

3.1 Order of Events

a. Use time clauses to show two separate past time periods. Use the past perfect to signal an event that occurred in an earlier time period.	<i>Elyse had moved <u>by the time</u> the researchers called her.</i>
The time words <i>after</i>, <i>before</i>, <i>by the time</i>, <i>until</i>, and <i>when</i> can introduce the time clauses.	<i><u>After</u> they had met, they noticed their many similarities.</i> <i><u>Until</u> Elyse started her research, she hadn't known about the twin study.</i>
b. With <i>before</i> and <i>after</i>, the past perfect is not always necessary because the order is clear. In this case, the past perfect emphasizes the earlier time period.	<i>Elyse moved <u>before</u> she met her twin. or Elyse had moved <u>before</u> she met her twin.</i>
c. In time clauses with <i>when</i>, the use of past perfect in the main clause usually shows a good amount of time between events.	<i><u>When</u> Paula met Elyse, she had already learned about the research. (She learned about the research. She <i>met</i> Elyse some time later.)</i>
The use of the simple past in both clauses shows that one event happened very soon after the other.	<i><u>When</u> Paula met Elyse, she learned about the research. (She learned about the research very soon after she met Elyse.)</i>

Twin World by Cory Daniels

I had thought about including my twins in a study until I read about one woman's experience.

Ana had been interested in the study of twins all her life. Ana was a twin herself, and she had twin boys.

- 5 Before her twins were born, she had read a lot about twin studies. After she had done a little research, Ana found an early reading study for twins. It sounded like a useful study. It looked at the role of genetics and environment in developing reading skills. She contacted the researchers and learned that she had to wait until the twins were four years old. When she enrolled the twins in the study, she hadn't known that
- 10 the twins needed to give a DNA sample to prove they were twins. As soon as Ana learned this, she took the twins out of the study. Ana thought that taking a DNA sample was an invasion of her children's privacy.

When I read about her experience, I decided not to put my twins in a study after all.
