Hate Crime Concepts Policy Future Directions:

Hate Crime Neil Chakraborti, 2017-09-25 Hate crime has become an increasingly familiar term in recent times as problems of bigotry and prejudice continue to pose complex challenges for societies across the world. Although greater recognition is now afforded to hate crimes and their associated harms, the problem is still widespread and many key questions remain unanswered: Are we doing enough to protect vulnerable members of society? Are we doing enough to address the offending behaviour of hate crime perpetrators? Are there better ways of understanding and responding to hate crime? This book brings together contributions from leading experts in the field to address these and other contested issues in this fascinating and often controversial subject area. Drawing upon innovative work being undertaken nationally and internationally, the book offers fresh ideas on hate crime scholarship and policy and in so doing enables readers to re-evaluate the concept of hate crime in the light of fresh research theory and policy. It provides much needed ways of taking the hate debate forward as well as offering practical suggestions for developing both scholarship and policy in a more progressive manner.

Responding to Hate Crime Chakraborti, Neil, Garland, Jon, 2015-07 The policy makers that govern responses to hate crimes and the institutions that research those crimes have up to this point been separate: policy makers have not taken research into consideration and researchers have conducted their studies with little reference to policies. This book bridges the gap between the two by bringing together internationally renowned hate crime experts from the domains of academia, policy making and activism. The contributors provide new perspectives on the nature of hate crimes, their victims and their perpetrators, exploring a range of themes, challenges and solutions that have otherwise received little attention. The result is a collection of innovative ways of combating hate crime that combines cutting edge research with the latest in professional innovations while remaining accessible to a wide audience.
