The Dark Side of Leadership Dr Tessie Herbst, 2014-03-28 This book highlights the fact that leaders do indeed affect the performance of organizations or the well being of society for better or worse to cast either a shadow or light by the exercise of their leadership Modern psychology with its theories of human behavior which does not acknowledge the existence of the spiritual realm cannot explain the carnage and evil often associated with the dark side of leadership This book focuses on the dark side of leadership in a multidimensional manner and provides a psychospiritual approach toward understanding personality disorders and leader derailment It highlights an area that has not been widely studied by leadership researchers to date the dynamic relationship between the psychological and spiritual domains in shaping the dark side which lead to leadership failure and derailment This book calls for a more interdisciplinary approach and holistic understanding of the dark side of leadership inseparably relating body soul and spirit as they function individually and relationally It highlights the fact that the restoration of personality will require sustained dialogue between theologians and the medical and psychological professions Such a theoretical perspective would help us better understand how personality disorders develop not only emotionally and psychologically but spiritually Social-Cultural Anthropology George Allan Phiri, 2009-09-01 Effective communication with the African society in the field of missions church planting and social development work has been and continues to be a great challenge particularly to people from western cultural and language orientation Africans are a we rather than I and a depended on rather than independent of society The worldview of a traditional African in terms of society relationships and communication is communal Certainly the African perception of communalism affects how they communicate with the people of different cultural orientation Africa has several cultures and people differ in their communication depending on their cultural orientation However there are universal African cultures that act as a framework for understanding key aspects of communication with Africans for successful missions church planting and social development work This book therefore provides a strategy of understanding communication with the African society The

discussions in this book provide readers with different cultural orientations unique perception of the African society as s he may be planning to communicate with the African society for missions church planting and social development work even doing humanitarian ministry in African society Although literacy levels have improved tremendously in most African countries most of Africa is not a reading society It is imperative to understand that most Africans still communicate orally and are not time conscious Hence effective communication in African societies ought to be based on storytelling rather than literature distribution although this is in transition In fact Africans are oratory and good listeners Thus this book provides an understanding to people of different cultural orientations when they plan to communicate with the people in Africa

Formational Leadership Marcus K. Kilian, 2018-07-17 This book addresses the problem of toxic leadership in Christian contexts. Toxic leadership behaviors of narcissistic and obsessive compulsive leaders will be emphasized. To counteract toxic Christian leadership this book proposes a leadership development model called formational leadership which is based mostly on Wesleyan spirituality but also includes monastic and Pentecostal spiritualities. Formational leadership is an eclectic leadership development model that includes components of transformational, authentic and primal leadership approaches. Formational leadership emphasizes the spiritual, emotional and ethical development processes in the leader and includes an analysis of orthokardia, orthodynamis and orthopraxis. These components have a circular relationship with one another. Orthokardia includes the concepts of spiritual and emotional maturity that a Christian leader needs to develop in order to become an ethical and effective leader. Orthodynamis includes right power and influence motives based on Christian affections that should inform formational leadership. Orthopraxis refers to right and just leadership behaviors informed by Wesley's social holiness and justice values that need to be adopted as organizational core values. The implications of these components for leadership development are outlined in chapters 4-6 that include practical steps for helping toxic leaders change their dysfunctional and harmful intentions and behaviors.
