1. According to Jared Diamond, what is the one factor that allowed Europeans to develop the forces necessary to conquer vast portions of the world?

Answer: Geography-having the most productive crops and animals allowed Europeans to develop guns, germs, and steel, and ultimately, to conquer the world.

2. Why were the Europeans who settled the South African cape so successful? Describe two reasons.

Answer: The temperature and the climate in the South African cape is nearly the same as what the Europeans had at home. Because the Cape and Europe have a similar latitude (distance from the equator), they can grow the same types of crops and raise the same types of livestock in Africa as they did back home in Europe.

3. How did disease allow the Europeans to conquer the native populations in the Americas and in the African cape?

Answer: Europeans introduced germs that these populations had never before been exposed to, particularly smallpox. Because Europeans had been exposed to the disease over the course of centuries, their bodies had built up a natural resistance (antibodies) to these diseases. When the people of the Americas and the South African cape came into contact with these germs, they were killed in massive numbers, making settlement of these lands much easier for the Europeans.

4. While the Europeans who were attempting to overtake/settle the tropical areas of the African continent were responsible for introducing killer germs to the native populations, they also suffered from the effects of the germs native to this part of the world. Describe how these germs worked against the European settlers.

Answer: The Europeans were experiencing a reversal of the pattern they were used to. Rather than introducing germs to the people they hoped to conquer, they were being infected by the germs that were indigenous to Africa and losing their livestock and their own lives as a result.
