

Magnavox

SERVICE MANUAL

THE MAGNAVOX COMPANY - SERVICE DEPARTMENT
FORT WAYNE, INDIANA

Manual No. 6340

For Miscellaneous Section, Volume 10
First Issue, March, 1973

701548 TAPE RECORDER

OPERATING INSTRUCTIONS

Insert the cartridge to be played into the tape cartridge player with the label on top and the pulley showing on the right. The unit will automatically turn on and illuminate one of the four track indicator lights. The desired program may then be selected by pressing the selector button repeatedly until the desired track number is illuminated.

At the end of each program the automatic switch will select the next program in the fixed sequence. To turn off, the cartridge should either be removed from the player or pulled out at least one inch. This will release the power switch and remove the pressure roller from the capstan.

Important. Do not turn off your tape unit by pulling the plug or switching off your main system. The tape cartridge must be removed or the pressure applied by the capstan may ruin the tape drive roller in your cartridge.

MAINTENANCE

Cleaning Playback Head and Capstan. During operation, the magnetic tape in the cartridge will deposit a reddish-brown substance (some of its oxide coating) on the magnetic playback head and capstan shaft.

If left to accumulate over a long period it will interfere with the tape player's performance.

To prevent this deterioration we recommend cleaning every 100 hours of operation.

Attach a cotton swab to the end of a stick about four inches long, moisten with alcohol (available from your local drug store) and rub the magnetic playback head and capstan gently up and down until they are free from all traces of oxide stain. Keep alcohol away from shaft bearings and take care to remove any excess alcohol or cotton wool strands. A good alternate method is to use a special head cleaning cartridge available at most dealers.

ADJUSTMENTS

Caution! The unit is set correctly before leaving the factory. Before making any adjustments play several tapes to ensure that the trouble is not due to a faulty tape.

The following adjustments should only be performed by a fully qualified service technician.

Head Height. If crosstalk occurs (unwanted signals from other tape channels), adjust the head height until only the two desired channels are heard.

Head Azimuth. When playing a high frequency tape, maximum high frequency response may be obtained by turning the head azimuth adjusting screw for maximum output.
