Ivorybill Hunters The Search For Proof In A Flooded Wilderness:

Ivorybill Hunters Geoffrey E. Hill, 2007-03-22 Professor and author Geoff Hill gives a first hand account of the discovery and follow up search for the rarest and more noble of North American birds the Ivory billed Woodpecker Rather than a bland technical account Hill conveys the trials and tribulations of chasing a mostly silent and elusive bird through a vast swamp wilderness

Ivorybill Hunters Geoffrey Edward Hill, 2007 The author tells the story of how he and two of his colleagues stumbled upon what may be a breeding population of Ivory billed Woodpeckers in the swamps of northern Florida He relates their laborious attempts to document irrefutable evidence for the existence of this shy elusive bird following the failure of a much larger team to do so

Woody's Last Laugh James Christopher Haney, 2021-11-26 When I was appointed Co chair of the U S Fish and Wildlife Service team charged with preparing a preliminary recovery plan for the Ivory billed Woodpecker I had naive notions about the work ahead Dr Haney's book would have been an immense help in navigating the many strange behaviors misconceptions and bitter disagreements that ensued Woody's Last Laugh reveals that I too fell to faulty thinking about the Ivory bill and the question of its continued existence or extinction I highly recommend this book for anyone involved in endangered species recovery as a way to avoid the many cognitive biases that we all face Jon Andrew Co chair of Ivory billed Woodpecker Recovery Team retired Woody's Last Laugh explores a simmering controversy amid scientists conservationists birders and the media the supposed extinction of American ivory billed woodpecker Among the first to identify rampant mental errors inside conservation and environmental professions the book identifies 53 distinct kinds of cognitive blunders psychological biases and logical fallacies on both sides of the woodpecker controversy Few species have ever provoked such social rancor Why are rumors of its persistence so prevalent unlike other near or recently extinct animals Why are we so bad mannered with each other about a mere bird How is it that we cannot agree even on whether a mere bird is alive or dead Woody's Last Laugh uncovers why such mysteries so mess with our heads By exploring uncharted borders between conservation and mental perception new ways of evaluating truth and accuracy are opened to everyone Author Dr J Christopher Haney is a biologist conservation scientist and lifelong birder For 12 years he was Chief Scientist at Defenders of Wildlife In 2010 following the Deepwater Horizon oil blowout the U S Fish Wildlife Service invited him to lead the largest pelagic study of marine birds ever conducted in the Gulf of Mexico Since 2013 he has been president of Terra Mar Applied Sciences an independent public interest conservation research firm which he founded If there is one lesson Dr Haney hopes his book delivers it is to not overvalue our thinking skills Human reason is fallible even among scientists and technical experts To improve our essential relationship with nature conservation practices will need to devote as much attention to the unbridled thoughts as the unswerving sentiments Dead or alive however the ivory bill got the last laugh on us all

Flock Together B.J. Hollars, 2017-02-01 After stumbling upon a book of photographs depicting extinct animals B J Hollars became fascinated by the creatures that are no longer with us specifically extinct North American birds How he wondered could we

