Leadership and Learning Marlene Morrison, 2009-07-01 This proposal is for a book about pedagogical leadership that draws upon an extensive literature base as well as empirical research by the author in order to examine forms of leadership and management that promote and instill education for learning and social justice Its starting points are to restore and elevate social and moral purpose in leadership as first order constructs that have theoretical and practical implications for existing and potential leader educators This is not necessarily an easy thing to do Asking educators and researchers of education leadership to define what they consider to be the core moral values underpinning leadership in educational settings usually results in some fairly bland if fundamentally important statements about putting learners at the heart of leadership praxis especially that which occurs in educational settings In practice numerous organisational mission

statements attest to this rhetorical conviction Yet it is current policy contexts that place relations between leaders teachers and learners in contradictory moral positions Drives to improve student performance through increased competition in the market place intensified procedures for monitoring and evaluation and frenetic commitments to change as overarching leadership mantras have relegated Sergioanni s 1998 definition of pedagogical leadership that invests in capacity building by developing social and academic capital for students and intellectual capital for teachers as second even third order constructs This book intends to reverse the process and in doing so it will relegate to second order and by lively debate and illustrative vignettes many though not all of the hegemonic constructs that are prevalent in current managerial times This book will therefore define and challenge a paradox as governments express commitment to an educational settlement that minimises exclusion widens participation and promotes active citizenship the much heralded vanguards of that settlement leaders and managers are being enjoined to reduce their thinking and action to technicist manoeuvres Grace 2000 236 in which aspirations towards social justice can become more distant strangely exotic even in their expression As importantly such technical manoeuvring is not accompanied by a reduction in leadership and management tasks and responsibilities As more is demanded of organizations and their leaders in terms of responsibilities for learning in areas of health sexuality drug awareness physical exercise and nutrition citizenship work experience race equality and skills in familial and social caring questions arise about the extent to which social justice constitutes a wide umbrella under which such interests might shelter or whether social justice is to be considered separately with attendant dangers to be seen as add on and therefore potentially marginalized or distinct from the total enterprise that constitutes education and learning *Counterpoint-Point* Jim Davis, 2024-07-03 Are Satan and his minions active around mankind through the world the flesh and the devil Is the enmity between his seed and the seed of the woman real and on display Can humans do anything to protect themselves from this real threat Does God provide protection and answers for these threats Join Jim Davis in the style of C S Lewis and Frank Peretti in exploring and answering all these questions with a year long daily review of actual Yahoo News headlines of 2023 presenting this spiritual warfare examination with the face of the reality of evil and the promises and hope of a Savior

**Private Learning, Public Needs** Eric J. Weiner, 2005 The publication *Private Learning Public Needs* looks at the devastating effects neoliberal globalization continues to have on education schooling and literacy development in the United States The book is divided in three parts Part I Neoliberal Globalization and the Question of Adult Literacy Education is broken into two chapters Chapter one is a study of neoleberalism and its relationship to globalization Specially the changing role of the state is examined in terms that bring attention to globalization s capacity to ignore nation state borders especially in the context of finance and culture The role of the state is discussed in light of its influence on local agencies and on local institutions Of issue is the interiorization of neoliberal globalization at the material levels of educational life namely curriculum standard and development Through the imposition of certain kinds of standards teacher education programs must make

some hard decisions about whether they will on the one hand satisfy the needs manufactured by neoliberal interests as they manifest themselves in curricular and pedagogic mandates or on the other will use their authority to challenge and confront that which they know is detrimental to democratic principles and good teaching practices Chapter two examines how neoliberal interests have impeded the goals of adult literacy education Part II The Work of Critical Theory in a Neoliberal Age takes up the work of two prominent critical theorists in and beyond education Erich Fromm and Paulo Freire Chapter three discusses Fromm's important alternative to top down discourses of power and authority In chapter four Freire's work in São Paulo as Secretary of Education is studied for what it can teach us about the importance and possibility of structural transformations

*Teaching Africa* George J. Sefa Dei, 2009-12-04 One is always struck by the brilliant work of George Sefa Dei but nothing so far has demonstrated his pedagogical leadership as much as the current project With a sense of purpose so pure and so thoroughly intellectual Dei shows why he must be credited with continuing the motivation and action for justice in education He has produced in this powerful volume *Teaching Africa* the same type of close reasoning that has given him credibility in the anti racist struggle in education Sustaining the case for the democratization of education and the revising of the pedagogical method to include Indigenous knowledge are the twin pillars of his style A key component of this new science of pedagogy is the crusade against any form of hegemonic education where one group of people assumes that they are the masters of everyone else Whether this happens in South Africa Canada United States India Iraq Brazil or China Dei's insights suggest that this hegemony of education in pluralistic and multi ethnic societies is a false construction We live pre eminently in a world of co cultures not cultures and sub cultures and once we understand this difference we will have a better approach to education and equity in the human condition
