Million Dollar Women Julia Pimsleur Levine, 2016-10-18 American women are starting businesses at nearly twice the rate that men are but only three percent of female business owners have revenues of over one million dollars Most women entrepreneurs are stuck at the mom and pop level just getting by or in many cases running out of cash Julia Pimsleur shares her story of building her own company and raising millions in capital in a guide for women like her who have a great idea and need to find the resources to take it into the big leagues

Extraordinary Women - Singapore Karen Lee, 2015-05-01 The premise for the book is Karen's personal observation of the state of gender inequality which still exists between men and women in Singapore a country which has achieved the status of a first world economy Karen further explores the dire state of gender inequality in Singapore in her book From her first job with a large electronics conglomerate Karen witnessed the apparent inequality between men and women in the workplace From her observation it seems extremely difficult to break the gender impediment between men and women in the workplace and even at home Karen notices that

most female senior managers have to content with working in more auxiliary departments such as administration accounting and human resource As for the strategic positions in procurement business development sales strategic planning and legal departments most if not all of these positions are likely to be helmed by male employees Furthermore men are expected to excel in their career but if a woman focuses her time on building her career her aspirations are viewed negatively by society because traditionalists still believe that women should take care of the household whilst the men should bring home the bacon This book which has been simmering for the past two years encompasses a series of interviews with strong and successful women who have been able overcome the gender barrier and achieve work life balance Karen hopes that Extraordinary Women Singapore will inspire men and women to work together towards achieving greater work life balance and strive to break the invisible brick wall of gender inequality The Next Wave Susan Coleman,Alicia M. Robb,2016-09-07 You may be familiar with the success stories of Spanx GoldieBlox and other women owned businesses that have taken their markets by storm But today only two percent of women owned firms generate more than one million dollars annually The Next Wave is here to help women drive up that number Drawing on the Kauffman Firm Survey and many other sources Susan Coleman and Alicia M Robb cull together data driven advice for women owned growth oriented businesses as they finance their expansion They not only consider the unique approaches and specific concerns of female business owners but also take into account the growing pool of investors who will play a role in selecting and grooming a new generation of women entrepreneurs Since growth oriented firms typically require external capital the investor perspective is critical Telling entrepreneurs what the research means for them outfitting them with resources and illustrating the road ahead with real world cases this book serves as a pioneering strategy guide for the next wave of women who want to go big to bring home their goals *The Episodic Career* Farai Chideya,2016-01-26 A practical guide to the ways in which work in America is changing and how you can navigate today s volatile job market **Exponential Organizations** Salim Ismail,Michael S.
