The Influence of Sea Power Upon History, 1660-1783 (Esprios Classics) A. T. Mahan, 2021-12-02 Alfred Thayer Mahan 1840 1914 was a United States Navy officer geostrategist and educator His ideas on the importance of sea power influenced navies around the world and helped prompt naval buildups before World War I Despite his success in the Navy his skills in actual command of a ship were not exemplary and a number of vessels under his command were involved in collisions On the other hand the books he wrote ashore made him arguably the most influential naval historian In 1885 he was appointed lecturer in naval history and tactics and the Naval War College Before entering on his duties Mahan was pointed to write his future studies and lectures on the influence of sea power He organized his lectures into his most influential books *The Influence of Sea Power upon History 1660 1783* 1890 *The Influence of Sea Power Upon History, 1660-1783* A. T. (Alfred Thayer) Mahan, 2018-08-14 *The Influence of Sea Power Upon History 1660 1783* by A T Alfred Thayer Mahan The history of Sea Power is largely though by no means solely a narrative of contests between nations of mutual rivalries of violence frequently culminating in war The profound influence of sea commerce upon the wealth and strength of countries was clearly seen long before the true principles which governed its growth and prosperity were detected To secure to one s own people a disproportionate share of such benefits every effort was made to exclude others either by the peaceful legislative methods of monopoly or prohibitory regulations or when these failed by direct violence The clash of interests the angry feelings roused by conflicting attempts thus to appropriate the larger share if not the whole of the advantages of commerce and of distant unsettled commercial regions led to wars On the other hand wars arising from other causes have been greatly modified in their conduct and issue by the control of the sea Therefore the history of sea power while embracing in its broad sweep all that tends to make a people great upon the sea or by the sea is largely a military history and it is in this aspect that it will be mainly though not exclusively regarded in the following pages A study of the military history of the past such as this is enjoined by great military leaders as essential to correct ideas and to the skilful conduct of war in the future Napoleon names among the campaigns to be studied by the aspiring soldier those of Alexander Hannibal and C sar to whom gunpowder was unknown and there is a substantial agreement among professional writers that while many of the conditions of war vary from age to age with the progress of weapons there are certain teachings in the school of history which remain constant and being therefore of universal application can be elevated to the rank of general principles For the same reason the study of the sea history of the past will be found instructive by its illustration of the general principles of maritime war

radio Mahan's emphasis on the capital ship and the command of the sea came at an opportune moment Mahan was initially introduced to the German navy by the strategist Ludwig Borckenhagen in a series of influential papers Subsequently his name became a household word in the German navy as Kaiser Wilhelm II ordered his officers to read Mahan and Admiral Alfred von Tirpitz 1849-1930 used Mahan's reputation to finance a powerful surface fleet His ideas decisively shaped Japanese naval doctrine especially in the fleet actions of World War II Between 1890 and 1915 Mahan and British admiral Jackie Fisher 1841-1920 faced the problem of how to dominate home waters and distant seas with naval forces not strong enough to do both Mahan argued for a universal principle of concentration of powerful ships in home waters and minimized strength in distant seas while Fisher reversed Mahan by utilizing technological change to propose submarines for defense of home waters and mobile battle cruisers for protection of distant imperial interests The French at first adopted Mahan's theories French naval doctrine in 1914 was dominated by Mahan's theory of sea power and therefore geared toward winning decisive battles and gaining mastery of the seas But the course of World War I changed ideas about the place of the navy as the refusal of the German fleet to engage in a decisive battle the Dardanelles expedition of 1915 the development of submarine warfare and the organization of convoys all showed the navy's new role in combined operations with the army

The Influence of Sea Power Upon History 1660-1783 A T Mahan D C L, Alfred Mahan, 2017-01-22 From Mahan's 1889 Preface THE definite object proposed in this work is an examination of the general history of Europe and America with particular reference to the effect of sea power upon the course of that history Historians generally have been unfamiliar with the conditions of the sea having as to it neither special interest nor special knowledge and the profound determining influence of maritime strength upon great issues has consequently been overlooked This is even more true of particular occasions than of the general tendency of sea power It is easy to say in a general way that the use and control of the sea is and has been a great factor in the history of the world it is more troublesome to seek out and show its exact bearing at a particular juncture Yet unless this be done the acknowledgment of general importance remains vague and unsubstantial not

resting as it should upon a collection of special instances in which the precise effect has been made clear by an analysis of the conditions at the given moments The period embraced is from 1660 when the sailing ship era with its distinctive features had fairly begun to 1783 the end of the American Revolution While the thread of general history upon which the successive maritime events is strung is intentionally slight the effort has been to present a clear as well as accurate outline Writing as a naval officer in full sympathy with his profession the author has not hesitated to digress freely on questions of naval policy strategy and tactics but as technical language has been avoided it is hoped that these matters simply presented will be found of interest to the unprofessional reader *The Influence of Sea Power Upon History, 1660-1783* Alfred Thayer Mahan, 2021-03-28 An examination of the general history of Europe and America with particular reference to the effect of sea power upon the course of that history *The Influence of Sea Power Upon History, 1660-1783, by Captain A.T.
