Researching and Applying Metaphor in the Real

World Graham Low, Alice Deignan, Lynne Cameron, Zazie Todd, 2010 It has become increasingly clear that metaphor needs to be explored in terms of the social and discourse context in which it is used especially where the aim is to address real world problems The notion of real world metaphor research has been developed to describe this important area of investigation This book starts by describing the nature and scope of real world metaphor research and then illustrates through 17 detailed mainly empirically based studies the different areas it can apply to and different methodologies that can be employed Research problems are explored in areas such as artificial intelligence language teaching and learning reconciliation dialogue university lecture discourse poetry and wine description Methods include corpus analysis experimentation discourse analysis cross cultural analysis and genre analysis In each case the empirical studies refer back to Gibbs's opening overview of real world research The result is an invaluable and cross referenced collection of papers addressing real world problems
