**Next-Generation Enterprise Security and Governance** Mohiuddin Ahmed, Nour Moustafa, Abu Barkat, Paul Haskell-Dowland, 2022-04-19 The Internet is making our daily lives as digital as possible and this new era is called the Internet of Everything IoE The key force behind the rapid growth of the Internet is the technological advancement of enterprises The digital world we live in is facilitated by these enterprises advances and business intelligence These enterprises need to deal with gazillions of bytes of data and in today s age of General Data Protection Regulation enterprises are required to ensure privacy and security of large scale data collections However the increased connectivity and devices used to facilitate IoE are continually creating more room for cybercriminals to find vulnerabilities in enterprise systems and flaws in their corporate governance Ensuring cybersecurity and corporate governance for enterprises should not be an afterthought or present a huge challenge In recent times the complex diversity of cyber attacks has been skyrocketing and zero day attacks such as ransomware botnet and telecommunication attacks are happening more frequently than before New hacking strategies would easily bypass existing enterprise security and governance platforms using advanced persistent threats For example in 2020 the Toll Group firm was exploited by a new crypto attack family for violating its data privacy where an advanced ransomware technique was launched to exploit the corporation and request a huge figure of monetary ransom Even after applying rational governance hygiene cybersecurity configuration and software updates are often overlooked when they are most needed to fight cyber crime and ensure data privacy Therefore the threat landscape in the context of enterprises has become wider and far more challenging There is a clear need for collaborative work throughout the entire value chain of this network In this context this book addresses the cybersecurity and cooperate governance

challenges associated with enterprises which will provide a bigger picture of the concepts intelligent techniques practices and open research directions in this area This book serves as a single source of reference for acquiring the knowledge on the technology process and people involved in next generation privacy and security *MATLAB For Dummies* John Paul Mueller, Jim Sizemore, 2021-06-02 Go from total MATLAB newbie to plotting graphs and solving equations in a flash MATLAB is one of the most powerful and commonly used tools in the STEM field But did you know it doesn't take an advanced degree or a ton of computer experience to learn it MATLAB For Dummies is the roadmap you've been looking for to simplify and explain this feature filled tool This handy reference walks you through every step of the way as you learn the MATLAB language and environment inside and out Starting with straightforward basics before moving on to more advanced material like Live Functions and Live Scripts this easy to read guide shows you how to make your way around MATLAB with screenshots and newly updated procedures It includes A comprehensive introduction to installing MATLAB using its interface and creating and saving your first file Fully updated to include the 2020 and 2021 updates to MATLAB with all new screenshots and up to date procedures Enhanced debugging procedures and use of the Symbolic Math Toolbox Brand new instruction on working with Live Scripts and Live Functions designing classes creating apps and building projects Intuitive walkthroughs for MATLAB's advanced features including importing and exporting data and publishing your work Perfect for STEM students and new professionals ready to master one of the most powerful tools in the fields of engineering mathematics and computing MATLAB For Dummies is the simplest way to go from complete newbie to power user faster than you would have thought possible *eWork and eBusiness in Architecture, Engineering and Construction: ECPPM 2016* Symeon Christodoulou, Raimar Scherer, 2017-03-27 *eWork and eBusiness in Architecture Engineering and Construction 2016* collects the papers presented at the 11th European Conference on Product Process Modelling ECPPM 2016 Cyprus 7-9 September 2016 The contributions cover complementary thematic areas that hold great promise for the advancement of research and technological development in the modelling of complex engineering systems encompassing a substantial number of high quality contributions on a large spectrum of topics pertaining to ICT deployment instances in AEC FM including Information and Knowledge Management Construction Management Description Logics and Ontology Application in AEC Risk Management 5D nD Modelling Simulation and Augmented Reality Infrastructure Condition Assessment Standardization of Data Structures Regulatory and Legal Aspects Multi Model and distributed Data Management System Identification Industrialized Production Smart Products and Services Interoperability Smart Cities Sustainable Buildings and Urban Environments Collaboration and Teamwork BIM Implementation and Deployment Building Performance Simulation Intelligent Catalogues and Services **Acting Principles of Nano-Scaled Matrix Additives for Composite Structures** Michael Sinapius, Gerhard Ziegmann, 2021-05-22 The book explores the effect of nanoscale matrix additives along the four levels of material formation particle resin interaction the influence of nanoparticles on the processability of the polymer the

influence of nanoparticles on polymer curing and the influence of nanoparticles on the fiber plastic composite Fiber reinforced plastics have a significantly higher lightweight construction potential in components with a primary single or biaxial stress state compared to isotropic metals At the same time their insensitivity to corrosion and their advantageous fatigue properties can help to reduce maintenance costs Due to their outstanding specific mechanical properties they are among today s high performance lightweight construction materials These properties make them particularly attractive in the field of mobility However as soon as the matrix properties dominate the mechanical properties e g in the case of fibre parallel compressive strength significant weaknesses become apparent in the mechanical properties Here one approach is to significantly increase the matrix properties through nanoscale ceramic additives and at the same time to guarantee the processability of the resin
