Magnificent Maps Power Propaganda And Art:

Magnificent Maps Peter Barber, Tom Harper, British Library, 2010 Published on the occasion of the exhibition at the British Library London April 30 Sept 19 2010 **Unmapping the 21st Century** Nicholas Michelsen, Neville Bolt, 2022-07-28 The 21st century has been characterized by great turbulence climate change a global pandemic and democratic decay Drawing on post structural political theory this book explores two dominant concepts used to make sense of our disturbed reality the state and the network The book explains how they are inextricably interwoven while showing why they complicate the way we interpret our present In seeking a better understanding of today s world this book argues that we need to pull apart the familiar lines of our maps By looking beneath and across these lines an unmapping presents new insights and opportunities for a better future Leading the Project Revolution Darren Dalcher, 2019-02-25 People play a vital part in the success of projects initiatives and organisations yet traditional project management sources offer limited guidance and insights that extend beyond technical roles and prescriptions Leading the Project Revolution delves into the dynamics of people teams and organisations exploring their impact on leadership strategy success and achievement The book offers a progressive agenda for improving project practice enabling the dialogue to advance from the typical coverage of static toolsets towards an understanding of flexible mindsets Flexibility agility and resilience are addressed as the social cultural and complexity dimensions of leadership strategy organisations and project execution are examined and practical insights are synthesised into pragmatic models and frameworks The volume brings together some of the best writing by leading authorities on teams leadership corporate culture human behaviour organisational dynamics psychology complexity strategy execution innovation social media and decision sourcing *Romantic Cartographies* Sally Bushell, Julia S. Carlson, Damian Walford Davies, 2020-12-10 An innovative interdisciplinary study of cartography as a significant multifaceted cultural practice in Romantic period culture Women and Geography on the Early Modern English Stage Katja Pilhuj, 2025-10-01 In a late 1590s atlas proof from cartographer John Speed Queen Elizabeth appears crowned and brandishing a ruler as the map s scale of miles Not just a map key the queen s depiction here presents her as a powerful arbiter of measurement in her kingdom For Speed the queen was a formidable female presence authoritative ready to measure any place or person The atlas finished during James reign later omitted her picture But this disappearance did not mean Elizabeth vanished entirely her image and her connection to geography appear in multiple plays and maps Elizabeth becomes like the ruler she holds an instrument applied and adapted *Women and Geography on the Early Modern English Stage* explores the ways in which mapmakers playwrights and audiences in early modern England could following their queen s example use the ideas of geography or world writing to reshape the symbolic import of the female body and territory to create new identities The book demonstrates how early modern mapmakers and dramatists men and women conceived of and constructed identities within a discourse of fluid ideas about space and gender **Cartography** Matthew H.

Edney,2019-04-12 In his most ambitious work to date Edney questions the very concept of cartography to argue that this flawed ideal has hobbled the study of maps Susan Schulten author of *A History of America in 100 Maps* Over the past four decades the volumes published in the landmark *History of Cartography* series have both chronicled and encouraged scholarship about maps and mapping practices across time and space As the current director of the project that has produced these volumes Matthew H Edney has a unique vantage point for understanding what cartography has come to mean and include In this book Edney disavows the term cartography rejecting the notion that maps represent an undifferentiated category of objects for study Rather than treating maps as a single unified group he argues scholars need to take a processual approach that examines specific types of maps sea charts versus thematic maps for example in the context of the unique circumstances of their production circulation and consumption To illuminate this bold argument Edney chronicles precisely how the ideal of cartography that has developed in the West since 1800 has gone astray By exposing the flaws in this ideal his book challenges everyone who studies maps and mapping practices to reexamine their approach to the topic The study of cartography will never be the same An intellectually bracing and marvellously provocative account of how the mythical ideal of cartography developed over time and in the process distorted our understanding of maps *Times Higher Education Cartography The Ideal and Its History* offers both a sharp critique of current practice and a call to reorient the field of map studies A landmark contribution K ren Wigen coeditor of *Time in Maps* [Object-Oriented Cartography](#) Tania Rossetto,2019-05-16 *Object Oriented Cartography* provides an innovative perspective on the changing nature of maps and cartographic study Through a renewed theoretical reading of contemporary cartography this book acknowledges the shifted interest from cartographic representation to mapping practice and proposes an alternative consideration of the thingness of maps Rather than asking how maps map onto reality it explores the possibilities of a speculative realist map theory by bringing cartographic objects to the foreground Through a pragmatic perspective this book focuses on both digital and nondigital maps and establishes an unprecedented dialogue between the field of map studies and object oriented ontology This dialogue is carried out through a series of reflections and case studies involving aesthetics and technology ethnography and image theory and narrative and photography Proposing methods to further develop this kind of cartographic research this book will be invaluable reading for researchers and graduate students in the fields of Cartography and Geohumanities

