Grammar Connection Jill Ortman,2008 *Writing and Reading Connections* Zoi A. Philippakos,Steve

Graham,2022-11-18 Writing skills are essential for success in the 21st century school and workplace but most classrooms devote far more time to reading instruction with writing often addressed in isolation or excluded In this insightful professional development resource and text leading researchers discuss why and how to integrate writing and reading instruction in grades K 12 and beyond Contributors explore how to harness writing reading connections to support learning in such areas as phonics and spelling vocabulary understanding genre and text structure and self regulated strategy development as well as across content areas and disciplines Special considerations in teaching emergent bilingual students and struggling literacy learners are described User friendly features include guiding questions classroom examples and action questions that help teachers translate the research and concepts into practice An NCTQ Exemplary Text for Reading Instruction Theory Formation and the Study of Literature Dolf Sörensen,1987 Intercultural Language Use and Language Learning Eva Alcon Soler,Maria Pilar Safont Jorda,2007-05-24 Eva Alc n Soler Maria Pilar Safont Jord Universitat Jaume I Spain The main purpose of the present book is to broaden the scope of research on the development of intercultural communicative competence Bearing this purpose in mind English learners are considered as intercultural speakers who share their interest for engaging in real life communication According to Byram and Fleming 1998 the intercultural speaker is someone with knowledge of one or more cultures and social identities and who enjoys discovering and maintaining relationships with people from other cultural backgrounds although s he has not been formally trained for that purpose Besides possessing knowledge of at least two cultures is the case of many learners in bilingual or multilingual communities In these contexts the objective of language learning should then focus on developing intercultural competence which in turn may involve promoting language diversity while encouraging English as both a means and an end of instruction see Alc n this volume This is the idea underlying the volume which further sustains Kramersch s argument 1998 against the native non native dichotomy Following that author we also believe that in a multilingual world where learners may belong to more than one speech community their main goal is not to become a native speaker of English but to use this language as a tool for interaction among many other languages and cultures **Conceptualising Integration in CLIL and Multilingual**

Education Tarja Nikula, Emma Dafouz, Pat Moore, Ute Smit, 2016-08-18 Content and Language Integrated Learning CLIL is a form of education that combines language and content learning objectives a shared concern with other models of bilingual education While CLIL research has often addressed learning outcomes this volume focuses on how integration can be conceptualised and investigated Using different theoretical and methodological approaches ranging from socioconstructivist learning theories to systemic functional linguistics the book explores three intersecting perspectives on integration concerning curriculum and pedagogic planning participant perceptions and classroom practices The ensuing multidimensionality highlights that in the inherent connectedness of content and language various institutional pedagogical and personal aspects of integration also need to be considered *Handbook of Research on Integrating Technology Into Contemporary Language Learning and Teaching* Zou, Bin, Thomas, Michael, 2018-02-23 Technology has become an integral part of our everyday lives As today's teachers prepare to instruct a new generation of students the question is no longer whether technology should be integrated into the classroom but how The Handbook of Research on Integrating Technology Into Contemporary Language Learning and Teaching is a critical scholarly publication that examines the relationship between language education and technology and the ability to improve language education through technological advances Featuring coverage on a wide range of topics such as computer assisted language learning flipped instruction and teacher education this publication is geared toward researchers practitioners and education professionals seeking relevant research on the improvement of language education through the use of technology
