Making Cities Work Prospects And Policies For Urban America:

Making Cities Work Robert P. Inman, 2009-01-05 Making Cities Work brings together leading writers and scholars on urban America to offer critical perspectives on how to sustain prosperous livable cities in today's fast evolving economy. Successful cities provide jobs, quality schools, safe and clean neighborhoods, effective transportation, and welcoming spaces for all residents. But cities must be managed well if they are to remain attractive places to work, relax, and raise a family; otherwise, residents, firms, and workers will leave, and the social and economic advantages of city living will be lost. Drawing on cutting edge research in the social sciences, the contributors explore optimal ways to manage the modern city and propose solutions to today's most pressing urban problems. Topics include the urban economy, transportation, housing, and open space; immigration; race; the impacts of poverty on children; education, crime, and financing; and managing services. The contributors show how to make cities work for diverse urban constituencies and why we still need cities despite the many challenges they pose. Making Cities Work brings the latest findings in urban economics to policymakers, researchers, and students, as well as anyone interested in urban affairs. In addition to the editor, the contributors are David Card, Philip J. Cook, Janet Currie, Edward L. Glaeser, Joseph Gyourko, Richard J. Murnane, Witold Rybczynski, Kenneth A. Small, and Jacob L. Vigdor. **The Oxford**

Handbook of Urban Economics and Planning Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2011-02-01 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning. The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship. Although economists were among the early contributors to the literature on urban planning, many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions, equity over efficiency, and normative prescriptions over positive analysis. Planners, meanwhile, even as they draw upon economic principles, often view the work of economists as abstract, not sensitive to institutional contexts, and communicated in a formal language spoken by few with decision making authority. Not surprisingly, papers in the leading economic journals rarely cite clearly pertinent papers in planning journals, and vice versa. Despite the historical divergence in perspectives and methods, urban economics and urban planning share an intense interest in many topic areas: the nature of cities, the prosperity of urban economies, the provision of urban services, efficient systems of transportation, and the proper allocation of land between urban and environmental uses. In bridging this gap, this book highlights the best scholarship in planning and economics that addresses the most pressing urban problems of our day and will stimulate further dialog between scholars in urban planning and urban economics. Urban Models and Public-Private Partnership Remo Dalla Longa, 2011-03-29 This book addresses the topic of urban models with reference to large western cities and particularly to global cities. In the current transitional phase, the use of language and the systematization of phenomena has become important. The book's matrix examines two important and strongly connected themes: urban models and public private partnerships (PPP) determined by urban functions.

which are transformed in an increasingly rapid and complex manner as a result of globalization PPPs represent the new border of the modern global state The book focuses on two principal urban models renewal and restructuring through PPPs and subsequently the relationship between state and market in fourteen Italian cities renewal and two central European cities Leipzig and Budapest restructuring CoUrbIT Complex Urban Investment Tools and the book Globalization and Urban Implosion Creating New Competitive Advantage by the same author serve as points of reference Canadian Urban Governance in Comparative Perspective Kristin R. Good, **East India Company and Urban Environment in Colonial South India** Moola Atchi Reddy, 2021-09-27 This book makes a pioneering attempt to analyse the linkages between the rule of East India Company and urban environment in colonial India over more than a half century from 1746 to 1803 through a study of the city of Madras present Chennai The book traces urban development in colonial South India from a broad economic history point of view and with a focus on its environmental dimension covering the period from the First Carnatic War until the 18th century by which time the English East India Company had consolidated its power It discusses themes such as urban development infrastructural development housing and buildings city and suburbs and development of land and roads in the colonial period Using extensive archival resources it offers new insights on the various aspects of the shifting urban physical environment and captures the development of Madras city limits road infrastructure building of paved streets whitewashed walls and compounded houses establishment of garden houses use of land resources development of masonry bridges by merchants housing problems and the building of Fort House Garden House Admiralty House Pantheon House Custom House etc in Madras to describe the impact of colonialism on urban environment An important contribution to the history of urban economics and environment this book with its lucid style and rich illustrations will be an essential read for scholars and researchers of colonial history modern Indian history environmental history urban environment urban history political economy urban economic history Indian history and South Asian studies **European Yearbook of Constitutional Law 2020** Ernst Hirsch Ballin, Gerhard van der Schyff, Maarten Stremler, Maartje De Visser, 2021-03-27 The European Yearbook of Constitutional Law EYCL is an annual publication devoted to the study of constitutional law It aims to provide a forum for in depth analysis and discussion of new developments in the field both in Europe and beyond This second volume examines the constitutional positioning of cities across space and time Unrelenting urbanisation means that most people are or soon will be living in cities and that city administrations become in many respects their quintessential governing units Cities are places where State power is operationalised and concretised where laws and government policies transform from parchment objectives to practical realities In a similar vein cities are also places for the realisation of the constitutional rights and liberties enjoyed by individuals The book is organised around three sets of relations that await further unpacking in theory as well as practice that between cities and other institutions in the national constitutional architecture that between cities and their inhabitants and that between cities and international organisations The