Mapping and Politics in the Digital Age Pol Bargaúes-Pedreny,David Chandler,Elena Simon,2018-11-06 Throughout history maps have been a powerful tool in the constitutive imaginary of governments seeking to define or contest the limits of their political reach Today new digital technologies have become central to mapping as a way of formulating alternative political visions Mapping can also help marginalised communities to construct speculative designs using participatory practices *Mapping and Politics in the Digital Age* explores how the development of new digital technologies and mapping practices are transforming global politics power and cooperation The book brings together authors from across political and social theory

Visual Representations of the Arctic Markku Lehtimäki, Arja Rosenholm, Vlad Strukov, 2021-03-30 Privileging the visual as the main method of communication and meaning making this book responds critically to the worldwide discussion about the Arctic and the North addressing the interrelated issues of climate change ethics and geopolitics A multi disciplinary multi modal exploration of the Arctic it supplies an original conceptualization of the Arctic as a visual world encompassing an array of representations imaginings and constructions By examining a broad range of visual forms media and forms such as art film graphic novels maps media and photography the book advances current debates about visual culture The book enriches contemporary theories of the visual taking the Arctic as a spatial entity and also as a mode of exploring contemporary and historical visual practices including imaginary constructions of the North Original contributions include case studies from all the countries along the Arctic shore with Russian material occupying a large section due to the country's impact on the region

For Creative Geographies Harriet Hawkins, 2013-10-08 This book provides the first sustained critical exploration and celebration of the relationship between Geography and the contemporary Visual Arts With the growth of research in the Geohumanities and the Spatial Humanities there is an imperative to extend and deepen considerations of the form and import of geography art relations Such reflections are increasingly important as geography art intersections come to encompass not only relationships built through interpretation but also those built through shared practices wherein geographers work as and with artists curators and other creative practitioners For Creative Geographies features seven diverse case studies of artists works and exhibitions made towards the end of the twentieth and the beginning of the twentieth first century Organized into three analytic sections the volume explores the role of art in the making of geographical knowledge the growth of geographical perspectives as art world analytics and shared explorations of the territory of the body In doing so Hawkins proposes an analytic framework for exploring questions of the geographical work

art does the value of geographical analytics in exploring the production and consumption of art and the different forms of encounter that artworks develop whether this be with their audiences or their makers **Body/State Jen**

Dickinson, 2016-04-08 *Body State* brings together original essays addressing various aspects of the evolving interaction between bodies and states. While each essay has different empirical and/or theoretical focus, authors consider a number of overlapping themes to appreciate the state's engagement with and concern about bodies. Divided into five parts, the first part *Bodies Modified and Divided* considers how the production, regulation, policing, and maintenance of borders (physical, social, sexual, political, religious, etc.) are used to enable or constrain the physical re-shaping of the body. Part two *Capital Bodies* extends the state's concern with the flows of bodies that make up the nation to consider how they are enrolled in the complex structures of capitalist exchange that form the basis for maintaining and contesting a set of relationships between states and markets. Part three *Deviance and Resistance* examines both how states seek to discipline non-normal bodies and appreciates the capacity of changes in the socio-cultural meaning and nature of bodies to resist and/or escape states. Part four *Sovereignty and Surveillance* develops themes of deviancy and resistance by considering the impact of new technologies both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself. Finally, Part five *The Body Virtual* examines the impact of new technologies and online spaces both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself. A varied collection of essays that address important and complex topics in a readable and creative way. *The Chanson des Chétifs and Chanson de Jérusalem* Carol Sweetenham, 2020-04-22

