Grant Stauffer, Bretton T. Giles, Shawn P. Lambert, 2022-09-08 This volume examines how pre-Columbian societies in the Americas envisioned their cosmos and iteratively modeled it through the creation of particular objects and places It emphasizes that American societies did this to materialize overarching models and templates for the shape and scope of the cosmos the working definition of cosmospace Noting a tendency to gloss over the ways in which ancestral Americans envisioned the cosmos as intertwined and animated the authors examine how cosmospaces are manifested archaeologically in the forms of objects and physically altered landscapes This book's chapters therefore offer case studies of cosmospaces that present themselves as forms of architecture portable artifacts and transformed aspects of the natural world In doing so it emphasizes that the creation of cosmospaces offered a means of reconciling peoples experiences of the world with their understandings of them

The U.S. 37-MM Gun in World War II Charles C Roberts, 2023-11-30 These photos are high quality and many focus on specific components further enhancing the value of this book for modelers Armorama Developed in response to the 1899 Hague Convention the 37 mm gun met the restrictions on the size of weapons that could fire explosive shells yet was also light and lethal enough to be used in battle After World War I in which the French Model 1916 37 mm was used extensively several countries developed or adopted the 37 mm gun Behind in their development of an antitank gun the United States relied on the German Pak 36 37 mm design as a basis for development By the mid 1930s the US Ordnance Department designed the M3 37 mm gun and M4 carriage resulting in a towed antitank gun the first antitank gun in the US Army This gun proved effective at the beginning of World War II but as German armor protection increased it could not penetrate the frontal armor of many German tanks and was relegated to lesser roles However the gun proved effective against the Japanese tanks and Japanese strong points in the Far East The US military used the gun on several production and experimental armored vehicles including the M3 Lee Medium Tank the M3 Stuart Light Tank the M5 Stuart Light Tank the M8 Armored Car the T17E1 Staghound Armored Car and the M3A1E3 Scout Car The gun was also

used on several non armored vehicles the P39 Aeracobra and selected naval vessels Despite its small size the US M3 37 mm gun served throughout the war on many vehicles and performed exactly as designed Fully illustrated this is the first complete account of the development and use of the US 37 mm gun in World War II *American Artist* Ernest William Watson, Arthur Leighton Guptill, 1958 **Official Gazette of the United States Patent Office** United States. Hiestand, 2025-08-28 This fully illustrated study examines the bloody battle between the US Army s M18 tank destroyer and Germany s formidable Panther tank at Arracourt in September 1944 In response to Germany s Blitzkrieg victories of 1939 41 the US Army created a dedicated tank destroyer force intended to encircle and destroy the massed attacking armored divisions Fast relatively well armed but weakly armored the M18 was designed from the start as a tank destroyer unlike the M10 and M36 By September 1944 the German Army s armored divisions fielded the Panther tank alongside the PzKpfw IV In

this book William Hiestand notes that the Panther s combination of long range firepower impressive armour and good mobility won it a fearsome reputation but shows how the M18 proved to be a very able opponent when the two types clashed on a foggy September morning during the battle of Arracourt Fully illustrated with specially commissioned artwork and mapping alongside archive photographs this lively study examines the origins development strengths and limitations of the two AFVs as well as their crews training doctrine and combat effectiveness It also provides a detailed account of the momentous battle between the US 704th Tank Destroyer Battalion and the German Panzer Brigade 113 at Arracourt where the two types clashed in a surprising encounter that challenges our preconceptions about armored warfare in World War II

US Air Cavalry Trooper vs North Vietnamese Soldier Chris McNab,2020-09-17 The tactics and technologies of modern air assault vertical deployment of troops by helicopter or similar means emerged properly during the 1950s in Korea and Algeria Yet it was during the Vietnam War that helicopter air assault truly came of age and by 1965 the United States had established fully airmobile battalions brigades and divisions including the 1st Cavalry Division Airmobile This division brought to Vietnam a revolutionary new speed and dexterity in battlefield tactics using massed helicopters to liberate its soldiers from traditional overland methods of combat manoeuvre However the communist troops adjusted their own thinking to handle airmobile assaults Specializing in ambush harassment infiltration attacks and small scale attrition the North Vietnamese operated with light logistics and a deep familiarity with the terrain They optimized their defensive tactics to make landing zones as hostile as possible for assaulting US troops and from 1966 worked to draw them into Hill Traps extensive kill zones specially prepared for defence in depth By the time the 1st Cavalry Division Airmobile withdrew from Vietnam in 1972 it had suffered more casualties than any other US Army division Featuring specially commissioned artwork archive photographs and full colour battle maps this study charts the evolution of US airmobile tactics pitted against North Vietnamese countermeasures The two sides are analysed in detail including training logistics weaponry and organization
