Handbook ,1994 Item no 0431 K **Understanding Options for Agricultural Production** G.Y. Tsuji, G. Hoogenboom, P.K. Thornton, 1998-01-31 The first premise of this book is that farmers need access to options for improving their situation In agricultural terms these options might be management alternatives or different crops to grow that can stabilize or increase household income that reduce soil degradation and dependence on off farm inputs or that exploit local

market opportunities Farmers need a facilitating environment in which affordable credit is available if needed in which policies are conducive to judicious management of natural resources and in which costs and prices of production are stable Another key ingredient of this facilitating environment is information an understanding of which options are viable how these operate at the farm level and what their impact may be on the things that farmers perceive as being important The second premise is that systems analysis and simulation have an important role to play in fostering this understanding of options traditional field experimentation being time consuming and costly This book summarizes the activities of the International Benchmark Sites Network for Agrotechnology Transfer IBSNAT project an international initiative funded by the United States Agency for International Development USAID IBSNAT was an attempt to demonstrate the effectiveness of understanding options through systems analysis and simulation for the ultimate benefit of farm households in the tropics and subtropics The idea for the book was first suggested at one of the last IBSNAT group meetings held at the University of Hawaii in 1993 *DoD Performance Assessment Guide* ,1995 Resources in Education ,1995-04