preserve so beautifully on film what we've failed to preserve in life And so begins his yearlong journey to find out one that leads him from bogs to art museums from archives to Christmas Counts until he at last comes as close to extinct birds as he ever will during a behind the scenes visit at the Chicago Field Museum Heartbroken by the birds we've lost Hollars takes refuge in those that remain Armed with binoculars a field guide and knowledgeable friends he begins his transition from budding birder to environmentally conscious citizen a first step on a longer journey toward understanding the true tragedy of a bird's song silenced forever Told with charm and wit *Flock Together* is a remarkable memoir that shows how knowing the natural world even just a small part illuminates what it means to be a global citizen and how only by embracing our ecological responsibilities do we ever become fully human A moving elegy to birds we've lost Hollars's exploration of what we can learn from extinct species will resonate in the minds of readers long beyond the final page Purchase the audio edition Watch a book trailer for Hollars's newest book *Midwestern Strange* [Hope Is the Thing with Feathers](#) Christopher Cokinos, 2009-05-14 A prizewinning poet and nature writer weaves together natural history biology sociology and personal narrative to tell the story of the lives habitats and deaths of six extinct bird species **Nature's Ghosts** Mark V. Barrow, 2024-05-31 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in *Nature's Ghosts* the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson's day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them *Nature's Ghosts* offers an unprecedented view of what we've lost and a stark reminder of the hard work of preservation still ahead *Scrutinizing Argumentation in Practice* Frans H. van Eemeren, Bart Garssen, 2015-10-30 *Scrutinizing Argumentation in Practice* contains a selection of papers reflecting upon the use of argumentation in real life contexts The first five sections are devoted to argumentation in a specific institutional context scientific controversies argumentation in politics argumentation in a legal context argumentation in education argumentation in an interpersonal context The last section deals with strategic

Imagining Extinction Ursula K. Heise, 2016-08-10 We are currently facing the sixth mass extinction of species in the history of life on Earth biologists claim the first one caused by humans Activists filmmakers writers and artists are seeking to bring the crisis to the public's attention through stories and images that use the strategies of elegy tragedy epic and even comedy Imagining Extinction is the first book to examine the cultural frameworks shaping these narratives and images Ursula K Heise argues that understanding these stories and symbols is indispensable for any effective advocacy on behalf of endangered species More than that she shows how biodiversity conservation even and especially in its scientific and legal dimensions is shaped by cultural assumptions about what is valuable in nature and what is not These assumptions are hardwired into even seemingly neutral tools such as biodiversity databases and laws for the protection of endangered species Heise shows that the conflicts and convergences of biodiversity conservation with animal welfare advocacy environmental justice and discussions about the Anthropocene open up a new vision of multispecies justice Ultimately Imagining Extinction demonstrates that biodiversity endangered species and extinction are not only scientific questions but issues of histories cultures and values

For the Birds Elizabeth Cherry, 2019-09-13 2020 Award for Distinguished Book from the Animals Society Section of the American Sociological

Association One in five people in the United States is a birdwatcher yet the popular understanding of birders reduces them to comical stereotypes obsessives who only have eyes for their favorite rare species In real life however birders are paying equally close attention to the world around them observing the devastating effects of climate change and mass extinction while discovering small pockets of biodiversity in unexpected places For the Birds offers readers a glimpse behind the binoculars and reveals birders to be important allies in the larger environmental conservation movement With a wealth of data from in depth interviews and over three years of observing birders in the field environmental sociologist Elizabeth Cherry argues that birders learn to watch wildlife in ways that make an invaluable contribution to contemporary conservation efforts She investigates how birders develop a naturalist gaze that enables them to understand the shared ecosystem that intertwines humans and wild animals an appreciation that motivates them to participate in citizen science projects and wildlife conservation

Florida's Rivers Doug Alderson, 2021-09-01 The rivers in Florida are steeped in a rich natural and cultural history They are avenues through time allowing us to wrap ourselves in a rich historical tapestry and they are showcases for wildlife and natural beauty On some rivers idyllic scenes are revealed bend after bend for miles and sometimes days appearing to have changed little since early native people plied the waters in dugout canoes Imagine gliding along a clear watercourse beneath a leafy canopy of maple cypress and gum The current swirls eelgrass in undulating patterns as schools of silvery mullet shoot past Ahead a manatee's snout breaks the surface in a loud whoosh its gray body lumbering slowly along and showing little fear as you pass by A red shouldered hawk cries and soars over treetops while a black aninga stretches long wings to dry while perched on a cypress knee Whether you are viewing a river from the land or especially a kayak canoe or paddleboard let Florida's Rivers be your guide to celebrating the state's treasures **John**

