not followed the traditional format of printed dictionaries. It is often the case that a headword actually a label expression does not consist of a single word but rather of expressions or even full sentences including synonyms or sentence fragments with similar meaning but formulated differently. These do not affect computer based searching. For compound expressions it is advisable to search for the individual components as well in order to uncover as many related meanings as possible. The book acts as a practical guide and overview to chemicals risk assessment and risk management in the EU context as well as a support text for planning for the challenges of the future which will see ever increasing pressure to withdraw hazardous substances from the EU and global market balanced against opportunities for innovation in the development of less hazardous chemicals.
