Growing Up with Two Languages provides a highly accessible account of the stages of language development, describes and evaluates the various systems and strategies that can be adopted, and looks at the problems that can occur when a child is exposed to two languages and cultures. Combining research-informed advice and the experience of parents raising children as speakers of a wide range of languages in every populated continent in the world, this book and its associated web material will answer questions, offer tried and tested strategies to keep children speaking a minority language, and provide material to enlist the support of the extended family, teachers, and others. The perspective of adults who were themselves raised speaking more than one language is included. New to this edition is a chapter focusing on families raising children as speakers of indigenous and threatened languages, as well as chapters for teachers and health professionals who want to know more about multilingual child language development and how they can support parents to continue speaking their language with their children. With new and updated first-hand advice, Internet resources, and examples throughout, this book also includes a chapter that introduces important recent research into multilingual children and further reading guides for those who want to know more. This book is for parents who are raising or plan to raise children as speakers of more than one language and for the teachers and healthcare workers who meet and can support them.

Parenting Behaviour and Children's Cognitive Development Sara Meadows, 2013-10-23. The association between parents' behaviour and children's cognitive development is at the meeting place of several prominent theories of psychological development and a range of complex methodological and conceptual issues. On the one hand, there are theories which argue that the impetus of development is within the child and is largely unaffected by his or her experience of social interaction; on the other, are the commonsense experience of parents and educators and the body of neo-Vygotskian theory which would see the child's development as profoundly affected by social interaction or even constituted by it. The purpose of this book is to examine theories and evidence carefully in order to assess the causal links between parent behaviour and children's cognitive development. There is a considerable amount of evidence that suggests an association between parents' behaviour and their children's cognitive development, but there are many possible explanations for this association, including direct effects of parental teaching styles.