contributions to this book show the marked diversity in the role and powers available to cities in Europe and beyond and identify principles and approaches to help stipulate new ways of thinking about the legal role and relevance of cities going forward Ernst Hirsch Ballin is distinguished university professor at Tilburg University and vice dean for research of Tilburg Law School Gerhard van der Schyff is associate professor at Tilburg Law School Department of Public Law and Governance Maarten Stremmer is lecturer at Maastricht University Faculty of Law Department of Public Law Maartje De Visser is associate professor at SMU School of Law Singapore

Triumph of the City Edward Glaeser, 2012-01-31 Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 A masterpiece Steven D Levitt coauthor of *Freakonomics* Bursting with insights The New York Times Book Review A pioneering urban economist presents a myth shattering look at the majesty and greatness of cities America is an urban nation yet cities get a bad rap they're dirty poor unhealthy environmentally unfriendly or are they In this revelatory book Edward Glaeser a leading urban economist declares that cities are actually the healthiest greenest and richest in both cultural and economic terms places to live He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind Using intrepid reportage keen analysis and cogent argument Glaeser makes an urgent eloquent case for the city's importance and splendor offering inspiring proof that the city is humanity's greatest creation and our best hope for the future

City Power Richard Schragger, 2016-09-01 Reigning theories of urban power suggest that in a world dominated by footloose transnational capital cities have little capacity to effect social change In *City Power* Richard C Schragger challenges the existing assumptions arguing that cities can govern but only if we let them In the past decade city leaders across the country have raised the minimum wage expanded social services and engaged in social welfare redistribution These cities have not suffered capital flight In fact many are experiencing an economic renaissance Schragger argues that city policies are not limited by the demands of mobile capital but instead by constitutional restraints serving the interests of state and federal officials Maintaining weak cities is a political choice In this new era of global capital the power of cities is more relevant to citizen well being than ever before A dynamic vision of city politics for our new urban age *City Power* reveals how cities can govern despite these constitutional limits and why we should want them to

Local Redistribution and Local Democracy Clayton P. Gillette, 2011-06-28 The traditional theory of urban finance argues against local redistribution of wealth on the assumption that such action is likely to chase away the relatively wealthy leaving only the impoverished behind Nevertheless Clayton P Gillette observes local governments engage in substantial redistribution both to the wealthy and to the poor In this thoughtful book Gillette examines whether recent campaigns to enact living wage ordinances and other local redistributive programs represent gaps in the traditional theory or political opportunism He then investigates the role of the courts in distinguishing between these explanations The author argues that courts have greater

capacity to review local programs than is typically assumed He concludes that when a single interest group dominates the political process judicial intervention to determine a program's legal validity may be appropriate But if the political contest involves competing groups courts should defer to local political judgments **The Price of Paradise** David Dante Troutt, 2023-11-21 American communities are facing chronic problems fiscal stress urban decline environmental sprawl mass incarceration political isolation disproportionate foreclosures and severe public health risks In *The Price of Paradise* David Troutt argues that it is a lack of mutuality in our local decision making that has led to this looming crisis facing cities and local governments Arguing that there are structural flaws in the American dream Troutt investigates the role that place plays in our thinking and how we have organized our communities to create or deny opportunity Legal rules and policies that promoted mobility for most citizens simultaneously stifled and segregated a growing minority by race class and most importantly place A conversation about America at the crossroads *The Price of Paradise* is a multilayered exploration of the legal economic and cultural forces that contribute to the squeeze on the middle class the hidden dangers of growing income and wealth inequality and the literature on how growth and consumption patterns are environmentally unsustainable **The Economics of Cultural Diversity** Peter Nijkamp, Jacques Poot, Jessie Bakens, 2015-08-28 The populations of many countries in the world are becoming more culturally diverse This spurs a growing need for an informed debate on the socio economic implications of cultural diversity This book offers a solid statistical and econometric perspective **Migration and Forced Displacement - Vulnerability and Resilience - Volume 1** Samson Maekele Tsegay, 2024-11-06 Migration has been one of the contested topics among scholars and politicians throughout the world Similarly the experiences of refugees asylum seekers and migrants have been different as they are influenced by race gender class and geographical location This book explores the experiences of international migrants including the challenges they face from nation states environmental issues and sociocultural factors It consists of chapters that discuss the causes and effects of migration the role of nation states and the environment Moreover the book covers gender and family relations and the relationship of refugees and migrants with the host population and the socio cultural and economic integration of migrants Overall the book argues that international migrants particularly refugees and asylum seekers are among the most vulnerable groups in the world However they use various strategies to overcome their vulnerability and become resilient in the face of adversity Hence the book contributes to increasing people's awareness of migration and the experiences of refugees asylum seekers and migrants It can also be a significant source for initiating further debate and academic discussion on issues of migration and forced displacement vulnerability and resilience *Tiger Economies Under Threat* Shahid Yusuf, Kaoru Nabeshima, 2009-10-01 In recent years growth rates in the so called Tiger economies of Southeast Asia have been above the average not only for developing countries but for the world as a whole Yet they fall short of the economic growth experienced during 1975-95 The underlying worry for policy makers is that the decrease presages the beginning of a downward trend a worry that has been sharpened