James Audubon Patrice Sherman, 2013 Artist writer naturalist and frontiersman John James Audubon explored America's wilderness during the early 19th century observing and recording the wonders he found there From the Kentucky frontier to the Mississippi bayou

The Practice of Rhetoric Debra Hawhee, Vessela Valiavitcharska, 2022-10-18 Rhetoric broadly conceived as the art of making things matter is both a practice and theory about that practice In recent decades scholars of rhetoric have turned to approaches that braid together poetics performance and philosophy into a practical art By practical art they mean methods tested in practice by trial and error with a goal of offering something useful and teachable This volume presents just such an account of rhetoric The account here does not turn away from theory but rather presumes and incorporates theoretical approaches offering a collection of principles assembled in the heat and trials of public practice The approaches ventured in this volume are inspired by the capacious conception of rhetoric put forth by historian of rhetoric Jeffrey Walker who is perhaps best known for stressing rhetoric's educational mission and its contributions to civic life The Practice of Rhetoric is organized into three sections designed to spotlight in turn the importance of poetics performance and philosophy in rhetorical practice The volume begins with poetics stressing the world making properties of that word in

contexts ranging from mouse infested medieval fields to the threat of toxin ridden streams in the mid twentieth century Susan C Jarratt for instance probes the art of ekphrasis or vivid description and its capacity for rendering alternative futures Michele Kennerly explores a little studied linguistic predecessor to prose logos psilos or naked speech exposing the early rumblings of a separation between poetic and rhetorical texts even as it historicizes the idea of clothed or ornamented speech In an essay on the almost magical properties of writing Debra Hawhee considers the curious practice of people writing letters to animals in order to banish or punish them thereby casting the epistolary arts in a new light Part 2 moves to performance Vessela Valiavitcharska examines the intertwining of poetic rhythm and performance in Byzantine rhetorical education and how such practices underlie the very foundations of oratory Dale Martin Smith draws on the ancient stylistic theory of Dionysius of Halicarnassus along with the activist work of contemporary poets Amiri Baraka and Harmony Holiday to show how performance and persuasion unify rhetoric and poetics Most treatments of philosophy and rhetoric begin within a philosophical framework and remain there focusing on old tools like stasis and disputation Essays in part 3 break out of that mold by focusing on the utility and teachability of rhetorical principles in education Jeanne Fahnestock and Marie Secor update stasis a classical framework that encourages aspiring rhetors to ask after the nature of things their facts and their qualities as a way of locating an argument s position Mark Garrett Longaker probes the medieval practice of disputation in order to marshal a new argument about why exactly John Locke detested rhetoric and the longstanding opposition between science and rhetoric as modes of proof that has lasting implications for the way argument works today Ranging across centuries and contexts the essays collected here demonstrate the continued need to attend carefully to the co operation of descriptive language and normative reality conceptual vocabulary and material practice public speech and moral self shaping The volume promises to rekindle long standing conversations about the public world making practice of rhetoric thereby enlivening anew its civic mission

Knowing Global Environments Jeremy Vetter, 2011 *Knowing Global Environments* brings together nine leading scholars whose work spans a variety of environmental and field sciences including archaeology agriculture botany climatology ecology evolutionary biology oceanography ornithology and tidology Collectively their essays explore the history of the field sciences through the lens of place practice and the production of scientific knowledge with a wide ranging perspective extending outwards from the local to regional national imperial and global scales The book also shows what the history of the field sciences can contribute to environmental history especially how knowledge in the field sciences has intersected with changing environments and addresses key present day problems related to sustainability such as global climate biodiversity oceans and more Contributors to *Knowing Global Environments* reveal how the field sciences have interacted with practical economic activities such as forestry agriculture and tourism as well as how the public has been involved in the field sciences as field assistants students and local collaborators *Arkansas Wildlife*, 2007 *Birding*, 2007 **The American Naturalist**, 2007 **Official Meeting Program** Ecological Society of America.
