## **Magnetic Resonance Imaging Of Neurological Diseases In Tropics:**

**Magnetic Resonance Imaging of Neurological Diseases in Tropics** Rakesh K Gupta, Sunil Kumar, 2014-01-30

Magnetic resonance imaging MRI is a scan that uses strong magnetic fields and radio waves to produce detailed images of the inside of the body This book is a comprehensive guide to the diagnosis and management of neurological infectious diseases using MRI Divided into four sections the text begins with an introduction to tropical diseases of the central nervous system and their epidemiology The second section provides in depth coverage of the technique of MRI from the basic principles to clinical application and more advanced features The following sections describe use of the technique for both infectious diseases including tuberculosis HIV and parasitic diseases and noninfectious conditions such as stroke poisoning and epilepsy Each chapter features numerous MRI and pathological images and extensive references Key points

Comprehensive guide to diagnosis and management of neurological infectious diseases in tropics using MRI In depth coverage of the technique from basics to more advanced aspects Covers MRI for both infectious and noninfectious conditions Includes nearly 300 MRI and pathological images

**Neurologic Aspects of Systemic Disease, Part III** Jose Biller, José M. Ferro, 2014-01-09 Systemic disease involves several parts of the body or the complete system This comprehensive reference focuses on the specific neurologic aspects of systemic disease Part 3 includes coverage of oncologic disorders organ transplantation infectious diseases tropical neurology pregnancy neuroanesthesia and other diseases and disorders Each chapter provides a complete introduction to the neurologic aspect and provides the best known diagnostic and treatment practices The collection will be a valuable and trusted resource for clinical neurologists research neurologists and neuroscientists and general medical professionals as a first stop for a comprehensive and focused review of the state of the art for understanding the neurologic impact of each covered disease A comprehensive introduction and overview of the neurologic aspects of systemic disease Part 3 covers of oncologic disorders organ transplantation infectious diseases tropical neurology pregnancy neuroanesthesia and other diseases and disorders Each chapter focuses on the neurologic aspects related to a specific disease presentation

**Motor System Disorders, Part II** David S. Younger, 2023-08-22 This comprehensive review of research and best practice clinical management of spinal cord neurodegenerative and cerebral disorders is intended for both researchers and clinicians Encompassing hereditary and acquired disorders from disease and accident the book explores motor control disorders associated with stroke dementia seizure encephalitis and more Covering disorders of both children and adults the book discusses the latest advances in treatments related to neuroplasticity neural tissue transplantation and immunotherapy Summarizes assessment disease course and best practice treatment Includes hereditary disorders and disorders from disease or accident Discusses advances in neuroplasticity tissue transplantation immunotherapy and other treatments Reviews effects of dementia stroke seizure encephalitis cancer and more

**Neuroepidemiology in Tropical Health** Pierre-Marie Preux, Michel Dumas, 2017-09-21 Neuroepidemiology in Tropical

Health covers major neurological diseases of relevance in tropical settings and examines the specificities of epidemiology of neurological diseases in the context of tropical countries that face many challenges when compared to the developed world Part One focuses on methods and their eventual specificities and how such methods like sampling can be adapted for specific scenarios Parts Two and Three discuss environmental factors and their consequences for neurology in the tropical world as well as large geographical areas and their specificities Finally Part Four presents relevant neurological diseases in in depth chapters This invaluable information will help readers recognize the various neurological conditions presented with the inclusion of their aetiologies and treatment in tropical areas The book therefore fills a gap in the neuroepidemiology literature with chapters written by an international collection of experienced authors in the field Highlights differences and similarities between neuroepidemiology in tropical areas and temperate zones with a focus on methods and underlying factors Covers environmental factors in the tropical world and their consequences for neurology Chapters include references key articles books protocols for additional detailed study Includes wide topics of neurological disease in the tropics not only infectious diseases but also nutrition and public health

**Neglected Tropical Diseases and Conditions of the Nervous System** Marina Bentivoglio, Esper A. Cavalheiro, Krister Kristensson, Nilesh B. Patel, 2014-05-30 A number of diseases and conditions that occur primarily in remote rural or poor urban areas of low income countries have traditionally been neglected by the neuroscience research community These diseases and conditions affect the nervous system directly sometimes with lethal consequences and or are associated with severe neurological sequels such as epilepsy cognitive deficits and sleep disruption Several diseases also have the effect of promoting poverty by leaving sufferers unable to lead economically productive lives due to cognitive and behavioral disturbances or severe stigmatization The pathogenesis of neural dysfunction in the diseases addressed in this book and their sequels remains unclear Neuroscience of Neglected Diseases and Conditions makes available much needed information about how these diseases affect the human nervous system as well as to promote interest in further research Further research into neglected diseases and conditions will uncover information that sheds light on more general topics of interest to the neuroscience research community

