Dying: What Happens When We Die? Evan Thompson, 2014-09-02 In the ancient Indian epic Mahabharata the Lord of Death asks What is the most wondrous thing in the world and his son answers It is that all around us people can be dying and we don't believe it can happen to us This refusal to face the inevitability of death is especially prevalent in modern Western societies We look to science to tell us how things are but biomedicine and neuroscience divest death of any personal significance by presenting it as just the breakdown of the body and the cessation of consciousness The Tibetan Buddhist perspective stands in sharp contrast to this modern scientific notion of death This tradition conceives dying not as the mere termination of living processes within the body but as a rite of passage and transformation of consciousness Physical death in this tradition initiates a transition from one of the six bardos in between states of consciousness to an opportunity for total enlightenment In *Dying What Happens When We Die* Evan Thompson establishes a middle ground

between the depersonalized scientific account of death and the highly ritualized notion of death found in Tibetan Buddhism Thompson's depiction of death and dying offers an insightful neurobiological analysis while also delving into the phenomenology of death examining the psychological and spiritual effects of dying on human consciousness In a trenchant critique of the near death experience literature he shows that these experiences do not provide evidence for the continuation of consciousness after death but also that they must be understood phenomenologically and not in purely neuroscience terms We must learn to tolerate the ultimate ungraspability of death by bearing witness to dying and death instead of turning away from them We can learn to face the experience of dying through meditative practice and to view the final moments of life not as a frightening inevitability to be shunned or ignored but as a deeply personal experience to be accepted and even embraced

published in 1994 Jewish Views of the Afterlife is a classic study of ideas of afterlife and postmortem survival in Jewish tradition and mysticism As both a scholar and pastoral counselor Raphael guides the reader through 4 000 years of Jewish thought on the afterlife by investigating pertinent sacred texts produced in each era Through a compilation of ideas found in the Bible Apocrypha rabbinic literature medieval philosophy medieval Midrash Kabbalah Hasidism and Yiddish literature the

reader learns how Judaism conceived of the fate of the individual after death throughout Jewish history In addition this book explores the implications of Jewish afterlife beliefs for a renewed understanding of traditional rituals of funeral burial shiva kaddish and more This newly released twenty fifth anniversary edition presents new material on little known Jewish mystical teachings on reincarnation a chapter on Spirits Ghosts and Dybbuks in Yiddish Literature and a foreword by the renowned scholar of Jewish mysticism Rabbi Arthur Green Both historical and contemporary this book provides a rich resource for scholars and laypeople and for teachers and students and makes an important Jewish contribution to the growing contemporary psychology of death and dying *Tricycle* ,1996 **Waking, Dreaming, Being** Evan Thompson,2014-11-18 A renowned philosopher of the mind also known for his groundbreaking work on Buddhism and cognitive science Evan Thompson combines the latest neuroscience research on sleep dreaming and meditation with Indian and Western philosophy of mind casting new light on the self and its relation to the brain Thompson shows how the self is a changing process not a static thing When we are awake we identify with our body but if we let our mind wander or daydream we project a mentally imagined self into the remembered past or anticipated future As we fall asleep the impression of being a bounded self distinct from the world dissolves but the self reappears in the dream state If we have a lucid dream we no longer identify only with the self within the dream Our sense of self now includes our dreaming self the I as dreamer Finally as we meditate either in the waking state or in a lucid dream we can observe whatever images or thoughts arise and how we tend to identify with them as me We can also experience sheer awareness itself distinct from the changing contents that make up our image of the self Contemplative traditions say that we can learn to let go of the self so that when we die we can witness its dissolution with equanimity Thompson weaves together neuroscience philosophy and personal narrative to depict these transformations adding uncommon depth to life s profound questions Contemplative experience comes to illuminate scientific findings and scientific evidence enriches the vast knowledge acquired by contemplatives **Death and Dying in India** Suhita Chopra Chatterjee,Jaydeep Sengupta,2017-07-14 This book examines different settings where elderly die including hospitals family homes and palliative set ups The discourse is set in the backdrop of international attempts to restructure and reconfigure the health delivery system for ageing population
