remains the only full length guidebook focussed exclusively on the country's north and on Zanzibar. Reflecting tourism's shift away from backpackers and budget camping safaris to upper end and mid range safaris and beach holidays it is tailored closely to the requirements of anyone going on a safari to northern Tanzania followed by a few days on Zanzibar. Northern Tanzania is dominated by Africa's finest safari circuit offering spectacular game viewing year round. Centred on the legendary Serengeti National Park and its world famous wildebeest migration this circuit also incorporates the Ngorongoro Crater and surrounding Ngorongoro Conservation Area, Lake Manyara and Tarangire national parks. Geographically northern Tanzania is one of Africa's most varied regions with a palm fringed Indian Ocean coastline complemented by the scenic wonders of the Great Rift Valley and several impressive volcanically formed mountains, most notably snow capped Mount Kilimanjaro, the tallest peak in Africa and a popular goal for hikers. Lesser known gems include the prehistoric rock art at Kondoa, a UNESCO World Heritage Site, the forested Arusha National Park and Amani Nature Reserve and the spectacular Ol Doinyo Lengai, Africa's most active volcano. Serviced by a well developed safari industry, northern Tanzania's superlative reserves are complemented by a stopover on the legendary Spice Island of Zanzibar. With its atmospheric old town, idyllic beaches and offshore reefs teeming with marine life, it is every bit as evocative as its name. Written by acknowledged Africa experts and prolific guidebook writers Philip Briggs and Chris McIntyre, this guide prioritises practical information about the area's peerless collection of national parks, game reserves and other safari destinations. Accommodation listings for the safari destinations are the most detailed and authoritative available, the authors weeding through the ever growing number of lodges and camps to create a critically selective list of the best properties across all price points. Meanwhile a colour wildlife field guide provides great detail about wildlife and where to see it. All in all, Northern Tanzania Safari Guide is the most authoritative source available for visitors, an essential travel companion for both first time visitors and seasoned safari goers.

The Chimpanzees of the Mahale Mountains Toshisada Nishida, 1990 The Great Apes Cyril Ruoso, Emmanuelle Grundmann, 2007-10-04. Highly descriptive text and stylish photography help explain the life of man's closest cousins. With brilliant photography and concise text, the authors give us a close up look at our nearest relatives. From the grizzled old male gorilla to the playful young orangutans, so many of these creatures' actions and habits are a reflection of those of human beings. This book tells us of the varying lifestyles of gorillas, chimpanzees, bonobos, gibbons and orangutans, their social habits, their environs and their relationship with humans and the importance of that to their long term survival. AUTHOR: Following a PhD on rehabilitation and reintroduction of orangutans in Borneo, Emmanuelle works as consultant primatologist for various NGOs in Africa and South America on primate conservation and reintroduction projects. A writer and scientific journalist, she collaborates with various French magazines including *Terre Sauvage*, *Le Monde*, *Sciences Avenir* and *Geo*. She has also been a consultant for TV documentaries and has written several books such as *Le singe avec le photographe* with the photographer Cyril Ruoso and *Ces forêts qui assassinent*, an essay on deforestation in the tropics, as well as several books for children. to counter dietary toxins broken legged chicks have been known to eat analgesic foods that alleviate pain By observing wild health we may discover or rediscover ways to benefit our own health As Craig Stoltz of the Washington Post noted this highly readable assessment triggers more outside the double helix thoughts about human health than anything I ve read recently

Groups Kaori Kawai, 2013 *Groups The Evolution of Human Sociality* is the product of a collaborative project based at the Research Institute for Languages and Cultures of Asia and Africa at the Tokyo University of Foreign Studies Researchers primarily involved in three fields primate sociology and ecology ecological anthropology and socio cultural anthropology came together to discuss the shape and variations of groups as sympatric entities and the evolutionary historical foundations that have led to the orientation of groups in present day human society To that end the book turns to non human primates for comparative purposes to consider the nature of the evolutionary historical foundations of sociality In place of the past objective of reconstructing the ecology and society of early humans the book s contributions instead re identify the creation and evolution of that which is social and challenge the prevailing theory of groups in socio cultural anthropology Specialists on research into human beings and those studying non human primates develop the debate about groups in the context of their own areas of expertise at times in ways that extend beyond the boundaries of their fields
