New Directions in Group Communication Lawrence R. Frey, 2002 New Directions in Group Communication takes as its mission the setting of the agenda for the study of group communication in the future It does so by presenting work that scholars have not previously explored in the current small group communication literature Part I focuses on new theoretical and conceptual directions both presenting new views and extending current positions Part II examines new research methodologies while Part III looks at antecedent factors affecting group communication Parts IV and V of the text provide insight into both group communication process and practices Part VI covers different group communication contexts including communication patterns in top management teams

Power in the EFL Classroom Phyllis Wachob, 2009-10-02 Critical pedagogy is not a set of ideas but a way of doing learning and teaching Canagarajah 2005 This definition puts CP squarely in the classroom and leads us to view how teachers interact with students and how students treat one another while negotiating institutional and societal expectations The chapters in the book use a variety of methods to address questions of power within educational institutions from classrooms to the ministries of education All the contributors are or have been teachers in the Middle East from Egypt to Iran Their nationalities range from Egyptian to American Canadian British Tunisian and Iranian Ten of the contributors are women All have conducted research and or invited participation from among students and fellow teachers to explore issues of Critical Pedagogy from various perspectives The question of physical space relates to power but is also related to linguistic space student choice is not only related to linguistic space but also to motivation and thus empowerment Changing teachers beliefs leads to empowerment for teachers but also empowerment for students Educational policy that recognizes social and personal identity reflects back to

personal motivation These studies meet and mesh complement and sometimes take different viewpoints However all the studies embrace the concept that we must respect and nurture the human in our students that we as teachers are the front line as enablers of our students empowerment If we do not provide the space and honor their dignity our students cannot claim and embrace their power Canagarajah S 2005 Critical Pedagogy in L2 Learning and Teaching In E Hinkel Ed Handbook of Research in Second Language Teaching and Learning pp 931 949 Mahwah New Jersey Lawrence Erlbaum Associates

Group Dynamics Uwe Bußmann,Silvia Schweighofer,2011-08-08 Inhaltsangabe Abstract A group consists of some people who

interact during a certain time The number of group members is that small that there is the possibility for every member to interact with every other group member face to face If people meet by accident who are not close friends it will be not a group If you want to learn more about the formation of groups you will find two leading models which display the phases of group formation On the one hand there is the Bernstein and Lowy model on the other hand Bruce Tuckman also designed a phase model which shows the formation of groups Roles in groups can be positive and negative They are supporting the group as collectivity and are not only the result of individual need abilities and characteristics There are different ways for the classification of groups Groups can be classified in general according to following characteristics size topic task of the group Also a way for classifying groups is the classification according the Riemann Thomann Cross The next chapters this assignment shows a rough overview of the various possibilities for the classification of groups As there are many influencing facts for the effectiveness of groups and very contradictory interests the advantages for one group of interest are the disadvantages for the other group of interest The economical group of interest measures the effectiveness of a group by its productivity flexibility and quality The individual in a group identifies effectiveness in the group by reasonable tasks feeling of togetherness in the group and diverse interpersonal relationships At workplaces with friends together or even with complete strangers informal groups emerge nearly everywhere in real life The aims of informal groups are usually but not always different from those of formal groups The development within the group is apart from small differences not much different from formal groups The process of forming storming norming performing and eventually adjourning as Professor Tuckman has described is nearly the same One crucial point is that informal groups are NOT part of a formal organisation and members in most of these cases are free to leave whenever they want Therefore it is unusual to undergo e.g. a destructive storming Before it comes to such a storming often one or more members will leave the group in advance Leadership is especially in informal groups a difficult topic But

Learning James R. Davis,Bridget D. Arend,2023-07-03 For teachers in higher education who haven t been able to catch up with developments in teaching and learning James Davis and Bridget Arend offer an introduction that focuses on seven coherent and proven evidence based strategies The underlying rationale is to provide a framework to match teaching goals to distinct ways of learning based on well established theories of learning The authors present approaches that readers can readily and safely experiment with to achieve desired learning outcomes and build confidence in changing their methods of teaching Research on learning clearly demonstrates that learning is not one thing but many The learning associated with developing a skill is different from the learning associated with understanding and remembering information which in turn is different from thinking critically and creatively solving problems making decisions or change paradigms in the light of evidence Differing outcomes involve different ways of learning and teaching strategies The authors provide the reader with a conceptual approach for selecting appropriate teaching strategies for different types of content and for achieving specific learning objectives They demonstrate through examples how a focused and purposeful selection of activities improves student performance and in the process makes for a more effective and satisfying teaching experience The core of the book presents a chapter on each of the seven ways of learning Each chapter offers a full description of the process illustrates its application with examples from different academic fields and types of institutions clearly describes the teacher s facilitation role and covers assessment and online use The seven ways of learning are Behavioral Learning Cognitive Learning Learning through Inquiry Learning with Mental Models Learning through Groups and Teams Learning through Virtual Realities and

Experiential Learning Along the way the authors provide the reader with a basis for evaluating other approaches to teaching and other learning methodologies so that she or he can confidently go beyond the seven ways to adapt or adopt further strategies This is the ideal companion for teachers who are beginning to explore new ways of teaching and want to do some serious independent thinking about learning The book can also be used to prepare graduate students for teaching and will be welcomed by centers for teaching and learning to help continuing faculty re examine a particular aspect of their teaching
