Kassem, Dalal Hammoudi Halat,2025-01-21 World Antimicrobial Week was established at the 68th World Health Assembly in 2015 and it takes place from the 18th to the 24th of November every year Its key aim is to improve the awareness of antimicrobial resistance highlighting the importance of education and communication Antimicrobial resistance is caused by bacteria

viruses fungi and parasites not responding to current medicines such as antibiotics antivirals antifungals and antiparasitics leading to a higher risk of severe illness and death This has a huge economic impact leading to around five million deaths yearly increased health expenditure and ultimately inequalities Several causes lead to antimicrobial resistance varying from region to region These include the misdiagnosis of certain diseases with the consequent misuse of antimicrobials the overuse of antimicrobials in humans animals and crops or the lack of hygiene sanitation and access to water Due to these different causes antimicrobial resistance needs a multisectoral response focusing on the specific circumstances of each country and region

The Politics of Fear Michiel Hofman, Sokhieng Au, 2017-01-05 The 2014 2015 Ebola epidemic in West Africa was an unprecedented medical and political emergency that cast an unflattering light on multiple corners of government and international response Fear not rational planning appeared to drive many decisions made at population and leadership levels which in turn brought about a response that was as uneven as it was unprecedented entire populations were decimated or destroyed vaccine trials were fast tracked health staff died untested medications were used or not used in controversial ways humanitarian workers returned home to enforced isolation and military was employed to sometimes disturbing ends The epidemic revealed serious fault lines at all levels of theory and practice of global public health national governments were shown to be helpless and unprepared for calamity at this scale the World Health Organization was roundly condemned for its ineffectiveness the US quietly created its own African CDC a year after the epidemic began Amid such chaos Médecins Sans Frontières was forced to act with unprecedented autonomy and amid great criticism in responding to the disease taking unprecedented steps in deploying services and advocating for international aid The Politics of Fear provides a primary documentary resource for recounting and learning from the Ebola epidemic Comprising eleven topic based chapters and four eyewitness vignettes from both MSF and non MSF affiliated contributors all of whom have been given access to MSF Ebola archives from Guinea Sierra Leone and Liberia for research it aims to provide a politically agnostic account of the defining health event of the 21st century so far one that will hopefully inform current opinions and future responses
