LeBlanc, 2017-12-01 Egypt Judaism and the history of the alphabet intersect in Deciphering The Proto Sinaitic Script From its initial appearance in around the 18th century BC the origins of proto Sinaitic writing can be traced back to Egypt s Middle Kingdom period when it was somehow derived from the hieroglyphs its parent system The importance of proto Sinaitic lies in the fact that it represents the alphabet s earliest developmental period a kind of missing link between the hieroglyphs and these early Semitic alphabets from which our own Latin one descends by way of the Phoenician and Greek However up until now proto Sinaitic has remained for the most part undeciphered The intriguing possibility of giving voice to a lost culture or civilization from thousands of years ago is tantalizing Representing one of the most enticing problems in modern archaeology the enigmatic allure surrounding ancient languages and the undeciphered scripts in which they are encoded is truly vexing In his bold and original research LeBlanc argues convincingly to have solved the mystery and uncovers some incredibly enthralling information about the people who invented it The epigraphic evidence suggests that the Egyptianized Canaanites who first devised the proto Sinaitic script were surprisingly instrumental in the formation of early Israelite culture and proto Judaism *Ausgestattet mit den Schriften des Thot* Burkhard Backes, Marcus Müller-Roth, Simone Stöhr, 2009 Mit Irmtraut Munro geht Anfang 2009 eine der produktivsten Forscherinnen zum

Signs, Language, and Culture: The Semograms of the Pyramid Texts between Iconicity and Referential Reality Josep Cervelló Autuori, Marc Orriols-Llonch, 2025-04-17 The signs of Egyptian hieroglyphic writing are pictograms i.e. images that represent beings and objects of reality The main characteristic of pictograms is their iconicity An icon conveys meaning through the image which distinctly refers to a real referent by depicting several of its defining features This volume focuses on semograms which are lexical or semantic pictograms meaning the image itself participates directly in the encoding of the linguistic message The Pyramid Texts of the late 3rd millennium BCE constitute the oldest corpus of funerary texts in Egyptian and human history Their semograms iconically reflect cultural realities of Old Kingdom Egypt and perhaps earlier The studies you will find in this book are devoted to the dialectics between text sign iconicity and referential reality

Tutankhamun and Carter Rogerio Sousa, Gabriele Pieke, Tine Bagh, 2024-08-15 First scholarly multi disciplinary re assessment of Howard Carter s discovery and excavation of Tutankhamun s tomb and the impact of the find on our understanding of the material culture of Ancient Egypt The discovery of the tomb of Tutankhamun in 1922 stands out as one of the most important finds of modern archaeology revealing an enormous wealth of objects encapsulating techniques vestiges of uses and re uses of materials as well as unrivalled clues regarding the complex set of beliefs associated with the pharaonic funerary material culture Once cleared from the tomb these objects have captivated the world with their irresistible charm and beauty ending up playing a role in contemporary popular culture However it seems that such magnetism rather hindered than facilitated the scholarly study of the find One hundred years after the discovery of this magnificent tomb most of its objects remain insufficiently studied to this day This volume aims to show how it remains challenging to study Tutankhamun s objects gathering a collection of studies authored by leading scholars on conservation materials funerary beliefs as well as the reception of motifs and the impact of the discovery Through these studies it becomes clear how ancient objects can help us reconstruct the complex fabric of the ancient Egyptian society and how they keep interacting with modern audiences

A Glossary of Old Syrian Joaquín Sanmartín, 2024-07-09 A Glossary of Old Syrian l z is the second of two volumes that aim to map the lexicon of Old Syrian as it can be extracted and reconstructed from the Old Akkadian Eblaite through the Old and Middle Babylonian corpora Referring to a continuum of dialects spoken in the Syrian Levantine and Syrian Mesopotamian regions through the third and second millennia BCE Old Syrian is a diachronically conservative geographically pluricentric and pragmatically multilayered linguistic cluster As such the Glossary pays special attention to the distribution of lexical data along diachronic diatopic and diastratic criteria Given the extent and widely dispersed nature of this data entries are supported by the most representative corpora of the Old Syrian linguistic landscape Each entry is headed by an etymon a kind of prelinguistic consonantal skeleton and further information about different lexemes their roots and their derivations is provided in subentries As the lexicography of Old Syrian remains uncertain the Glossary includes leading interpretative opinions alongside the most relevant Semitic material to corroborate the lexical choices it adopts Bibliographical references are succinct and restricted as a rule to texts easily found in any Assyriological or Semitic library Intended as a reference work in support of future study A Glossary of Old Syrian offers a clear view of the state of the field

Prophets, Lovers and Giraffes Orly Goldwasser, 2002 The book's central proposition is that the prominent feature of the hieroglyphic script which Egyptologists call determinatives makes up an elaborate system of classifiers All items of the lexicon take motivated pictorial classifiers By this device the script reflects the map of knowledge organization of ancient Egyptian culture The book aims to reveal the principles and constraints governing the codification of the ancient Egyptian universe in this system There is to date no comprehensive study either in Egyptology or in cognitive linguistics of the hieroglyphic classifiers as a structured system The present work attempts to fill the existing hiatus by bridging the disciplines of Egyptology and cognitive studies using the tools of the latter to elucidate the former and thus perhaps arrive at new perspectives on both From the Egyptological angle the book deals with the ancient Egyptians' nomenclature for items in the world and the

relationship between lexicon and the knowledge organization However the events occurring in the picture script render cognitive processes visible to our inspection hundreds of years before they have ripened into the Egyptian language This visibility bears directly on a number of crucial questions in cognitive linguistics and ethnobiology The book also includes an introduction to the hieroglyphic script
