Information Architecture Wei Ding, Xia Lin, Michael Zarro, Gary Marchionini, 2017-02-27 Information Architecture is about organizing and simplifying information, designing and integrating information spaces, systems, and creating ways for people to find and interact with information content. Its goal is to help people understand and manage information and make the right decisions accordingly. This updated and revised edition of the book looks at integrated information spaces in the web context and beyond, with a focus on putting theories and principles into practice.
