Introduction **Advanced Montessori Method** Maria Montessori, 1989 **The Montessori Method - Scientific Pedagogy as Applied to Child Education** Maria Montessori, 2016-08-18 In the period that has elapsed between the publication of the Italian and American editions I have had with my pupils the opportunity to simplify and render more exact certain practical details of the method and to gather additional observations concerning discipline The results attest the vitality of the method and the necessity for an extended scientific collaboration in the near future and are embodied in two new chapters written for the American edition I know that my method has been widely spoken of in America thanks to Mr S S McClure who has presented it through the pages of his well known magazine Indeed many Americans have already come to Rome for the purpose of observing personally the practical application of the method in my little schools If encouraged by this movement I may express a hope for the future it is that my work in Rome shall become the centre of an efficient and helpful collaboration To the Harvard professors who have made my work known in America and to McClure's Magazine a mere acknowledgment of what I owe them is a barren response but it is my hope that the method itself in its effect upon the children of America may prove an adequate expression of my gratitude Maria Montessori

Plans an entire year's curriculum A I am working on creating Montessori education as an entire year's curriculum This educational service has been taught at three different schools I am basically gathering my notes and tweaking what I found worked best and compiling the information into lesson plans The full year makes one complete cycle through what is traditionally called the Primary Albums I have completed my AMS Training and am in the process of finishing my AMI Certification These lesson plans can be taught to ages 3-6 years old The curriculum is more like a spiral in that each year it is used the child continues to learn at his or her own level and pace In the classroom or small group situation the older child will be a model for the younger children and become the expert as they themselves continue to learn on new levels branching out into related areas of interest Q Do I need Montessori Training to Teach these lesson plans A It is ideal to have gone through a Montessori training The lesson plans DO NOT offer the detailed step by step lessons found in the Montessori Albums These lesson plans assist the Montessori teacher to ensure that he/she is following a reasonable scope and sequence throughout the year honoring each area of the Montessori classroom in the process Q How do I get started Can I begin the curriculum in the middle of the year A It is ideal to begin with the September guide The Montessori materials are introduced sequentially beginning in the September guide Q How do you create a 3 hour work time A The ideal is a 2 1/2 to 3 hour work period but this will vary according to age interests attention span etc Early in the year a 3 hour work period is usually not practical as the children have not yet normalized and may become restless after two hours or less As the year progresses they will have received more lessons and developed self discipline and the ability to work on their own and for a longer length of time In fact they are often reluctant to put work away when it is time to stop so give a gentle warning about five minutes before the work period is over This can be done by softly singing Time to put your work away time to your work away time to put your work away and come to the line or whatever is next Just use a simple melody if you aren't familiar with this song Q How can I use the guides without feeling that I need to do almost everything A There is enough material in the guides for about three years so don't try to do everything the first year The curriculum will grow with the child each year it is used Many schools use a two or three year period to complete the curriculum cycle
