Art and Illusionists Nicholas Wade, 2015-10-12 We delight in using our eyes particularly when puzzling over pictures Art and illusionists is a celebration of pictures and the multiple modes of manipulating them to produce illusory worlds on flat surfaces This has proved fascinating to humankind since the dawning of depiction Art and illusionists is also a celebration of the ways we see pictures and of our ability to distil meaning from arrays of contours and colours Pictures are not only a source of fascination for artists who produce them but also for scientists who analyse the perceptual effects they induce Illusions provide the glue to cement the art and science of vision Painters plumb the art of observation itself whereas scientists peer into the processes of perception Both visual artists and scientists have produced patterns that perplex our perceptions and present us with puzzles that we are pleased to peruse Art and illusionists presents these two poles of pictorial representation as well as presenting novel perceptual portraits of the artists and scientists who have augmented the art of illusion The reader can experience the paradoxes of pictures as well as producing their own by using the stereoscopic glasses enclosed and the transparent overlay for making dynamic moir patterns

Transforming Type Barbara Brownie, 2014-12-18 Transforming Type examines kinetic or moving type in a range of fields including film credits television adverts interactive poetry and motion graphics As the screen increasingly imitates the properties of real life environments typographic sequences are able to present letters that are active and reactive These environments invite new discussions about the difference between motion and change global and local transformation and the relationship between word and image In this illuminating study Barbara Brownie explores the ways in which letterforms transform on screen and the consequences of such transformations Drawing on examples including Kyle Cooper's title sequence design kinetic poetry and MPC's adverts for the UK's Channel 4 she differentiates motion from other kinds of kineticism with particular emphasis on the transformation of letterforms into other forms and objects through construction parallax and metamorphosis She proposes that each of these kinetic behaviours requires us to revisit existing assumptions about the nature of alphabetic forms and the spaces in which they are found

Portable Moving Images Ricardo Cedeño Montaña, 2017-08-21 This media history explores a series of portable small cameras playback devices and storage units that have made the production of film and video available to everyone Covering several storage formats from 8mm films of the 1900s through the analogue videotapes of the 1970s to the compression algorithms of the 2000s this work examines the effects that the shrinkage of complex machines media formats and processing operations has had on the dissemination of moving images Using an archaeological approach to technical standards of media the author provides a genealogy of portable storage formats for film analog video and digitally encoded video This book is a step forward in decoding the storage media formats which up to now have been the domain of highly specialised technicians

The Cinema and Its Shadow Alice Maurice, 2013-03-15 The Cinema and Its

Shadow argues that race has defined the cinematic apparatus since the earliest motion pictures especially at times of technological transition In particular this work explores how racial difference became central to the resolving of cinematic problems the stationary camera narrative form realism the synchronization of image and sound and perhaps most fundamentally the immaterial image the cinema's shadow which figures both the material reality of the screen image and its racist past Discussing early race subjects Alice Maurice demonstrates that these films influenced cinematic narrative in lasting ways by helping to determine the relation between stillness and motion spectacle and narrative drive The book examines how motion picture technology related to race embodiment and authenticity at specific junctures in cinema's development including the advent of narrative feature films and sound In close readings of such films as *The Cheat* *Shadows* and *Hallelujah* Maurice reveals how the rhetoric of race repeatedly embodies film technology endowing it with a powerful mix of authenticity and magic In this way the racialized subject became the perfect medium for showing off shoring up and reintroducing the cinematic apparatus at various points in the history of American film Moving beyond analyzing race in purely thematic or ideological terms Maurice traces how it shaped the formal and technological means of the cinema

The British National Bibliography Arthur James Wells, 2009 *Moving Images* Helen Groth, 2013-08-23 This book examines how the interplay between nineteenth century literary and visual media paralleled the emergence of a modern psychological understanding of the ways in which reading viewing and dreaming generate moving images in the mind

Silent Cinema Paolo Cherchi Usai, 2019-04-04 Paolo Cherchi Usai provides a comprehensive introduction to the study research and preservation of silent cinema from its heyday in the early 20th century to its present day flourishing He traces the history of the moving image in its formative years from Edison's and Lumière's first experiments to the dawn of talkies provides a clear guide to the basics of silent film technology introduces the technical and creative roles involved in its production and presents silent cinema as a performance event rather than a passive viewing experience This new greatly expanded edition takes the reader on a new journey exploring silent cinema in the broader context of technology culture and society from the invention of celluloid film and its related machinery to film studios laboratories theatres and audiences Among the people involved in the creation of a new art form were filmmakers actors and writers but also engineers entrepreneurs and projectionists Their collective efforts and the struggle to preserve their creative work by archives and museums are interwoven in a compelling story covering three centuries of media history from the magic lantern to the reinvention of silent cinema in digital form The new edition also includes comprehensive resource information for the study research preservation and exhibition of silent cinema

Uncanny Modernity Jo Collins, 2008-04-01 This book explores the sense in which the uncanny may be a distinctively modern experience the way these unnerving feelings and unsettling encounters disturb the rational presumptions of the modern world view and the security of modern self identity just as the latter may themselves be implicated in the production of these experiences as uncanny

Wit's End James Combs, 2010-08-11 This book is a study of

the Great Movies that fluid category of feature films deemed by various authorities film societies critics academics and movie enthusiasts to be the enduring and memorable works of cinematic history But what are they about In Wit s End the author attempts to make sense of these films in order to understand their greatness in the context of their relation to other films and to the worlds they come from and recreate on screen To that end we employ the conceptual power of pragmatic social theory and the rich idea of aesthesis to explore and arrange these films as a means of understanding what they express about the universality of human life in our keen use of wit organization of social wont and direction of cultural way It is hoped that such an inquiry will illuminate the glory of the great films and contribute to the advance of film studies The Oxford
