Comparative Climate Change Litigation: Beyond the Usual Suspects Francesco Sindico, Makane Moïse Mbengue, 2021-01-21 This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders including civil society and the notion that climate change is at a tipping point with urgent measures needed in the next decade Against this background civil society is turning its attention to the courts as a means to directly influence climate action partly because of the global scepticism towards the progress of global climate action despite the ongoing implementation of the Paris Agreement Focusing on the individual broadly representing civil society the book offers fresh perspectives on climate change litigation While most of the literature on climate change litigation examines the same specific jurisdictions mostly common law countries US and Australia in particular this book also considers specific countries in Asia Africa and Latin America with little or no climate change litigation It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action Unlike other literature on the subject this book analyses climate change litigation using a scenario based methodology Combining rigorous academic analysis with a practical policy oriented focus the book provides valuable insights for a wide range of stakeholders interested in climate change litigation It appeals to civil society organisations around the world international organisations and law firms interested in climate change litigation

Rodomonte, Ludovica Durst, 2025-02-21 This book explores the complex issue of building a common European identity and the factors that contribute to it with special regard to the role played by the interaction between national Constitutional Courts and European Courts There is no doubt that the Courts have been key actors in the progressive establishment of this identity over the years by defining elements of homogeneity and affirming or reaffirming essential values such as human dignity in respect of that pluralism which represents a distinctive feature of Europe Nevertheless this circular movement has not failed to reveal contradictions and concerns that are still unresolved over time With contributions from authors from a range of backgrounds this work delves into the theme with a variety of approaches and perspectives It is structured in three main parts the first exploring the historical roots of a common European heritage emphasizing its role in shaping what is currently called the European way of life The second part examines the lights and shadows of constructing the European identity through the instruments of multilevel and inter court relationships by critically analysing the propulsive and homogenising tendencies coming in particular from the Court of Justice of the European Union The third part considers the so called dialogue between Courts by addressing some significant jurisprudential trends of supranational and national Courts and relevant cases in recent years offering new insights into the model of multilevel protection of rights Presenting a wide and comprehensive view of these topics the book will be of interest to those working in the fields of Constitutional European and Comparative Public Law as well as Legal History and Sociology

**Data Protection in the Internet** Dário Moura Vicente,Sofia de Vasconcelos Casimiro,2019-12-01 This book identifies and explains the different national approaches to data protection the legal regulation of the collection storage transmission and use of information concerning identified or identifiable individuals and determines the extent to which they could be harmonised in the foreseeable future In recent years data protection has become a major concern in many countries as well as at supranational and international levels In fact the emergence of computing technologies that allow lower cost processing of increasing amounts of information associated with the advent and exponential use of the Internet and other communication networks and the widespread liberalization of the trans border flow of information have enabled the large scale collection and processing of personal data not only for scientific or commercial uses but also for political uses A growing number of governmental and private organizations now possess and use data processing in order to determine predict and influence individual behavior in all fields of human activity This inevitably entails new risks from the perspective of individual privacy but also other fundamental rights such as the right not to be discriminated against fair competition between commercial enterprises and the proper functioning of democratic institutions These phenomena have not been ignored from a legal point of view at the national supranational and international levels an increasing number of regulatory instruments including the European Union's General Data Protection Regulation applicable as of 25 May 2018 have been adopted with the purpose of preventing personal data misuse Nevertheless distinct national approaches still prevail in this domain notably those that separate the comprehensive and detailed protective rules adopted in Europe since the 1995 Directive on the processing of personal data from the more fragmented and liberal attitude of American courts and legislators in this respect In a globalized world in which personal data can instantly circulate and be used simultaneously in communications networks that are ubiquitous by nature these different national and regional approaches are a major source of legal conflict [Luis de Molina's De Iustitia Et Iure](#) Diego Alonso-Lasheras,2011-04-11 This book shows how threads of field research economic reflection natural law tradition casuistry and the quest for justice weave together in Luis de Molina's De Iustitia et Iure thus forming a major work of Catholic moral theology

**italiana** ,2001      **Protecting Human Rights** Todd Landman,2005-10-04 Ours has been called a global age of rights an era in which respect for human rights is considered the highest aspiration of the international democratic community Since the United Nation s 1948 Universal Declaration of Human Rights a wide variety of protections civil political economic social and cultural have been given legal validation as countries ratify treaties participate in intergovernmental organizations and establish human rights tribunals and truth and reconciliation commissions Yet notable human rights failures have marred the post Declaration era including ongoing state violence toward citizens the selectivity of humanitarian intervention evidenced by the international community s failure to respond in Rwanda and recent legislation in advanced democracies that trades some rights for protection against the threat of terrorism How are we to reconcile the language of rights with the reality Do we live in an age of rights after all In *Protecting Human Rights* Todd Landman provides a unique quantitative analysis of the marked gap between the principle and practice of human rights Applying theories and methods from the fields of international law international relations and comparative politics Landman examines data from 193 countries over 25 years 1976 2000 to assess the growth of the international human rights regime the effect of law on actual protection and global variation in human rights norms Landman contends that human rights foreign policy remains based more on geo strategic interest than moral internationalism He argues that the influence human rights ideals have begun to have on states cannot be separated from the broader impact of socioeconomic changes that swept the globe in the late twentieth century Landman concludes that international law alone will not suffice to fully protect human rights it must be accompanied by democratic government effective conflict resolution and just economic systems
