Acts of Reading Hiroshi Nara, Mari Noda, 2002-09-30 Students who have completed a year of German read

Brecht in their second year those of Spanish read Cervantes Teachers of first and second year Japanese can often find nothing comparable Why aren t your students reading literature they are asked Why not Soseki Or Murakami What are instructors of Japanese doing wrong Nothing according to the authors of this volume Rather they argue such questions

exemplify the gross misunderstandings and unreasonable expectations of teaching reading in Japanese. In *Acts of Reading*, the authors set out to explore what reading is for Japanese as a language and how instructors should teach it to students of Japanese. They seek answers to two questions: What are the aspects of reading in Japan as manifested in Japanese society? What L2 second language reading problems are specific to Japanese? In answering the first and related questions, the authors conclude that reading is a socially motivated purposeful act that is savored and becomes a part of people's lives. Reading instruction in Japanese therefore should include teaching students how to work with text as the Japanese do in Japanese society. The second question relates more directly to traditional concerns in L2 reading. The authors begin with a general theory of reading. They then offer a welcome glimpse into the rich and complex perspectives, sometimes conflicting, other times symbiotic, on what reading is and how it is performed in L1 and L2 and most importantly on the web of interconnections between the phenomenology of reading and the demands it places on teaching approaches to reading in Japanese. With essays by Charles J. Quinn Jr., Fumiko Harada, and Chris Brockett. Foreword by J. Marshall Unger. , **Exam Literacy** Jake Hunton, 2018-08-13. In *Exam Literacy: A guide to doing what works and not what doesn't to better prepare students for exams*. Jake Hunton focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work. Foreword by Professor John Dunlosky. Read, highlight, reread, repeat: if such a revision cycle sounds all too wearily familiar, you and your students need a better route to exam success. And in light of the recent decision to make all subjects at GCSE linear so that students will be tested in one-off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, *Exam Literacy* provides teachers with user-friendly advice on how they can make the content they cover stick and shares up-to-date evidence-based information on the nature of learning and the various types of memory. How to improve students' retention of knowledge and recall of content. Why popular revision techniques such as rereading, highlighting, and summarising may not be as effective as you think. How revision strategies that have been identified as being more effective, such as interleaving, elaborative interrogation, self-explanation, and retrieval practice, can be embedded into day-to-day teaching. How students can be encouraged to make use of these winning strategies when revising independently.

Listening Comprehension For EFL Learners Yeasy Agustina Sari, M.Pd, Suhono, M.Pd, 2023-03-07. book focuses on incidental learning how students learn words from reading Despite its popularity some researchers have questioned this theory that students can learn new words by inferring meanings based on a text they are reading So why does the incidental method not work for some students What are the conditions for naturalistic learning to occur What do students need to be able to do while reading in order to learn words successfully Tackling these questions head on this book provides researchers and educators with a more specific account of the processes behind the seemingly naturalistic method Clarifying the connection between reading and word learning processes Megumi Hamada proposes a new model the Cognitive Model of Word Meaning Inference to describe how we obtain and use word form and contextual information for learning words and the pedagogical applications of this A significant new contribution to research in the field Learning Words from Reading provides a cognitive perspective on how students learn new words from reading in a second or foreign language