The First Crusade was arguably one of the most significant events of the Middle Ages. It was the only event to generate its own epic cycle, the Old French Crusade Cycle. The central trilogy at the heart of the Cycle describes the Crusade from its beginnings to the climactic battle of Ascalon, comprising the *Chanson d'Antioche*, the *Chanson des Chétifs*, and the *Chanson de Jérusalem*. This translation of the *Chétifs* and the *Jérusalem* accompanies and completes the translation of the *Antioche* and makes the trilogy available to English readers in its entirety for the first time. The value of the trilogy lies above all in the insight it gives us to medieval perceptions of the Crusade. The events are portrayed as part of a divine plan where even outcasts and captives can achieve salvation through Crusade. This in turn underlies the value of the Cycle as a recruiting and propaganda tool. The trilogy gives a window onto the chivalric preoccupations of thirteenth-century France, exploring concerns about status, heroism, and defeat. It portrays the material realities of the era in vivid detail: the minutiae of combat, smoke-filled halls, feasts, prisons, and more. And the two newly translated poems are highly entertaining as well, featuring a lubricious Saracen lady, not in the first flush of youth, a dragon inhabited by a devil, marauding monkeys, miracles, and much more. The historian will find little new about the Crusade itself but abundant material on how it was perceived, portrayed, and performed. The translation is accompanied by an introduction examining the origins of the two poems and their wider place in the cycle. It is supported by extensive footnotes, a comprehensive index of names and places, and translations of the main

The Social Life of Maps in America, 1750-1860 Martin Brückner, 2017-10-26 In the age of MapQuest and GPS we take cartographic literacy for granted We should not the ability to find meaning in maps is the fruit of a long process of exposure and instruction A carto coded America a nation in which maps are pervasive and meaningful had to be created The Social Life of Maps tracks American cartography's spectacular rise to its unprecedented cultural influence Between 1750 and 1860 maps did more than communicate geographic information and political pretensions They became affordable and intelligible to ordinary American men and women looking for their place in the world School maps quickly entered classrooms where they shaped reading and other cognitive exercises giant maps drew attention in public spaces miniature maps helped Americans chart personal experiences In short maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts theatrical performances and the communication of emotions This lavishly illustrated study follows popular maps from their points of creation to shops and galleries schoolrooms and coat pockets parlors and bookbindings Between the decades leading up to the Revolutionary War and the Civil War early Americans bonded with maps Martin Brückner's comprehensive history of quotidian cartographic encounters is the first to show us how

Cartographies of Culture Damian Walford Davies, 2012-06-15 Cartographies of Culture New Geographies of Welsh Writing in English offers a pioneering new examination of the links between maps and imaginative writing Concerned to draw literary studies and geography into a fruitful dialogue the book offers a genuinely interdisciplinary study of literary texts in relation to the spatialities of culture Taking the anglophone literature of Wales as its main data field the book offers a boldly imaginative and stringently theorised analysis of five literary maps What emerges is nothing less than a new way of reading literature through and as maps

Rediscovering the World Benjamin Hennig, 2012-12-14 We need new maps is the central claim made in this book In a world increasingly influenced by human action and interaction we still rely heavily on mapping techniques that were invented to discover unknown places and explore our physical environment Although the traditional concept of a map is currently being revived in digital environments the underlying mapping approaches are not capable of making the complexity of human environment relationships fully comprehensible Starting from how people can be put on the map in new ways this book outlines the development of a novel technique that stretches a map according to quantitative data such as population The new maps are called gridded cartograms as the method is based on a grid onto which a density equalising cartogram technique is applied The underlying grid ensures the preservation of an accurate geographic reference to the real world It allows the gridded cartograms to be used as basemaps onto which other information can be mapped This applies to any geographic information from the human and physical environment As demonstrated through the examples presented in this book the new maps are not limited to showing population as a defining element for the transformation but can show any quantitative geospatial data such as

wealth rainfall or even the environmental conditions of the oceans The new maps also work at various scales from a global perspective down to the scale of urban environments The gridded cartogram technique is proposed as a new global and local map projection that is a viable and versatile alternative to other conventional map projections The maps based on this technique open up a wide range of potential new applications to rediscover the diverse geographies of the world They have the potential to allow us to gain new perspectives through detailed cartographic depictions

A Cultural History of Gardens in the Medieval Age Michael Leslie, 2015-04-02 The Middle Ages was a time of great upheaval the period between the seventh and fourteenth centuries saw great social political and economic change The radically distinct cultures of the Christian West Byzantium Persian influenced Islam and al Andalus resulted in different responses to the garden arts of antiquity and different attitudes to the natural world and its artful manipulation Yet these cultures interacted and communicated trading plants myths and texts By the fifteenth century the garden as a cultural phenomenon was immensely sophisticated and a vital element in the way society saw itself and its relation to nature *A Cultural History of Gardens in the Medieval Age* presents an overview of the period with essays on issues of design types of gardens planting use and reception issues of meaning verbal and visual representation of gardens and the relationship of gardens to the larger landscape
