cardiovascular and infectious diseases and cancers and underlying mechanisms of tea polyphenols. It reveals the bioantimutagenic potency of epigallocatechin gallate (EGCG) found in green tea.

**Antioxidant Properties and Health Benefits of Green Tea** Nishant Rai, Jigisha Anand, 2021 Derived from leaves of evergreen herb *Camellia sinensis*, green tea is known for its significant human health benefits. Once primarily consumed in Asia and North Africa, green tea is becoming increasingly available around the world with an increase in its average annual growth. There has been a tremendous change in the consumption pattern of green tea, a prime driver of which is the increasing knowledge about and marketing of its health benefits. The most notable health benefit of green tea is its powerful antioxidant potential which helps prevent cellular damage from certain oxidation reactions in the body at the molecular level. Green tea is attributed to health claims which include the prevention of skin cancer, lower blood pressure, the prevention of cardiovascular diseases, neurodegenerative and kidney disorders, diabetes, respiratory distress, the inhibition of clinical and opportunistic microbial infections and many more. The rich presence of polyphenols in green tea is likely responsible for its multiple health benefits. In vitro and in vivo epidemiological evidence suggests the importance of green tea polyphenols in exerting antioxidant activities which confer medicinal and food value. Major polyphenols found in green tea include the catechins such as epigallocatechin gallate, epigallocatechin, epicatechin, 3-gallate, epicatechin and catechin gallate. These catechins have shown promise in the promotion of cardiovascular health, the prevention of cancer, skin protection, the reduction of high cholesterol levels, diabetes, impaired immune function, diarrhoea, fatigue and infection. There is a highly significant relationship between phenolics, flavonoids and the antioxidant activity of green tea while the amount of phenolic flavonoids and antioxidants are the parameters depicting the quality of tea according to their biological properties. This book is an informative forum highlighting research on the antioxidant activity of green tea.

pertaining to its health benefits The book is organised into seven chapters that provide a comprehensive review of the antioxidant activity of green tea and its associated health benefits The book outlines useful information and improves the fundamental knowledge regarding the processing of green tea its chemical components their role as antioxidants and usefulness as nutraceuticals
