Testing Hearing Viktoria Tkaczyk, Mara Mills, Alexandra Hui, 2020-09-01 Testing Hearing The Making of Modern Aurality argues that the modern cultural practices of hearing and testing have emerged from a long interrelationship Since the early nineteenth century auditory test tools whether organ pipes or electronic tone generators and the results of hearing tests have fed back into instrument calibration human training architecture and the creation of new musical sounds Hearing tests received a further boost around 1900 as a result of injury compensation laws and state and professional demands for aptitude testing in schools conservatories the military and other fields Applied at large scale tests of seemingly small measure of auditory acuity of hearing range helped redefine the modern concept of hearing as such During the twentieth and twenty first centuries the epistemic function of hearing expanded Hearing took on the dual role of test object and test instrument in the latter case human hearing became a gauge by which to evaluate or regulate materials

nonhuman organisms equipment and technological systems This book considers both the testing of hearing and testing with hearing to explore the co creation of modern epistemic and auditory cultures The book s twelve contributors trace the design of ever more specific tests for the arts education and communication colonial and military applications sociopolitical and industrial endeavors Together they demonstrate that testing as such became an enduring and wide ranging cultural technique in the modern period one that is situated between histories of scientific experimentation and many fields of application Official Gazette of the United States Patent and Trademark Office ,1995 **Bioacoustics** ,2006
