the Inland Waterways of Europe Jarrett Kroll, Stanley Kroll, 1979 **Holland Under Habsburg Rule, 1506-1566** James D. Tracy, 2024-07-26 Under what conditions were limited forms of self government possible in medieval and early modern Europe While many historians have sought an answer by investigating the development of parliamentary institutions in emerging national monarchies and the wider autonomy enjoyed by various city states within their own borders James D Tracy concentrates instead on a relatively neglected phenomenon at an intermediate level of political organization the self governing province Focusing on the province of Holland during the reigns of Charles V and Philip II 1506 1566 Tracy argues convincingly that Holland effectively underwent an apprenticeship in self government The seven provinces of the Dutch Republic among which Holland was the richest and most populous were the first in history to govern themselves by a consensus among their towns and nobles The foundations for this internal cohesion were put in place long before the Dutch Revolt first by medieval provincial dynasties then by the dukes of Burgundy and finally by the House of Habsburg At the turn of the sixteenth century Holland was urbanized to a surprising degree with over forty percent of its population residing in some thirty small and mid sized towns Forced by external threats to rise above their economic rivalries the towns joined together through the forum of the provincial parliament or States of Holland which came to assume a primary role in the management of public finances While noting that the growing autonomy of Holland did not make the Dutch Revolt inevitable Tracy points out that the revolt could hardly have succeeded without provinces that already had a tradition of managing their own affairs In the broader context of European political institutions the circumstances that permitted the provincial states to assume many of the functions of government illustrate not only the capacity for self government but also the formation of genuine body politics This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 50 Great Inland Cruising Routes in the Netherlands Andy Mulholland, Machiel Lambooij, 2024-11-12 This guide which by this its sixth edition has already been hailed as one of the most thorough and up to date guides to inland waterways cruising in the Netherlands provides detailed information on over 50 cruising routes in the country s 12 different provinces Aimed at motor yachts cruising the 3 500kms of Dutch waterways that offer at least 4 0 metres air draft the guide includes step by step navigation details for each route bridge and lock opening procedures and times descriptions of moorings and facilities useful sources of information on every aspect of Netherlands cruising a glossary of important Dutch terms and tips offering unique insights into particular locations It is the first book to provide this level of detail and to be written to supplement the national Nautical Maps Waterkaarten app and charts It even corrects numerous errors to be found in this and other apps and published guides This latest edition also includes a full index The guide is written by Andy Mulholland and Machiel Lambooij members of the Cruising Association s European Inland
