Inflation Unemployment And Monetary Policy:

Inflation, Unemployment, and Monetary Policy John B. Taylor, 1998 The connection between price inflation and real economic activity has been a focus of macroeconomic research and debate for much of the past century Although this connection is crucial to our understanding of what monetary policy can and cannot accomplish opinions about its basic properties have swung widely over the years Today virtually everyone studying monetary policy acknowledges that contrary to what many modern macroeconomic models suggest central bank actions often affect both inflation and measures of real economic activity such as output unemployment and incomes But the nature and magnitude of these effects are not yet understood In this volume Robert M Solow and John B Taylor present their views on the dilemmas facing U S monetary policymakers The discussants are Benjamin M Friedman James K Galbraith N Gregory Mankiw and William Poole The aim of this lively exchange of views is to make both an intellectual contribution to macroeconomics and a practical contribution to the solution of a public policy question of central importance

Inflation, Unemployment, and the Market Thomas Wilson, 1984 Unemployment and Monetary Policy Friedrich August Hayek, 1979 Rev ed of Full employment at any price 1975 Bibliography p 47 51 **Inflation and Unemployment in a Monetary Union** Michael Carlberg, 2008-07-15 This book studies the coexistence of inflation and unemployment in a monetary union The focus is on how to reduce the associated loss The primary target of the European central bank is low inflation in Europe The primary target of the German government is low unemployment in Germany And the primary target of the French government is low unemployment in France The European central bank has a quadratic loss function The same applies to the German government and the French government The key questions are To what extent can the sequential process of monetary and fiscal decisions reduce the loss caused by inflation and unemployment Is monetary and fiscal cooperation superior to the sequential process of monetary and fiscal decisions The present book is part of a larger research project on European Monetary Union see the references given at the back of the book Some parts of this project were presented at the World Congress of the International Economic Association at the International Conference on Macroeconomic Analysis at the International Institute of Public Finance and at the International Atlantic Economic Conference Other parts were presented at the Macro Study Group of the German Economic Association at the Annual Meeting of the Austrian Economic Association at the G ttingen Workshop on International Economics at the Halle Workshop on Monetary Economics at the Research Seminar on Macroeconomics in Freiburg at the Research Seminar on Economics in Kassel and at the Passau Workshop on International Economics
