Kim,2022-04-07 In *Settler Garrison* Jodi Kim theorizes how the United States extends its sovereignty across Asia and the Pacific in the post World War II era through a militarist settler imperialism that is leveraged on debt as a manifold economic and cultural relation undergirded by asymmetries of power Kim demonstrates that despite being the largest debtor nation in the world the United States positions itself as an imperial creditor that imposes financial and affective indebtedness alongside a disciplinary payback temporality even as it evades repayment of its own debts This debt imperialism is violently reproduced in juridically ambiguous spaces Kim calls the settler garrison a colonial archipelago of distinct yet linked military camptowns bases POW camps and unincorporated territories situated across the Pacific from South Korea to Okinawa to Guam Kim reveals this process through an analysis of how a wide array of transpacific cultural productions creates antimilitarist and decolonial imaginaries that diagnose US militarist settler imperialism while envisioning alternatives to it

Recognition in the Age of Social Media Bruno Campanella, 2023-10-30 The desire to be recognized is a basic human trait In contemporary society social media platforms play a key role in defining how processes of recognition take shape To post to like or to comment have become daily practices of expressing individual recognition On the one hand social media platforms make it easier for individuals to be visible and to be recognized on the other hand they control the structure of these dynamics This timely and original book reflects on processes of recognition on social media platforms Revisiting traditional discussions on recognition theory Bruno Campanella investigates how the field of media and communication has used the concept and poses new questions raised by the omnipresence of social media He argues that existing work does not fully explore the impact of platforms on contemporary processes of recognition Individuals must learn new skills to make themselves visible online but how to achieve this changes as a consequence of the role played by platforms what is seen depends on decisions taken by their algorithms which impacts how individuals and social groups are valued in society *Recognition in the Age of Social Media* is a key contribution to the field and a must read for students and scholars of media and communication sociology and politics On Making a Shift in the Study of Religion and Other Essays Russell T. McCutcheon, 2021-06-08 Although many would today argue that the onetime dominance of the phenomenology of religion has

receded and with it the traditional approach to studying religion as a unique and deeply felt experience that defies explanation the essays collected here take quite the opposite stand that this approach has merely been re branded and continues to characterize much work being done in the field today Offering a different way forward one that is based on experiences gained by the members of the Department of Religious Studies at the University of Alabama a program that has successfully reinvented itself over the past 20 years the book includes a variety of practical suggestions for how members of Religious Studies departments can revise their approach to studying and teaching about religion Seeing religion instead as mundane but always exemplary of basic social elements found all across cultures the volume argues that the way forward for this field lies not in the specialness of its object of study but instead the fact that thinking and acting as if something is special is itself an ordinary aspect of history and culture Making just this shift helps the scholar of religion to contribute to wide interdisciplinary conversations all across the Humanities and Social Sciences demonstrating the practical relevance of their work