*Magnetic Resonance Imaging of Central Nervous System Diseases* Werner J. Huk, Günther F. Gademann, G. Friedmann, 2012-12-06 Magnetic resonance imaging MRI is a new and still rapidly developing imaging technique which requires a new approach to image interpretation Radiologists are compelled to translate their experience accumulated from X ray techniques into the language of MRI and likewise students of radiology and interested clinicians need special training in both languages Out of this necessity emerged the concept of this book as a manual on the application and evaluation of proton MRI for the radiologist and as a guide for the referring physician who wants to learn about the diagnostic value of MRI in specific conditions After a short section on the basic principles of MRI the contrast mechanisms of present day imaging techniques knowledge of which is essential for the analysis of relaxation times are described in greater detail This is followed by a demonstration of functional

neuroanatomy using three dimensional view of MR images and a synopsis of frequent neurological symptoms and their topographic correlations which will facilitate examination strategy with respect to both accurate diagnosis and economy

**Neuroparasitology and Tropical Neurology** Hector H. Garcia, Herbert B. Tanowitz, Oscar H. Del Brutto, 2013-07-03  
Neuroparasitology and Tropical Neurology a new volume in The Handbook of Clinical Neurology provides a comprehensive and contemporary reference on parasitic infections of the human nervous system Parasitic infections are varied and some are resolved by the host's immune system other infections may become established even though unnoticed and some cause severe disease and death In our modern world neuroparasitoses are no longer geographically isolated and these infections now appear worldwide Outside of a very few well understood pathologies most parasitic infections have been neglected in the neurological literature and most neurologists have never diagnosed such an infection This volume details how with the advent of modern neuroimaging techniques improved diagnostic applications of molecular biology more accurate immunodiagnosis and minimally invasive neurosurgery human nervous system parasitoses are now diagnosed and treated with increasing frequency The book is divided into six sections and begins with an introduction to the mechanisms of infection diagnosis and pathology of parasitic diseases Subsequent chapters detail protozoan diseases and a section covering each of the major classes of human infecting helminths nematodes roundworms trematodes flukes and cestodes tapeworms The final section contains chapters on other important areas of tropical clinical medicine including the neurological complications of venomous bites and tropical nutritional deficiencies Neuroparasitology and Tropical Neurology will be of interest to neurologists neurosurgeons and other health professionals encountering patients with parasitic infections A comprehensive reference resource on the diagnosis and treatment of parasitic infections of the human nervous system Focuses on the impact of modern neuroimaging techniques improved diagnostic applications of molecular biology more accurate immunodiagnosis and minimally invasive neurosurgery to diagnose parasitoses International list of contributors including the leading workers in the field

**Manson's Tropical Diseases E-Book** Jeremy Farrar, Peter J. Hotez, Thomas Junghanss, Gagandeep Kang, David Lalloo, Nicholas J. White, Patricia J. Garcia, 2023-07-14 For 125 years physicians have relied on Manson's Tropical Diseases for a comprehensive clinical overview of this complex and fast changing field The fully revised 24th Edition Dr Jeremy Farrar along with an internationally recognized editorial team global contributors and expert authors delivers the latest coverage on parasitic and infectious diseases from around the world From the difficult to diagnose to the difficult to treat this highly readable award winning reference prepares you to effectively handle whatever your patients may have contracted Covers all of tropical medicine in a comprehensive manner general medicine in the tropics and non clinical issues regarding public health and ethics Serves as an indispensable resource for physicians who treat patients with tropical diseases and or will be travelling to the tropics or who are teaching others in this area Contains a new section on 21st Century Drivers of Tropical Medicine with chapters covering Poverty and Inequality Public Health in Settings of Conflict and

Political Instability Climate Change and Medical Product Quality and Public Health Includes all new chapters on Surgery in the Topics Yellow Fever Systemic Mycoses and COVID 19 Covers key topics such as drug resistance emerging and reemerging infections such as Zika Ebola and Chikungunya novel diagnostics such as PCR based methods point of care tests such as ultrasound public health in settings of conflict and political instability and much more Differentiates approaches for resource rich and resource poor areas Includes reader friendly features such as highlighted key information convenient boxes and tables extensive cross referencing and clinical management diagrams
