International Family Law N. A. Baarsma, 2011-09-06 Choice of law determines which national legal system applies to an international case Currently many choice of law rules in the field of family law are regulated by national law However these national rules of the EU Member States are more and more displaced by common European rules This book describes the changes brought by the Europeanisation of the choice of law on divorce From the conclusions drawn in the field of divorce the concluding chapter discusses the changes of Europeanisation of international family law in a broader perspective

Application of Foreign Law Carlos Esplugues Mota, José Luis Iglesias Buhigues, Guillermo Palao Moreno, 2011-03-30 During the last decade Europe has undertaken an active and broad process of harmonisation of choice of law rules within the EU However this drastic movement towards a harmonised system has so far left aside a highly relevant issue the application by judicial and non judicial authorities of the foreign law In full contrast to the little attention so far paid to it in the EU this issue is said to be the crux of the conflict of laws It violates legal certainty and contradicts the objective of ensuring full access to justice to all European citizens within the EU This book provides a comparative study of the existing situation in all EU member states and drafts some basic principles for a future European instrument It will become a highly useful tool for lawyers judges notaries land registries academics prosecutors etc **International Bank and Other Guarantees**

Multimodal Transport Law Marian Hoeks, 2010-01-01 We only have to look around us on the road while we travel to work or home or to use our eyes at a railway station to know that the transport of goods takes up a lot of the room our modern day infrastructures provide Sometimes perhaps a little too much nowadays congestion seems to be the rule rather than the exception This is an uncomfortable side effect of the explosive growth freight transport has experienced the last few decades¹ Modern day transport offers a considerable array of possibilities possibilities that are for the most part taken for granted by the general public that enjoys their benefits The average European would not be surprised to learn that the fruit on offer in the local supermarket originates from another continent for instance The idea that most of the things we use in our daily routine stem from a distant source such as a cell phone from Japan a trendy pair of designer jeans made in China or a glass of Australian wine seems completely natural to us Clearly the contemporary transport industry offers us a lot of benefits besides such discomforts as congestion and pollution In earlier times before machinery such as the steam engine had been invented it was hardly cost effective or even feasible when it came to perishables to carry goods halfway around the world if they were not at least valuable and extraordinary² The limitations set on trade by the transport structures available did more however than simply curtail the range of affordable products on offer for the public They also had a negative effect on the location of the industry limited transport possibilities and forced production to take place near or in heavily populated areas to secure the necessary workforce and market possibilities After all industrial decentralisation is only feasible if there is an infrastructure capable of supporting a cost effective movement of goods and employees³

The Use of

Nuclear Weapons and the Protection of the Environment during International Armed Conflict Erik V Koppe, 2008-04-25 In 1996 the International Court of Justice delivered an Advisory Opinion on the legality of the use of nuclear weapons in which the Court stated that while the existing international law relating to the protection and safeguarding of the environment does not specifically prohibit the use of nuclear weapons it indicates important environmental factors that are properly to be taken into account in the context of the implementation of the principles and rules of the law applicable in armed conflict The present work analyses this conclusion focusing on the question whether or not the use of nuclear weapons during international armed conflict would violate existing norms of public international law relating to the protection and safeguarding of the environment Although the use of weaponry during armed conflict is usually related to the protection of individuals the rapidly emerging appreciation of and the worldwide realization of the intrinsic value of the natural environment as an indispensable asset for the continuation of life including human life on this planet both for present and future generations warrants a thorough and extensive examination of the question of the illegality of the employment of nuclear weapons from the point of view of international environmental protection law The book consists of two parts Part I discusses the historical development and the effects of nuclear weapons Part II discusses the protection of the environment during international armed conflict under *ius in bello* *ius ad bellum* and *ius pacis* Only then is it possible to assess the legality of the use of nuclear weapons under this particular set of rules

The Law of Open Societies Jürgen Basedow, 2015-06-02 This book endeavours to interpret the development of private international law in light of social change Since the end of World War II the socio economic reality of international relations has been characterised by a progressive move from closed to open societies The dominant feature of our time is the opening of borders for individuals goods services capital and data It is reflected in the growing importance of *ex ante* planning as compared with *ex post* adjudication of cross border relations between individuals and companies What has ensued is a shift in the forces that shape international relations from states to private actors The book focuses on various forms of private ordering for economic and societal relations and its increasing significance while also analysing the role of the remaining regulatory powers of the states involved These changes stand out more distinctly by virtue of the comparative treatment of the law and the long term perspective employed by the author The text is a revised and updated version of the lectures given by the author during the 2012 summer courses of the Hague Academy of International Law
