Congress. Office of Technology Assessment,1985 *Assessing the Impacts of Changes in the Information Technology R&D Ecosystem* National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on Assessing the Impacts of Changes in the Information Technology Research and Development Ecosystem,2009-04-16 The U S information technology IT research and development R D ecosystem was the envy of the world in 1995 However this position of leadership is not a birthright and it is now under pressure In recent years the rapid globalization of markets labor pools and capital flows have encouraged many strong national competitors During the same period national policies have not sufficiently buttressed the ecosystem or have generated side effects that have reduced its effectiveness As a result the U S position in IT leadership today has materially eroded compared with that of prior decades and the nation risks ceding IT leadership to other nations within a generation Assessing the Impacts of Changes in the Information Technology R D Ecosystem calls for a recommitment to providing the resources needed to fuel U S IT innovation to removing important roadblocks that reduce the ecosystem s effectiveness in generating innovation and the fruits of innovation and to becoming a lead innovator and user of IT The book examines these issues and makes recommendations to strengthen the U S IT R D ecosystem **Assessing the Impacts of Changes in the Information Technology R&D Ecosystem** National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on Assessing the Impacts of Changes in the Information Technology Research and Development Ecosystem,2009-03-16 The U S information technology IT research and development R D ecosystem was the envy of the world in 1995 However this position of leadership is not a birthright and it is now under pressure In recent years the rapid globalization of markets labor pools and capital flows have encouraged many strong national competitors During the same period national policies have not sufficiently buttressed the ecosystem or have

generated side effects that have reduced its effectiveness As a result the U S position in IT leadership today has materially eroded compared with that of prior decades and the nation risks ceding IT leadership to other nations within a generation Assessing the Impacts of Changes in the Information Technology R D Ecosystem calls for a recommitment to providing the resources needed to fuel U S IT innovation to removing important roadblocks that reduce the ecosystem s effectiveness in generating innovation and the fruits of innovation and to becoming a lead innovator and user of IT The book examines these issues and makes recommendations to strengthen the U S IT R D ecosystem Information Technology Research, Innovation, and E-Government National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on Computing and Communications Research to Enable Better Use of Information Technology in Government,2002-06-03 Governments have done much to leverage information technology to deploy e government services but much work remains before the vision of e government can be fully realized Information Technology Research Innovation and E government examines the emerging visions for e government the technologies required to implement them and approaches that can be taken to accelerate innovation and the transition of innovative information technologies from the laboratory to operational government systems In many cases government can follow the private sector in designing and implementing IT based services But there are a number of areas where government requirements differ from those in the commercial world and in these areas government will need to act on its role as a demand leader Although researchers and government agencies may appear to by unlikely allies in this endeavor both groups have a shared interest in innovation and meeting future needs E government innovation will require addressing a broad array of issues including organization and policy as well as engineering practice and technology research and development and each of these issues is considered in the book **Federal Plan for Cyber Security and Information Assurance Research and Development** National Science and Technology Council (U.S.) Interagency Working Group on Cyber Security and Information Assurance,2006 **Analytical Perspectives, Budget of the United States Government** ,2010 *Advances in Digital Government* William J. McIver Jr.,Ahmed K. Elmagarmid,2008-01-20 Advances In Digital Government presents a collection of in depth articles that addresses a representative cross section of the matrix of issues involved in implementing digital government systems These articles constitute a survey of both the technical and policy dimensions related to the design planning and deployment of digital government systems The research and development projects within the technical dimension represent a wide range of governmental functions including the provisioning of health and human services management of energy information multi agency integration and criminal justice applications The technical issues dealt with in these projects include database and ontology integration distributed architectures scalability and security and privacy The human factors research emphasizes compliance with access standards for the disabled and the policy articles contain both conceptual models for developing digital government systems as well as real management experiences and results in