by the global recession But are the Tiger economies under threat And if so what are the causes and how can they be addressed This book employs a comparative analysis of the Southeast Asian Tiger economies centered on Malaysia to tackle these questions The findings presented will be of particular interest to policy makers academics business people and researchers Green Products Joao Neiva de Figueiredo, Mauro F Guillen, 2011-07-12 Sharing successful examples of

sustainable products from around the world Green Products Perspectives on Innovation and Adoption supplies an in depth analysis of the key factors that influence the adoption of sustainable products It examines case studies of green production and consumption from a business perspective considering both techno **Open Borders and International Migration**

Policy J. Fetzer, 2016-01-26 Although philosophers debate the morality of open borders few social scientists have explored what would happen if immigration were no longer limited This book looks at three examples of temporarily unrestricted migration in Miami Marseille and Dublin and finds that the effects were much less catastrophic than opponents of immigration claim URBAN SPRAWL Dr. Akhtar Hussain, 2025-03-29 This book explores the urban landscape and

expansion of Karachi Pakistan s largest metropolitan hub a city that embodies resilience even in adversity It vividly illustrates the role of thriving cities in developing countries and their impact on economic well being As Pakistan s commercial and financial center Karachi holds immense promise due to its strategic location and seaport However rapid unplanned urbanization and a crumbling infrastructure have led to gentrification and deepening urban divides This work serves as a crucial guide for urban planners offering insights into sustainable policies to safeguard the city s future and improve the lives of Karachi s residents Two Dragon Heads Shahid Yusuf, Kaoru Nabeshima, 2010-01-11 This book explores the contrasting

development options available to Beijing and Shanghai and proposes strategies for these cities based on their current and acquired capabilities experience of other world cities the emerging demand in the national market and likely trends in global trade **Small Business and the City** Rafael Gomez, Andre Isakov, Matthew Semansky, 2015-02-26 In Small Business and the City Rafael Gomez Andre Isakov and Matt Semansky highlight the power of small scale entrepreneurship to transform

local neighbourhoods and the cities they inhabit Studying the factors which enable small businesses to survive and thrive they highlight the success of a Canadian concept which has spread worldwide the Business Improvement Area BIA BIAs allow small scale entrepreneurs to pool their resources with like minded businesses becoming sources of urban rejuvenation magnets for human talent and incubators for local innovation in cities around the globe Small Business and the City also analyses the policies necessary to support this urban vitality describing how cities can encourage and support locally owned independent businesses An inspiring account of the dynamism of urban life Small Business and the City introduces a new main street agenda for the twenty first century city **Innovation Through Cooperation** Georg Weiers, 2013-09-26 Many

people have great ideas Without the necessary skills and means most never get to realize them If they could cooperate with competent firms and entrepreneurs together both could achieve much and this is increasingly happening Mechanisms are

being established making a division of labour between inventors and implementers a reality This is changing the nature of innovation from an internal R D or purely entrepreneurial attempt to a more cooperative innovation An Idea Economy emerges where anyone has the possibility to profit from their ideas and everyone will benefit from more and better innovation This book presents us the emergence and structure of the Idea Economy by extending the seminal concepts of Entrepreneurial Society and Open Innovation Part I describes the big picture on how innovation is evolving where we are today and what an Idea Economy will look like Part II points the way forward discussing in detail on how cooperation in the innovation process works and why this is only recently becoming possible
