The chapter also presents detailed epidemiology and prevalence of different CNS infections worldwide. It also reviews various infectious diseases that target the nervous system such as focal lesions, meningitis and neurological complications of venous sinus thrombosis. The next two sections delve deep into pathogen specific diseases of the CNS namely the viruses and fungi associated with neuro infections. Bacterial Infections of the Central Nervous System Karen L. Roos, Allan R. Tunkel, 2010-03-03. Bacterial Infections of the Central Nervous System aims to provide information useful to physicians taking care of patients with bacterial infections in the central nervous system (CNS) which can lead to morbidity and mortality. The increased number of patients suffering from this infection has led to the development of vaccines and antibiotics. Comprised of four chapters, the book explains the general approach to patients with bacterial CNS infection. It also discusses various CNS infection concepts and terms. These include the characteristic neuroimaging appearance of specific bacterial infections, the limitations of neuroimaging, the cerebrospinal fluid analysis, the pathogenesis and pathophysiology of bacterial CNS infections, the developments of specific adjunctive strategies and the principles of antimicrobial therapy. It also includes discussions on various diseases that target the CNS such as meningitis, focal CNS infections, neurological complications of endocarditis, suppurative venous sinus thrombosis, infections in the neurosurgical patient and CNS diseases caused by selected infectious agents and toxins. This book will serve as a guide for clinical physicians who have patients suffering from bacterial CNS infection. Thompson, John R. Green, 2012-12-06 The contents of this volume are based upon the proceedings of a Symposium entitled Infectious Diseases of the Central Nervous System held in Phoenix Arizona and sponsored by the Barrow Neurological Institute and Foundation during its Ninth Annual Symposium The purpose of the Symposium was to bring together knowledgeable experts in this field to review information that is available and to enhance our knowledge of new developments in the field of infectious diseases in the central nervous system Because the subject could not be covered in its entirety by this volume we have placed particular emphasis on recent developments and new information The volume includes a remarkably fresh and interesting discussion of viral diseases as they affect the nervous system including conventional and unconventional virus agents and in addition discussions of pathophysiology and epidemiology and postinfectious diseases of the nervous system A similar approach is taken to the treatment of bacterial infection Discussions of pathophysiology are intertwined with discussions of diagnostic techniques prevention techniques and treatment of bacterial infections Additional surgical problems are discussed regarding prevention and management of perioperative infection and brain abscess Special consideration was given to coccidioidomycosis which is prevalent in the western states also there is a discussion of parasitic infections This volume will be of interest to neurologists and neurosurgeons and any physician dealing with infectious disease RICHARD A THOMPSON M D JOHN R GREEN M D
