Memory: A Very Short Introduction Jonathan K. Foster, 2009 Why can we sometimes remember events from our childhood as if they happened yesterday but not what we did last week How are memories stored in the brain and how does our memory change as we age What happens when our memory goes wrong and how easy is it for others to manipulate our memories This fascinating Very Short Introduction brings together the latest research in psychology and neuroscience to address these and many other important questions about the science of memory revealing how our memory works why we couldn't live without it and even how we may learn to remember more BOOK JACKET

History
John H. Arnold, 2000-02-24 There are many stories we can tell about the past and we are not perhaps as free as we might imagine in our choice of which stories to tell or where those stories end John Arnold's Very Short Introduction is a stimulating essay about how we study and understand history The book begins by inviting us to think about various questions provoked by our investigation of history and explores the ways these questions have been answered in the past Concepts such as causation interpretation and periodization are introduced by means of concrete examples of how historians work giving the reader a sense of the excitement of discovering not only the past but also ourselves ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

All the Facts James W. Cortada, 2016 A history of the role of information in the United States since 1870

Origin Story David Christian, 2018-05-22 This New York Times bestseller elegantly weaves evidence and insights into a single accessible historical narrative Bill Gates and presents a captivating history of the universe from the Big Bang to dinosaurs to mass globalization and beyond Most historians study the smallest slivers of time emphasizing specific dates individuals and documents But what would it look like to study the whole of history from the big bang through the present day and even into the remote future How would looking at the full span of time change the way we perceive the universe the earth and our very existence These were the questions David Christian set out to answer when he created the field of Big History the most exciting new approach to understanding where we have been where we are and where we are going In Origin Story Christian takes readers on a wild ride through the entire 13.8 billion years we've come to know as history By focusing on defining events thresholds major trends and profound questions about our origins Christian exposes the hidden threads that tie everything together from the creation of the planet to the advent of agriculture nuclear war and beyond With stunning insights into the origin of the universe the beginning of life the emergence of humans and what the future might bring Origin Story boldly reframes our place in the cosmos

The Future: A Very Short Introduction Jennifer M. Gidley, 2017-03-16 From the beginning of time humans have been driven by both a fear of the unknown and a curiosity to know We have always yearned to know what lies ahead whether threat or safety scarcity or abundance Throughout human history our forebears tried to create certainty in the unknown by seeking to influence outcomes with sacrifices to gods preparing for the unexpected with advice from oracles and by reading the stars through astrology As scientific methods improve and computer technology develops we become ever more confident of our capacity to predict and quantify the future by accumulating and interpreting patterns from the past yet the truth is there is still no certainty to be had In this Very Short Introduction Jennifer Gidley considers some of our most burning questions What is the future Is the future a time yet to come Or is it a utopian place Does the future have a history Is there only one future or are there many possible futures She asks if the future can ever be truly predicted or if we create our own futures both hoped for and feared by our thoughts feelings and actions and concludes by analysing how we can learn to study the future

Birth of Modern Facts James W. Cortada, 2023-01-09 For over twenty years James W Cortada has pioneered research into how information shapes society In this book he tells the story of how information evolved since the mid nineteenth century Cortada argues that information increased in quantity became more specialized by discipline e.g mathematics science political science and more organized

Information increased in volume due to a series of innovations such as the electrification of communications and the development of computers but also due to the organization of facts and knowledge by discipline making it easier to manage and access He looks at what major disciplines have done to shape the nature of modern information devoting chapters to the most obvious ones Cortada argues that understanding how some features of information evolved is useful for those who work in subjects that deal with their very construct and application such as computer scientists and those exploring social media and most recently history The Birth of Modern Facts builds on Cortada s prior books examining how information became a central feature of modern society most notably as a sequel to All the Facts A History of Information in the United States since 1870 OUP 2016 and Building Blocks of Society History Information Ecosystems and Infrastructures R L 2021 **Stem**

Cells: A Very Short Introduction Jonathan Slack,2012-02-23 The topic of stem cells has been very high profile in the media in recent years There is much public interest in stem cells but also much confusion and misinformation with some companies already offering stem cell products and bogus stem cell therapies In this Very Short Introduction Jonathan Slack introduces stem cells what they are what scientists do with them what stem cell therapies are available today and how they might be used in future Despite important advances clinical applications of stem cells are still in their infancy Most real stem cell therapy today is some form of bone marrow transplantation Slack introduces stem cells by explaining the difference between embryonic stem cells which exist only in laboratory cultures and tissue specific stem cells which exist in our bodies Embryonic stem cells can become any cell type in the body so diseases that may in future be treated by functional cells derived from these sorts of stem cell include diabetes Parkinson s disease heart disease and spinal trauma He then goes on to discuss the properties of tissue specific stem cells and the important technique of bone marrow transplantation Slack concludes by analysing how medical innovation has occurred in this area in the past and draws out some of the lessons for the development of new therapies in the future ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable **Trust: A Very Short Introduction** Katherine Jane

Hawley,2012-08-23 Katherine Hawley explores the key ideas about trust in this Very Short Introduction Drawing on a wide range of disciplines including philosophy psychology and evolutionary biology she emphasizes the nature and importance of trusting and being trusted from our intimate bonds with significant others to our relationship with the state **As If**

Human Nigel Shadbolt,Roger Hampson,2024-05-14 A new approach to the challenges surrounding artificial intelligence that argues for assessing AI actions as if they came from a human being Intelligent machines present us every day with urgent ethical challenges Is the facial recognition software used by an agency fair When algorithms determine questions of justice finance health and defense are the decisions proportionate equitable transparent and accountable How do we harness this

extraordinary technology to empower rather than oppress Despite increasingly sophisticated programming artificial intelligences share none of our essential human characteristics sentience physical sensation emotional responsiveness versatile general intelligence However Nigel Shadbolt and Roger Hampson argue if we assess AI decisions products and calls for action as if they came from a human being we can avert a disastrous and amoral future The authors go beyond the headlines about rampant robots to apply established moral principles in shaping our AI future Their new framework constitutes a how to for building a more ethical machine intelligence

Human Rights in the Age of Platforms Rikke Frank Jorgensen, 2019-11-19 Scholars from across law and internet and media studies examine the human rights implications of today's platform society Today such companies as Apple Facebook Google Microsoft and Twitter play an increasingly important role in how users form and express opinions encounter information debate disagree mobilize and maintain their privacy What are the human rights implications of an online domain managed by privately owned platforms According to the Guiding Principles on Business and Human Rights adopted by the UN Human Rights Council in 2011 businesses have a responsibility to respect human rights and to carry out human rights due diligence But this goal is dependent on the willingness of states to encode such norms into business regulations and of companies to comply In this volume contributors from across law and internet and media studies examine the state of human rights in today's platform society The contributors consider the datafication of society including the economic model of data extraction and the conceptualization of privacy They examine online advertising content moderation corporate storytelling around human rights and other platform practices Finally they discuss the relationship between human rights law and private actors addressing such issues as private companies human rights responsibilities and content regulation Contributors Anja Bechmann Fernando Bermejo Agnès Callamard Mikkel Flyverbom Rikke Frank Jorgensen Molly K Land Tarlach McGonagle Jens Erik Mai Joris van Hoboken Glen Whelan Jillian C York Shoshana Zuboff Ethan Zuckerman Open access edition published with generous support from Knowledge Unlatched and the Danish Council for Independent Research

Today's Facts James W. Cortada, 2025-01-02 This is the third and final volume in a broad study about the role of information largely in the United States since the early nineteenth century This book summarizes how information changed since the early 1800s what it looks like today including how it is being influenced by such current circumstances as the role of Big Data artificial intelligence misinformation on the Internet and the automation of decision making by computers using digital and analog information It is designed to be read by scholars in multiple disciplines and by the general public It is the byproduct of 30 years of studying the modern role of information The book includes a broad curated bibliographic essay about the broad subject of modern information
